

Effective Tuesday 17th of May 2022, automation will go live for **Amadeus PNRs and specific carriers** where segments will get automatically removed and the necessary ghost line will be added to the PNR.

The usage of the automation will change the cancellation process slightly, in the following way:
After the customer has confirmed the cancellation, we should always **run the Cancellation Wizard first** (using the Modify Order button) and **then cancel the segments in the GDS and add the ghost line**.

The Cancellation Wizard itself has been modified so that the following two checkboxes that appeared on the last page:

- ☐ Added ghost line in GDS
- ☐ Cancelled segments in GDS

will only appear if the segments need to be removed and the ghost line is to be added **manually**.

Note: If the two above checkboxes are missing, then the segments will be removed by the system and the ghost line will be added **automatically** as well.

See the two below examples:

1. Manual handling of segments/ghost line

Modify order - Confirm

Please confirm that the following tasks have been completed before proceeding with the refund:

☐ Added ghost line in GDS

☐ Closed all open cases in Etrack

☐ Cancelled segments in GDS

Checkboxes appear, so segments need to be removed and ghostline needs to be added manually

This refund case will have a fee of **61.00 EUR**

☐ I have informed the customer about the refund fee

2. Automatic handling of segments/ghost line

Modify order - Confirm

Please confirm that the following tasks have been completed before proceeding with the refund:

☐ Closed all open cases in Etrack

*Checkboxes are missing;
segments will be removed
automatically and ghost line
will be added by the system*

This refund case will have a fee of **61.00 EUR**

☐ I have informed the customer about the refund fee

The following flow map has been created to visualize the process:
