

What a schedule change register errand should contain

- Write a short and clear errand note.
- Which PNR is affected? For VI, add the list with all the PNRs.
- What type of SC is it?
 - Which alternatives were provided (e.g., informed on rebooking for the 25th and full cancellation)?
 - Which actions were taken (checked the SC policy guide and found alternatives, email sent, etc.)?
- If there are no SC alternatives and we provide FM, we need to add what options were provided.
- Do not use abbreviations in errand notes if you are not 100% sure your colleagues will understand them.
- Is there a misconnection (MCT) between the segments? If yes, and the customer decides to proceed with involuntary cancellation, when you modify the order, please make sure to copy the error message from the GDS showing the misconnection message within the errand to SL.
- Conversation ID: *(in case of incoming interaction)*
 - In case of EALP (ex. OTRS), do not forget to mention the ID number of the message/EALP ticket number.
- Received from/Passenger name *(in case of incoming interaction)*
 - When the customer has confirmed to the previous agent to proceed without contacting him again, please note that you should write in the order section confirmed by: "previous contact."

Register errand templates for SC scenarios:

There are several ways to register an errand in the Edvin order. For certain scenarios, there are templates added to the Register Errand pop-out that can be used with ease. To locate them, click "*First Line - Schedule Change*" and then the "*Template*" button:

All the templates will require different fields to be used. Do not forget that the template should be changed/modified based on the sc case.

SC register errand description:

Please find below the scenarios for SC register errand flow. Note that they might be used differently depending on the task, but to be viewed as a general overview and explanation:

Common errand Channels for Schedule change teams

Task	Channel	Description
Queues agent	15: SC/FM Edvin queues	When the agent works on manual SC handling queues and need to notify the passenger about new SC
	46: SC/FM Other queues	When the agent works on manual SC handling queues (EALP, Portals, etc.) and need to notify the passenger about new SC
Calls agent	34: SC Phone in	When the agent receives a SC call from a passenger.
Email agent	35: SC Mail In	When the agent receives a SC email from a passenger.
SC Support agent/ PLs agent	36: SC Frontend in progress	When the agent works in SC support, airline's email (etrack) or payment links task and the case has not been solved.
	37: SC Frontend finalized	When the agent works in SC support, airline's email (etrack) and the case solved/finalized, removing the case from support queue
	38: SC Frontend Payment Link	When the agent works on SC PL queues and finalizes the request, removing the payment link from queue
Chat	39: SC Chat	When the agent receives a SC interaction from a passenger via chat.

Common errand Actions for Schedule change teams

Below, you can see how to use the different errand types most common for the SC teams.

	Coordinator/TL - Possible RL	12 : Infnd refund processed	Pax requested cxnl, reservation already cancelled and the refund has already been processed
		13 : Infnd refund pending	Pax requested cxnl, reservation already cancelled and we infnd PAX that refund is still pending
	2: We have inf. about SC	1: SC - Information provided	1st email sent to the customer with valid alt. or reply to pax query confirmation, for Minor and trivial where we send a notification to the customers. (Non-VI orders)
		2: FM - Information provided	1st email sent to the customer with the FM alt (open tkt, voucher)
		4: No change made / Pax declined	After we informed about SC, pax decline to make changes.
		5: Change made	After we informed about SC, pax revert to confirm the alternative, so agent reissue/place on tkt Q.
		6: Cxnl, sent for refund	After we informed about SC, pax request refund, so agent place it on refund Q/or refund the ticket (for FLX, LCC before modify the order)
		7: Send to support queue	After we informed about SC, pax revert to confirm the alternative/refund, but a waiver is required from the YY. Agent place it on support
		8: Already on support	After we informed about SC, pax revert to check the status of his request, but waiver required and the PNR is already on a support queue i.e. awaiting supplier response
		9: Referring to airline	After we informed about SC, agent needs to redirect the customer to the airline or customer desire to ctc YY
		10: No SC on the file	Notification regarding SC received from the airline, but the file do not contain a SC
		11: Past dated	Past dated PNRs, where pax has not contacted us and we missed to inform him on time
12: LCC claim done		SC Agent claimed the LCC order, and placed it on refund dash via modify button.	
13: EMDs due to invl		To be used when ONLY a refund of EMD required (either to us or to customer, based on the modify reason) (Not to be used for Double Errand action)	
14: Escalated to Coordinator/TL - Possible RL		SC Agent send cases to Team Leaders/Coordinator for further investigation during retail loss process.	
4 :Call transfer/Cal lback (SOD/TL/M anager)	1: Pax requested call transfer/callback	PAX requested to speak with SV for cancellation issue/complaint	
	2: Already escalated	PAX requested to speak with SV for cancellation issue/complaint while case is already escalated	
	5: Against Connection Guarantee	1: SC - Information Provided	VI: 1st email sent to the customer with the SC alt. for VI orders with Connection Guarantee. Also, when agent reply to pax query and resolved their issue
		2: FM - Information Provided	VI: 1st email sent with the FM alt. for VI orders with Connection Guarantee. Also, when agent reply to pax query and resolved their issue no matter if the connection guarantee is applicable or not.
		3: Minor SC - No change made	VI: SC with less than 30 minutes VI orders
		4: Change made	VI: After we informed about SC, pax revert to confirm the alternative, so we reissue/place on tkt Q.
		5: No change made / Pax declined	VI: After we informed about SC, pax decline to make changes.
		6: New tkt sell	VI: VI orders with Connection Guarantee, when agents need to offer a new ticket sell or new tkt as our charge
		7: Send PL/email	VI: After we informed about SC, pax revert to ask for another alternative and we need to charge our fee
		8: Cxnl, sent for refund	VI: After we informed about SC, pax revert to ask for refund. Agent refund or modify the order and place it on SL
		9: Send to support	VI: After we informed about SC, pax revert to confirm the alternative/refund, but a waiver is required from the YY. Agent place it on support
		10: Already on support	VI: After we informed about SC, pax revert to check the status of his request, but waiver required and the PNR is already on a support queue i.e. awaiting supplier response
11: No SC on the file		VI: Notification for SC received, but the file do not contain a SC	
12: Past dated		VI: Past dated orders, where pax has not contacted us	
6:Already handled SC		1. Already handled SC	SC case was already handled but discovered in the SC queue.
	2. Already actioned by the airline	SC case was already handled by the airline and discovered in the SC queue (for exchanged tickets after a schedule change)	
	3. Information Provided	SC case already handled, discovered in SC Phone task.	
	4. Removed from Dashboard	SC case already handled, discovered in SC Payment Link task	
	5. Removed from support queue	SC case already handled, discovered in SC Support	
	6. Already on dashboard/queue	SC case already on monthly queue, discovered in SC Support	
	7. Escalated to SL	To be used as a second errand flow after modifying the order or refunding the EMD after reissue due to SC, in-order to escalate the case to BO	
	7: Incorrect department SC	1. Interaction transferred to B.com queue	SC case discovered in SC Chat, SC Phone or SC Mail task, but should be in another department/team for Bcom customer
		2. Removed from Dashboard/Queue	SC case discovered in SC Support task, but should be in another department/team
		3: Interaction transferred to VI queue	SC case discovered in SC Chat, SC Phone or SC Mail task, but agent not trained to handle VI and has to transfer interaction to VI trained agent.
	10. Escalation from other department	1: Case reviewed	SC agent use this errand when he review the case that has been escalated from SL and add all the requested information for the SL to proceed with claim or refund
