Step 5

Question

Parent step: 1

Cancellation/ Refund

You can no longer retrieve the ticket as soon as it has been used or refunded.

To clarify how long a reservation is viewable on as.com if it has been fully flown (i.e. in USED status). For fully flown, the purge date will be set to the calendar date of the last flown flight. The PNR will still be viewable however for up to 72 hours after that. The information that we show on our Manage/ViewPNR page is very minimal though. They basically just show the name and a message in the flight section. They don't even show the price anymore of the ticket.

In the case where the itinerary was canceled and refunded, the reservation will no longer be accessible and will display the below message if one tries to retrieve it again.

 The confirmation code has been not entered, fully used, or partially used. For options contact Alaska Airlines Reservations call center at 1-800-ALASKA AIR (1-800-252-7522).

Manage reservation

To view your trip details, change dates, change dates or times for an existing reservation, or to cancel a current reservation, use your confirmation code. To apply the value of an unused ticket towards a new reservation, use your e-ticket number.

2. Deadline Check
 - Verify if there are any specific deadlines associated with processing this refund.
 - If yes, and it is close to the deadline as per airline policy, or SSR, or guide (*within 4 hours of the deadline*), then the agent should **prioritize the refund and manually handle the refund.**
 - If no deadlines are indicated, proceed with the following steps:
3. Handling Based on Original Travel Time:
 - If Original Travel is **More than 4 Hours:**
 1. Update the Modify button accordingly, allowing SL to assume the case.
 2. Ensure any applicable waiver codes are documented clearly in the errands.
 - If Original Travel is **Within or Less than 4 Hours:**
 - Follow the manual handling refund routine and handle it.
