Question

What is EMD?

An Electronic Miscellaneous Document (EMD) is an electronic non-flight document that may be issued and used for the collection and settlement of optional services offered by an airline.

There are two types of EMDs:

Stand-alone EMD (EMD-S)

Used independent of an e-ticket for services such as ground transportation, deposits and residual value.

Associated EMD (EMD-A)

Linked to an electronic ticket (ET) at the coupon level. Multiple EMDAs can exist for a single ticket. An EMDA coupon is considered used once its associated flight coupon is used.

Baggage or seat upgrades are more likely to be issued on an EMDA, but whether a service is issued on an EMDA or EMDS depends on the individual airline.

In which scenario we might need to issue EMD?

These services are also referred to as ancillary services and include such options as preferred seating, baggage, and deposits.

Systems we issue EMD and responsibility to re-associate them.

Step 10

Step 4

 Solution

Parent step: 2

Amadeus: How to display an old EMD record

Steps to display an old (original) EMD record for a reissued EMD.

Note: For a reissued (exchanged) EMD, you can display the old (original) EMD record from the new EMD:

1. Display the new EMD record with EWD entry.
2. To display the original EMD record, enter: EWD/O*

Entry **Description****EWD** Transaction code**/O*** Slash, indicator for original EMD record (O), asterisk (*)

Step 5

 Solution

Parent step: 2

Amadeus: How to display and read the EMD record history

Steps to display the EMD record history and the explanation of the display. You can display EMD record history from a retrieved PNR or without a retrieved PNR (for example, by EMD document number).

From a retrieved PNR

1. Display the EMD record with EWD entry from a retrieved PNR.
2. To display the EMD record history , enter: EWH

By EMD document number: EWH/EMDXXX-1234567890

Entry	Description
-------	-------------

EWB	Transaction code
-----	------------------

/EMD	Slash, EMD document number identifier
------	---------------------------------------

XXX	Three-digit airline code
-----	--------------------------

-1234567890	Dash, 10-digit document number
-------------	--------------------------------

The EMD record history is ordered by coupon number and shows the changes in coupon status in chronological order for each coupon, with the most recent status at the top of the display.

When the EMD is a conjunction document, the first document is shown with the coupon numbers 1 to 4. This is repeated in exactly the same way, showing the second document number with the applicable coupons, and so on.

Example of an EMD record history display:

Amadeus: How to check that EMD record is associated with ticket

After a ticket is reissued, if an EMD was linked to the ticket, check if the EMD coupons are still associated with the ticket.

1. Display the EMD. Enter, for example:
EWD/L9

2. If the ICW (Issued in connection with) line displays an (A), no action is needed on your side.

```

To be able to re-associate, you must check that:

- The ticket coupon status is O (Open) or A (Airport Control).
- The EMD and ticket routing follow the same order.
- The EMD and ticket origin and destination are the same.
- The EMD and ticket operating carrier is the same.
- The EMD validating carrier has an interline agreement with the ticket validating carrier.
- There is no fare difference for the EMD for the new ticket.
