Office: DZ53 Queue: 460 Connected with Edvin Workmode.				

Step 3

Solution

Parent step: 1

SC Process for queue placement from SC to SL (Ticketing & Claim, Payouts)

Reissue (Ticketing Q)

Template in Edvin for registered errands are required for GDS systems only.

In case you use the rebooking wizard to place a GDS booking for reissue, then add the information for Farelogix, Portal and LCC under **"Information to Frontline"**

Amadeus	Rebooking Wizard <i>outside of the workmode</i> Create rebooking case <i>inside the workmode</i>
Galileo	Rebooking Wizard

Save the seats (HK) and then place on queue via GDS.
Follow smartkeys in Sabre - SC Smartflow Endo text.

For more information on how **Sabre Involuntary script is working, please click here**

Register errands by using the [Rebooking Wizard](#) if the ticket(s) reissued by Sabre Script.

Important : Check which queue the PNR falls into.

* If the PNR is displayed in **Q182** then the ticketing team will handle it. So, in rebooking wizard at the last step, select **"No further action needed"**, as ticketing team will pick up the PNR from the Sabre queue for re-issuance.

Actions applied to all GDS piers ▼

☐ Send to Ticketing

Mark as urgent

☐ Send to support

Select queue

☒ No further action needed

Only errand notes will be added

Sabre
