Search flights, see prices, and make new PNR

Updated June 1, 2021

1. Search flights, see prices, and make new PNR
2. Availability and book seats
3. Itinerary pricing
4. Cheapest options search & price commands
5. Add name element
6. Add remarks
7. Add SSR contact details
8. Amadeus - Availability and book seats
9. Sabre - Availability and book seats
10. Galileo - Availability and book seats
11. Amadeus - itinerary pricing
12. Sabre - itinerary pricing
13. Galileo - itinerary pricing
14. Amadeus - FXD command
15. Sabre - JR command
16. Galileo - FS command
17. New ticket sell - International names
18. Amadeus - add name element (INF/CHD/ADT):
19. Sabre - add name element (INF/CHD/ADT):
20. Galileo - add name element (INF/CHD/ADT):
21. Amadeus - Add AP/APE/APM
22. Sabre - Add PE¥/9
23. Galileo - Add MT./P.XXXM*
24. Amadeus - Add SR CTCE/SR CTCM
25. Sabre - Add 3CTCE/3CTCM
26. Galileo - Add SI.PX/SSRCTCE / SI.PX/SSRCTCM
27. Farelogix - add Operational Contact
28. Airline Specific Instructions - DOCS for TK

Step 1 - Starting point

Question — No linked steps

Search flights, see prices, and make new PNR

1. Availability and book seats	Step 2
2. Itinerary pricing	Step 3
3. Cheapest options search & price commands	Step 4
4. Add name element	Step 5
5. Add remarks	Step 6
6. Add SSR contact details	Step 7

Step 2

Question — Parent step: 1

Availability and book seats

1. Amadeus - Availability and book seats	Step 8
2. Sabre - Availability and book seats	Step 9
3. Galileo - Availability and book seats	Step 10

Step 3

Question — Parent step: 1

Itinerary pricing

1. Amadeus - itinerary pricing	Step 11
2. Sabre - itinerary pricing	Step 12
3. Galileo - itinerary pricing	Step 13

Step 4

Question — Parent step: 1

Cheapest options search & price commands

1. Amadeus - FXD command	Step 14
2. Sabre - JR command	Step 15
3. Galileo - FS command	Step 16

Step 5

Question — Parent step: 1

Add name element

1. New ticket sell - International names	Step 17
2. Amadeus - add name element (INF/CHD/ADT)	Step 18
3. Sabre - add name element (INF/CHD/ADT)	Step 19
4. Galileo - add name element (INF/CHD/ADT)	Step 20

Step 6

Question — Parent step: 1

Add remarks

1. Amadeus - Add AP/APE/APM	Step 21
2. Sabre - Add PE¥/9	Step 22
3. Galileo - Add MT./P.XXXM*	Step 23

Step 7

Question — Parent step: 1

Add SSR contact details

1. Amadeus - Add SR CTCE/SR CTCM	Step 24
2. Sabre - Add 3CTCE/3CTCM	Step 25
3. Galileo - Add SI.PX/SSRCTCE / SI.PX/SSRCTCM	Step 26
4. Farelogix - add Operational Contact	Step 27
5. Airline Specific Instructions - DOCS for TK	Step 28

Step 8

Solution — Parent step: 2

Amadeus - Availability and book seats

a. Availability search:

- To search availability for one way trip with specific airline:

AN29JUNARNAMS/**A**KL or **SN**29JUNARNAMS/**A**KL	
AN or **SN**	AN (Amadeus Neutral) = displays the flights with classes of service that are open for sale or waitlist SN (Schedule Neutral) = displays all flights and all classes of service regardless availability, but will allow you to book only classes open for sale
29JUN	Date of departure
ARNAMS	From ARN to AMS
/A	Airline
KL	Airline prefix; KLM

- To search availability for one way trip with specific flight numbers.

AN29JUNARNHKG/**A**KL1110,KL887 or **SN**29JUNARNHKG/**A**KL1110,KL887	
AN or **SN**	AN (Amadeus Neutral) = displays the flights with classes of service that are open for sale or waitlist SN (Schedule Neutral) = displays all flights and all classes of service regardless availability, but will allow you to book only classes open for sale
/A	Airline
KL1104,KL887	Flight KL1104 on first segment, KL887 on second segment (still same bound)

- To search availability for round trip with specific airline:

AN29JUNARNHKG/**A**KL*05JULHKGARN/**A**KL or **SN**29JUNARNHKG/**A**KL*05JULHKGARN/**A**KL	
AN29JUNARNHKG/**A**KL or **SN**29JUNARNHKG/**A**KL	Date of departure, origin and destination cities, with which airline for the outbound
*	Used to separate the two entries
05JULHKGARN/AKL	Date of departure, origin and destination cities, with which airline for the inbound

Results will display outbound and inbound availability together:

```
AN29JUNARNHKG/AKL*05JULHKGARN/AKL
** AMADEUS AVAILABILITY - AN ** HKG HONG KONG.HK          156 FR 29JUN 0000

>SS4QQ2*LL11
```

b. Booking the seats:

- To book seats for one way itinerary with one segment:

SS3Q1	
SS	Seat Sell
3	Number of passengers
Q	What booking class (it does not matter at this stage what booking class you choose)
1	What line the chosen flight is on

- To book seats for one way itinerary with multiple segments:

SS5LQ1	
SS	Seat Sell
5	Number of persons
LQ	What booking class on first and second segment. (it does not matter at this stage what booking class you choose)
1	What line the chosen flight is on

- To book seats for round trip itinerary (to book outbound and inbound together):

SS4QQ2*LL1	
SS	Seat Sell
4	Number of persons
QQ	What booking class on first and second segment on first bound. (it does not matter at this stage what booking class you choose)
2	What line the chosen flight is on for the first bound.
*	Used to seperate the two entries
LL	What booking class on first and second segment on second bound. (it does not matter at this stage what booking class you choose)
11	What line the chosen flight is on for the second bound.

Other useful availability commands can be found here.

Step 9

Solution — Parent step: 2

Sabre - Availability and book seats

You may use manual commands or graphical mode to search for new flights.

1. Manual commands:

To search availability for specific airline:

125DECATHARN**¥**SK	
1	Availability Neutral
25DEC	Date of departure
ATHARN	Origin and destination city codes
¥	Fixed key to separate additional criteria
SK	Airline code

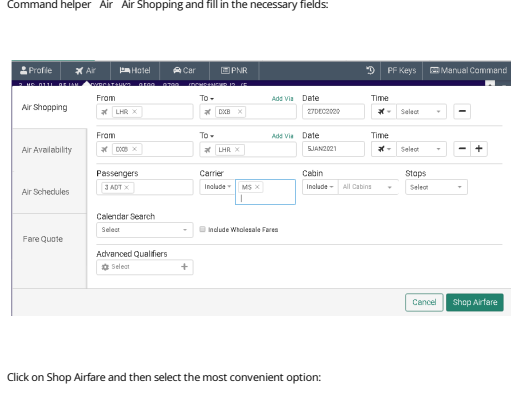
To book seats:

04K1K3	
0	Seat Sell
4	Number of passengers
K	What booking class on the first segment. (it does not matter at this stage what booking class you choose)
1	What line the above chosen flight is on
K	What booking class on the second segment. (it does not matter at this stage what booking class you choose)
3	What line the above chosen flight is on

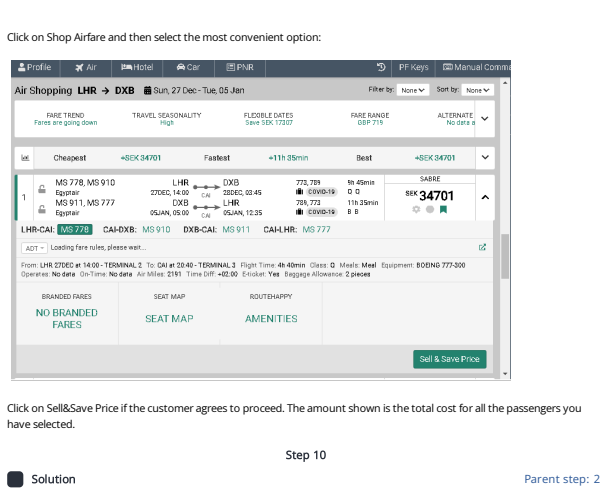
Other useful manual commands can be found here.

2. Graphical mode:

Command helper · Air · Air Shopping and fill in the necessary fields:



Click on Shop Airfare and then select the most convenient option:



Click on Sell&Save Price if the customer agrees to proceed. The amount shown is the total cost for all the passengers you have selected.

Step 10

Solution — Parent step: 2

Galileo - Availability and book seats

- To search availability for specific airline:

A25JUNJFKFRA*****LH	
A	Availability Neutral
25JUN	Date of departure
JFKFRA	From JFK to FRA
*	Fixed key to separate additional criteria
LH	Airline prefix, Lufthansa

To book seats:

For itinerary with one segment:

N2F3	
N	Seat Sell
2	Number of persons
F	What booking class on the first segment. (it does not matter at this stage what booking class you choose)
3	What line the chosen flight is on

For itinerary with multiple segments:

N2F3*	
N	Seat Sell
2	Number of persons
F	What booking class on the first segment. (it does not matter at this stage what booking class you choose)
3	What line the chosen flight is on
*	Standard entry to book connecting flights

Step 11

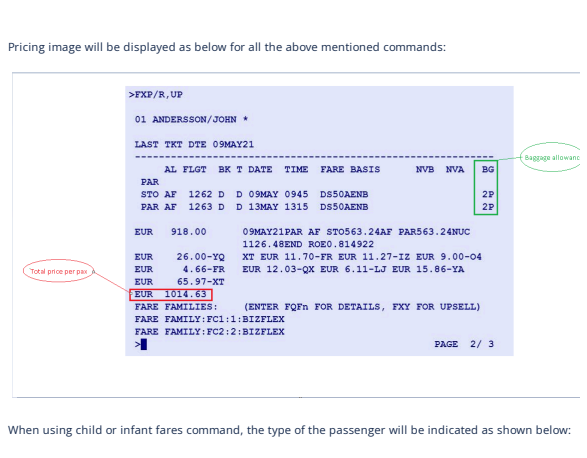
Solution — Parent step: 3

Amadeus - itinerary pricing

There are several pricing commands which can be used for the initial itinerary pricing, depending on the needs of the specific PNR. Please check the below table for available options:

Pricing entry	Command explanation
FXP/R,UP	Pricing in the selected booking classes, both published and un-published fares. TST is created.
FXB/R,UP	Pricing in the lowest available classes, both published and un-published fares. Classes are rebooked. TST is created.
FXX/R,UP	Informative pricing in the selected booking classes, both published and un-published fares. TST is not created. Must be followed by TTU if you wish to save the price.
FXR/R,UP	Informative pricing, which shows the price for the lowest available classes, both published and un-published fares. TST is not created. Must be followed by TTU if you wish to save the price.
…./RCH,UP	Basic commands can be followed by /RCH,UP to price child fares, both published and un-published fares. I.e: FXP/RCH,UP FXB/RCH,UP etc.
…./RIN,UP	Basic commands can be followed by /RIN,UP to price infant fares, both published and un-published fares. I.e: FXP/RIN,,UP FXX/RIN,UP etc.
…./SBF-1/R,UP	Basic commands can be followed by /SBF-1/R,UP to price the itinerary in fares with one piece of baggage allowance, both published and un-published fares.

Pricing image will be displayed as below for all the above mentioned commands:



```
>FXP/R,UP

For more pricing commands' variations check here

Step 12

Solution — Parent step: 3

Sabre - itinerary pricing

There are several pricing commands which can be used for the initial itinerary pricing, depending on the needs of the specific PNR. Please check the below table for available options:

Pricing entry	Command explanation
WP	Pricing in the selected booking classes.
WPA	Price all combinable fares
WPNCB	Pricing in the lowest available booking classes. Classes are rebooked.
	Different passenger types
WPNC	Informative pricing in the lowest available booking classes
WPP2ADT/1CNN	Pricing for different passenger type, in the example 2 adults and 1 child

For more pricing commands' variations check here.

Step 13

Solution — Parent step: 3

Galileo - itinerary pricing

There are several pricing commands which can be used for the initial itinerary pricing, depending on the needs of the specific PNR. Please check the below table for available options:

Pricing entry	Command explanation
FQ	Pricing in the selected booking classes.
FQBB	Pricing in the lowest available booking classes. Classes are rebooked.

Step 14

Solution — Parent step: 4

Amadeus - FXD command

FXD command shows recommendations for the best available options on the designated route.

Below is the basic command format.

FXD4ARN/**D**15JUNMIA/**D**25JUNARN/**R,UP**	
FXD	Pricing entry
4	Number of seats
ARN	Origin city
/D15JUNNYC	Outbound departure date And destination city
/D25JUNARN	Inbound departure date and final arrival city
/R,UP	Pricing entry to get both Published prices and Unpublished prices.

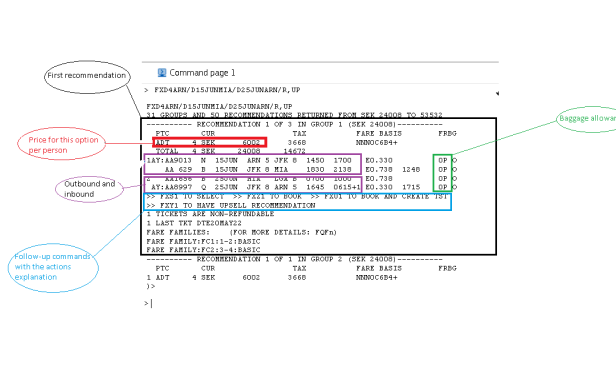
Useful command variation:

FXD4ARN/**D**15JUNMIA/**D**25JUNARN/**R,UP/SBF-1**	
/SBF-1	Indicator for search with fares including checked bag

Results will be shown as follows:

Use entry **MD** to move down to more recommendations.

In each recommendation's display, you can see the total cost for all the passengers, exact flights and booking class/ farebasis, as well as baggage allowance.

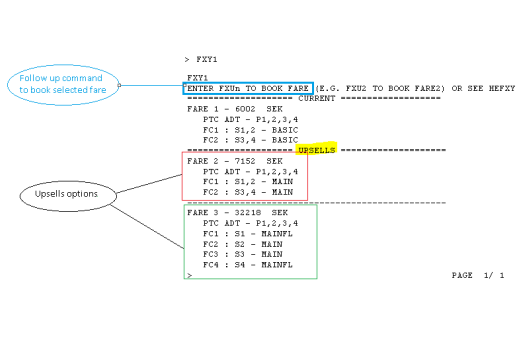


First recommendation
Price for the option per person
Outbound and inbound
Follow up command with the desired option
Baggage allowance

You can also see the following **FX** commands and the action that will be performed by choosing each command.

a. **FXY ! TO HAVE UPSELL RECOMMENDATION** - by using this command you can select higher fares' combinations for same itinerary segments (useful to select i.e. fare including checked baggage)

Once you find a desired fare use command **FXU** line of the upsell command to rebook the fare



b. **FXZ ! TO BOOK** - by using this command you book the itinerary as displayed in the initial recommendation

c. **FXU ! TO BOOK AND CREATE TST** - by using this command you save the itinerary and the price as displayed in the initial recommendation (this option will be possible only if your PNR already includes name fields of the passengers)

For more FXD commands' variations check here or refer to **HEFXD** help pages in Amadeus.

Step 15

Solution — Parent step: 4

Sabre - JR command

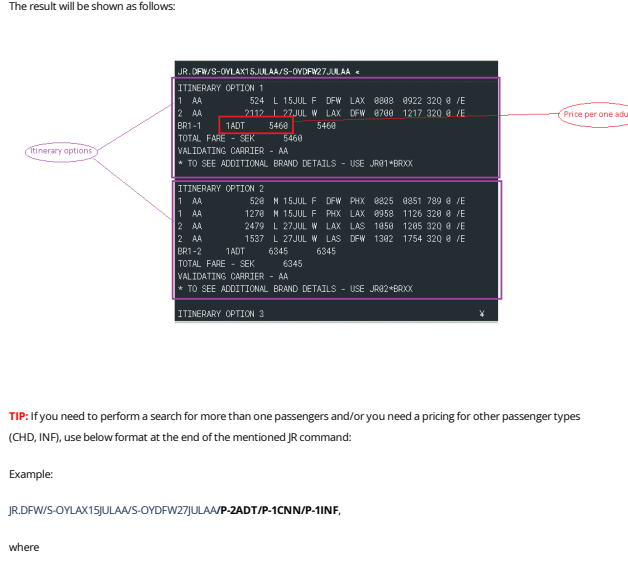
For one way trip with specific airline:

JR.DFW/S-OYLAX15JULAA	
JR.	Pricing entry
DFW	Origin city
S/O	Mandatory fixed element
Y	Class preference P - premium first class F - first class C - business class S - premium economy class Y - economy class
LAX	Destination city
15JUL	Departure date
AA	Airline code

For round trip with specific airline:

JR.DFW/S-OYLAX15JULAA/S-OYDFW27JULAA	
JR.	Pricing entry
DFW	Origin city
S/O	Mandatory fixed element
Y	Class preference for outbound P - premium first class F - first class C - business class S - premium economy class Y - economy class
LAX	Destination city
15JUL	Outbound departure date
AA	Airline code operating the outbound
S/O	Mandatory fixed element
Y	Class preference for inbound P - premium first class F - first class C - business class S - premium economy class Y - economy class
DFW	Final arrival city
27JUL	Inbound departure date
AA	Airline code operating the inbound

The result will be shown as follows:



TIP: If you need to perform a search for more than one passengers and/or you need a pricing for other passenger types (CHD, INF), use below format at the end of the mentioned JR command:

Example:

JR.DFW/S-OYLAX15JULAA/S-OYDFW27JULAA**/P-2ADT/P-1CNN/P-1INF.**

where

2,1 - numbers indicate the amount of passengers of this specific type

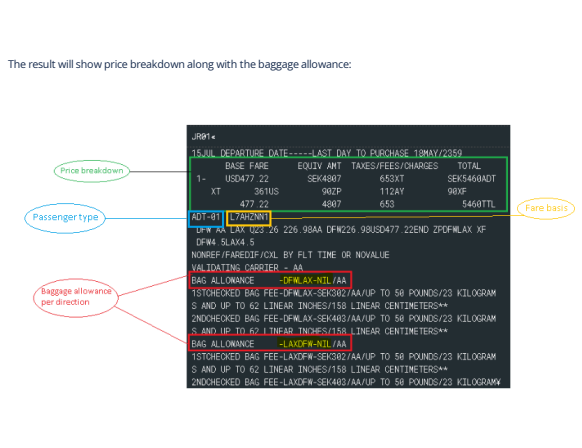
ADT - state for adults passenger

CNN - state for child passenger

INF - state for INF passenger

Once you review the available itinerary options, in order to choose the desired one use **JR01**, where 01 is adjustable based on the number of the selected itinerary option.

The result will show price breakdown along with the baggage allowance:



Step 16

Solution — Parent step: 4

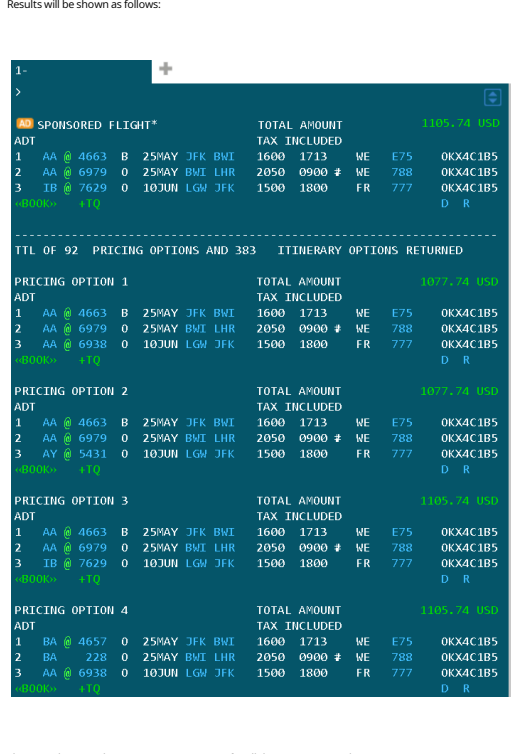
Galileo - FS command

This command can be performed manually or graphically:

1. Manual command

FSJFK25MAYLON10JUNJFK	
FS	Pricing entry
4	Number of seats
JFK	Origin city
25MAY	Date of outbound departure
LON	Destination city
10JUN	Date of the inbound departure
JFK	Final arrival city

Results will be shown as follows:



The price shown in the row TOTAL AMOUNT is for all the passengers in the PNR.

On the top we can see the sponsored or advertised fare, which is not the cheapest option usually.

Below starting from PRICING OPTION 1, the options will be suggested starting from the cheapest one.

Possible actions from this window:

- **>BOOK<** - choose to add the flights and the price to the PNR
- **+TQ** - choose to add to Trip Quotes
- **D** - choose to see details of the price, below screen will be displayed

```
TOTAL JOURNEY TIME
JFK-LHR: 12:00
LGW-JFK: 08:00

FS-1/2 ADT
REFUNDABLE: NO
LAST DATE TO PURCHASE TICKET: 07MAY22
TICKETING AGENCY: 3AGE

E-TICKET: YES

PLATING CARRIER: AA AMERICAN AIRLINES

ADDITIONAL TAXES, SURCHARGES, OR FEES MAY APPLY

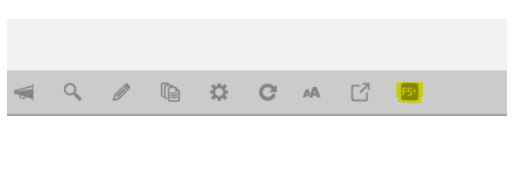
NYC AA X/BHI AA LON 90.50OKX4C1B5 AA NYC 0.50OKX4C1B5 NUC1.00END
ROE1.0
FARE USD1.00 AY5.60 US39.40 XA3.96 XF9.00 XY7.00 YC6.11 GB185.30
UB21.50 YR840.00  TAXES USD537.87  TOT USD538.87
```

- **R** - choose to open fare rules, below screen will be displayed. Click on the respective direction in green light to view the rules.

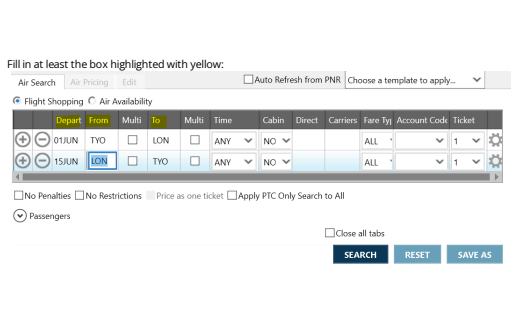
```
FARE   COMPONENT   BASIS
  1     JFK-LON    OKX4C1B5
  2     LON-JFK    OKX4C1B5
```

2. Graphical mode:

Click on **FS+** option on the left bottom part of the screen:



Fill in at least the box highlighted with yellow:



Select any optional criterias and click on **SEARCH**.

The **FS** command will be created automatically and the results will be shown in the same way as by using the manual command.

Step 17

Solution — Parent step: 5

New ticket sell - International names

How to handle new ticket sell when the customers name includes diacritic characters?

When customers book online and they enter their name with any of the below letters, the system will automatically on the backend convert the letters for ticketing purposes.

This is called converting diacritics into their non-diacritic character.

Diacritic Character	Non-diacritic Character
ä	ae
ö	oe
å	aa
ü	ue

In cases where you need to do a new ticket sell for a customer who has any of the above diacritics in their name, you can replace it with the corresponding non-diacritic letters as shown above.

Step 18

Solution — Parent step: 5

Amadeus - add name element (INF/CHD/ADT):

Name elements' format for INF/CHD/ADT:

PAX type	Name element command	Command explanation
Adult (ADT)	**NM1**LEAVEY/PATRICK MR	**NM** - entry for name element **1** - number of passengers with this name **LEAVEY** - adult's last name **PATRICK** - adult's first name **MR** - adult's title
Child (CHD) - ONLY for passengers between 2 and 12 years old. For children over 12 years old, ADT type of passenger must be chosen.	**NM1**LEAVEY/MAGGIE (**CHD/05APR12**)	**NM** - entry for name element **1** - number of passengers with this name **LEAVEY** - child's last name **MAGGIE** - child's first name **(CHD/05APR12)** - passenger type indicating child / date of birth
Infant (INF) - ONLY for passengers below 2 years old. For infants over 2 years old CHD type of passenger must be chosen - Specific handling is required - check the respective routine here.	**NM1**LEAVEY/PATRICK MR(**INF**MICHAEL/**01JUN21**)	**NM** - entry for name element **1** - number of passengers with this name (infant does not count) **LEAVEY** - adult last name **PATRICK** - adult's first name **MR** - adult's title **(INFMICHAEL/01JUN21)** - passenger type indicating infant / infant's first name / date of birth

Step 19

Solution — Parent step: 5

Sabre - add name element (INF/CHD/ADT):

Name elements' format for INF/CHD/ADT:

PAX type	Name element command	Command explanation
Adult (ADT)	-LEAVEY/PATRICK MR	**-** - entry for name element **LEAVEY** - adult's last name **PATRICK** - adult's first name **MR** - adult's title
Child (CHD) - ONLY for passengers between 2 and 12 years old. For children over 12 years old, ADT type of passenger must be chosen.	LEAVEY/MAGGIE MISS***C10** or -LEAVEY/MAGGIE MISS***DOB** 02MAY12	**MAGGIE** - child's first name **LEAVEY** - child's last name **MISS** - child's title ***C10** - child's age ***DOB** 02MAY12 - child's date of birth
Infant (INF) - ONLY for passengers below 2 years old. For infants over 2 years old CHD type of passenger must be chosen. - Specific handling is required - check the respective routine here.	-I/LEAVEY/MICHAEL MSTR*01JUN21 **Separate SSR is mandatory:** **3INFT**/LEAVEY/MICHAEL MSTR/01JUN21-1.1	**-I** - entry for name element **LEAVEY** - infant's last name **MICHAEL** - infant's first name **MSTR** - infant's title ***01JUN21** - infant's date of birth

Step 20

Solution — Parent step: 5

Galileo - add name element (INF/CHD/ADT):

Name elements' format for INF/CHD/ADT:

PAX type	Name element command	Command explanation
Adult (ADT)	**N.**LEAVEY/PATRICK MR	**N.** - entry for name element **LEAVEY** - adult's last name **PATRICK** - adult's first name **MR** - adult's title

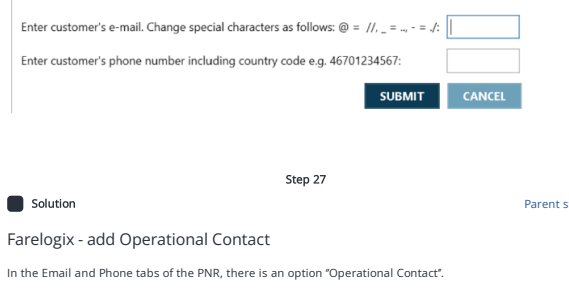
Follow the instructions on the format and insert needed details and click on the **Submit** button.



Enter customer's e-mail. Change special characters as follows: @ = //, _ = .., - = ./:

Enter customer's phone number including country code e.g. 46701234567:

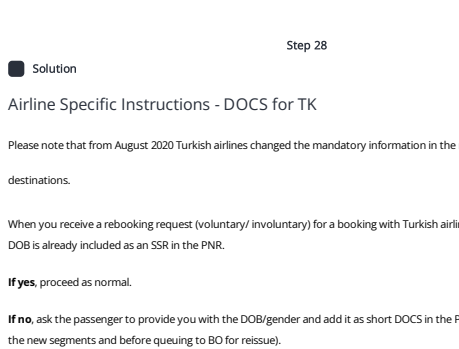
Step 27

Solution — Parent step: 7

Farelogix - add Operational Contact

In the Email and Phone tabs of the PNR, there is an option "Operational Contact".

Make sure to tick this box so the contact details will appear as SSR lines to the airline.



Step 28

Solution — Parent step: 7

Airline Specific Instructions - DOCS for TK

Please note that from August 2020 Turkish airlines changed the mandatory information in the reservations for all the destinations.

When you receive a rebooking request (voluntary/ involuntary) for a booking with Turkish airlines you need to check if the DOB is already included as an SSR in the PNR.

If yes, proceed as normal.

If no, ask the passenger to provide you with the DOB/gender and add it as short DOCS in the PNR (after having confirmed the new segments and before queuing to BO for reissue).

The reason behind this action is that BO cannot reissue the tickets if short DOCS are missing.

For new orders, our website is updated and the DOB is now requested for TK bookings.
