Step 2

Solution

Parent step: 1

Who is MoR?

What is MoR?

Merchant of record (MoR) is the legal entity who sells the goods/services to an end customer and takes the liability of the transaction.

For phase 0 orders, ETG is always MoR, both primary order payments and post-sale purchases. Therefore in the *Payment transactions* tab in Edvin:

For transactions where ETG is MoR, standard PSP transaction will appear and you will see respective PSP logo:

Applicable fees

Below rules apply for service fee charges in B.com phase 0 orders, regardless the date of order creation:

	Phase 0
<i>Involuntary fee (FM/SC rebooking and refund scenarios)</i>	NO
<i>Respective service fee (all other scenarios)</i>	YES
<i>Ancillary Markup</i>	<i>For all types of add-on products (regardless of whether it is LCC or GDS) we should follow the same policy as for ETG customers</i>

Communication with the customer

B.com phase 0 orders end up on standard ETG queues. Therefore they shall be handled in language applicable for ETG orders in this particular market, within ETG SLAs and with usage of ETG templates as per standard ETG processes.

Exception: Since B.com phase 0 orders are also exempted from involuntary service fees, whenever you are handling an involuntary case and you need to send an email to the customer, standard ETG template shall be used and updated accordingly, by removing any parts related to our service fee.
