Ancillary issues

Whenever there is an ancillary issue we shall follow the below procedure:

A bulk note will be added to the order explaining the issue as example below:

Created	Department	Title	Note
2024-03-14 08:41 System Internal	N/A	TF cabin baggage Issue(JA,DE,SY,Y4)	Please note that we have found out an issue where we have charged the customers for roundtrip price of Cabin baggage, but have only added the Cabin Baggage for the Outbound sector only. Please advise customers to send us the receipt if they purchased a Cabin Baggage at the airport. Show less

Please follow any instructions mentioned on the bulk note

The handling for ETG & B.com orders will be the same.

The fulfillment team will try to fulfill any missing ancillaries, however for the orders they couldn't add the ancillary, depending on the scenario, a bulk email will be sent to customers to notify them that they will have to add the ancillary with the airline and send us the receipt.

As soon as the customer fills out the form, a new case will be created in etrack connected to the inbox "Other receipts"

The dedicated agent will review the receipt, authorize the cost and escalate the case to the Payout team through the etrack form.

If a customer calls, verify that the order includes the errand note and the bulk email has been sent too. If not, then the order has not been affected by the described issue.
