9. ✓ Flybillet - New logo
10. ✓ Part 5 of Site kill
11. ✓ Part 6 of Site kill

Step 1 - Starting point

Question

No linked steps

The scope of this project is to compress all of our brands in our 3 main ones: **MyTrip, GoToGate, FLightNetwork** in order to make our marketability less complex. This will happen via:

- migrating all content from old brands->new brands in phases/batches
 1. steering sales from old brands->new brands
 2. taking old brands off Metas and taking new brands on Metas
 3. applying redirect solution from old brands->new brands
- site kill pilots (2 pilots first, the rest will be business as usual, streamlined by the process we define now)

Scope:

- ☐ Reduce all of our brands to our 3 main ones.
- ☐ Smoothly close down old brands while steering sales and traffic to MT, GTG and FN.

Brand reduction

1. CS Impact

Step 2

Step 2

Question

Parent step: 1

So far there have been several actions that require the collaboration and alignment of many stakeholders of different departments, however some of those that affect CS are: **a)** Vouchers transition and **b)** site kill.

Please note that payment links do not work when a site is killed. Customers can only pay via MOTO payment.

Step 10

9. Part 6 of Site kill

Step 11

Step 3

Solution

[Parent step: 2](#)

Voucher transition

As you have already been informed in previous blog posts, all vouchers that have been created for the below sites have been transferred to the new sites.

<i>Old site</i>	<i>New site</i>
travelpartner_se	se.mytrip.com
flygvaruhuset_se	se.mytrip.com
travelfinder_se	se.mytrip.com
budget_se	se.mytrip.com
travelpartner_fi	fi.mytrip.com
flyfar_au_en	flightnetwork.com.au
pamediakopes_gr	gr.mytrip.com
pamediakopes_cy_en	cy.mytrip.com
avion_ro	ro.mytrip.com

If a customer visits one of the above old sites with the organic flow*, the below image displays on his/her screen and he/she will be automatically transferred to the new sites:

Webbplatsen har flyttat!

Vänta en stund. Vi letar efter det bästa erbjudandet och dirigerar nu om dig till vår nya webbplats.

* **Organic flow** = The results that you are getting using the Google search or when you are typing the URL of the corresponding site.

Step 4

Solution

Parent step: 2

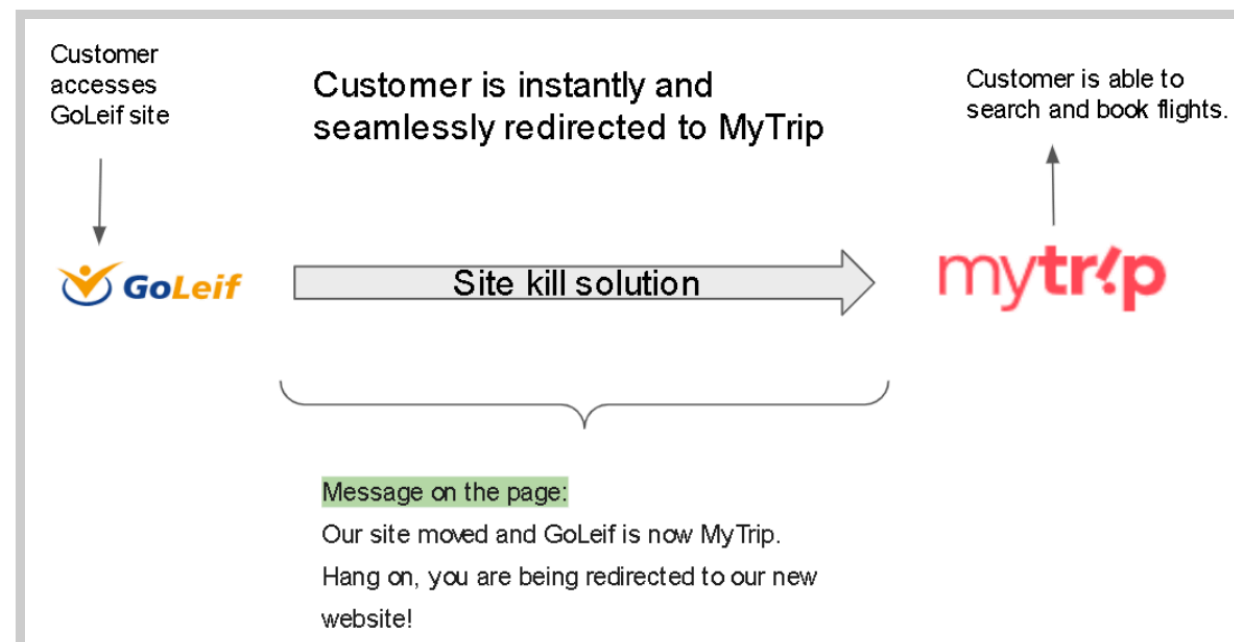

Site kill

For the first pilot, we will permanently redirect our customers from <https://www.goleif.dk/> to <https://dk.mytrip.com/>. This endeavor will take place on **November 8th**.

That means the customer trying to access directly to <https://www.goleif.dk/>, he/she will be redirected to <https://dk.mytrip.com/> to book the flight.

On the screen, he/she will see the message showing:

Our site moved and [Old Website name] is now [New Website Name]

Agent and order level for site kill:

- In Edvin the current GoLeif templates will be swapped with the MyTrip ones on site kill date **[Nov 8th]**--> Therefore, from site kill date onwards, the templates will only be available for MyTrip.
- If a customer has an old email from us with an old link belonging to <https://www.goleif.dk/>, once the customers presses it - they will be directed to <https://dk.mytrip.com/>
- Same goes for old SMS containing links previously pointing to <https://www.goleif.dk/>
- If a customer wants to download the receipt for a past flight it will not be possible at this point.
- A bulk email has been sent to customers with an active booking to be aware of the site kill. Please find below the template.

2022-11-03 14:09 Theodora Kanellopoulou Athens	Process Team	13: Mail Out / 11: No booking - site support	1: Site/booking support / 1: Info provided Bulk email sent due to brand reduction
2022-11-03 14:09 System Internal		Bulk for customers with pending Refund 1 week	Email sent to rosamarie@youmail.dk Reply type: No-reply 25 more lines ☺

Since the volume of the active bookings on the Goleif.dk is very low, it is not expected the volume of incoming calls to be increased.

Step 5

 Solution

Parent step: 2

Part 2 of the Site kill

Moving forward on the Brand Reduction project, the 2nd site kill will be held on the 13th of December for the below sites:

Brand	Market
Goleif	
Budget	
Flyfar	
Flygvaruhuset	
Travelpartner_SE	
Travelpartner_FI	
Avion	

That means, that the above sites will be permanently closed and no further bookings will be created from these websites.

Find below to which brands the sites have been redirected:

BUDJET_SE MyTrip

FLYFAR_AU_EN FlightNetwork

FLYGVARUHUSET_SE, —> Mytrip

TRAVELPARTNER_FI, Mytrip

TRAVELPARTNER_SE, Mytrip

AVION_RO Mytrip

Actions:

- - As we wanted to minimize as much as we can any harmful impact to the CS Organization, all the customer requests originating from the above sites have been processed.
 - A bulk email has been sent to customers with the below parameters:
 - a. Active refund request
 - b. The active voucher that has not been yet used by the customer.
 - c. Future travel date

Restriction:

Customers will not be able to manage/find their booking through MyPortal after the site kill. However, please reassure them that the orders have not been affected by this transition.

Step 6

Solution

Parent step: 2

RU Sites

Due to the sanctions present in the Russian market, it was imperative to migrate the below 3 RU sites.

You can find below with which site they have been redirected to:

- uz-ru.trip.ru ----> uz.Mytrip.com
- ru.trip.ru --> ru.Gotogate.com
- by.trip.ru----> by.Mytrip.com

The following is an example of the text that will be displayed on customers' screens if they try to access directly on the above sites:

Afterward, the customers will be able to see [this](#) on the page. These actions took place on December 13.

Step 7

Solution

Parent step: 2

Part 3 of the Site Kill

Continuing the endeavor to permanently close more brands due to Brand Reduction Project, on **January 25th** the next batch of site kill will be the following.

Below you can find the table with the websites that will be permanently closed as well as the corresponding new sites that will be launched on these markets, instead:

Old site to shut down	New site
Pamediakopes_gr	gr.Mytrip
Pamediakopes_cy_en	cy.Mytrip
FlyFar_ca_en	FlightNetwork
FlyFar_ca_fr	fr.FlightNetwork
Travelpartner_no	no.Mytrip
Supersaver_ru	ru.Gotogate

To minimize any harmful impact to CS as much as we can, we have taken the below actions:

1. We have prioritized customers on the above brands who have open requests in the Support queues in Edvin.
2. Bulk emails have been sent to customers with the below criteria:

2023-01-24 10:54 Theodora Kanellopoulou Athens	Process Team	13: Mail Out / 11: No booking - site support	1: Site/booking support / 1: Info provided Bulk email sent due to Brand Reduction project.
2023-01-24 10:54 System Internal		Bulk Voucher // flyfar_ca_en	Email sent to [REDACTED] Reply type: No-reply 27 more lines

- Active pending refund request

- Open ticket/ Vouchers that have not been yet used.*

- Orders with a future travel date

* A different template will be created for customers who have purchased the CXL Guarantee product and the voucher has not been yet used. Bulks emails for those customers are supposed to be sent on *27th of January*.

3. As soon as the site kill takes place, the CXL guarantee vouchers that have already been created but have not been used yet by the customers will be transferred to the New sites, so the customers will be able to book a new reservation.

4. A bulk email for RU sites uz-ru.trip.ru , ru.trip.ru , by.trip.ru which have been migrated on 13th of December will be sent until *27th of January*.

Restrictions

1. Customers will not be able to manage/find their booking through MyPortal after the site kill. However, please reassure them that the orders have not been affected by this transition.
2. If a customer wants to download the receipt for a past flight, it won't be possible on the new site.
3. There was an issue with the certificate of **Supersaver_ru** because it expired and couldn't be renewed. Consequently, customers couldn't access the Supersaver_ru site at all for the last few days.

This issue will be resolved on the 25th of January when the Supesaver_ru will be redirected to the **Gotogate_ru**.

Step 8

Solution

Parent step: 2

Part 4 of site kill

It is imperative to close the [Trip.kz](#) website permanently on Friday, **April 28** due to some market policy changes. Provided we are not able to shut down the site on Friday, customers may not be able to access it on May 1.

Therefore, from April 28 customers will be redirected to [Mytrip](#).

Site kill actions-wise, we followed the same approach as we did it on the previous RU site kill batch.

Bulk emails have been sent to customers who have:

- Active refund requests
- Orders with a future travel date

Please note that based on the data received, there were no orders with unused CXL guarantee vouchers for April 2022-2023.

Restrictions

1. Customers will not be able to manage/find their booking through MyPortal after the site kill. However, please reassure them that the orders have not been affected by this transition.
2. If a customer wants to download the receipt for a past flight, it won't be possible on the new site.

Step 9

Solution

Parent step: 2

Flybillet - New logo

On May 15, the [Flybillet](#) is launched with a new logo. It will become **Flybillet Powered by Gotogate**.

The relevant "**About us**" page has been updated and actions will also to be taken to promote the Gotogate app to Flybilet customers.

Please find the scripts below in EN and DK language in case you receive a question from customers about the new logo. Keep in mind that scripts have not been added in Genesys.

[EN script](#)

We recently rebranded Flybillet which is now powered by Gotogate. If you have seen our new logo on our website or in our communication, no need to worry: this change won't affect your booking in any way.

Quite the opposite, now all Flybillet customers can take advantage of the Gotogate App that offers free automatic check-ins and exclusive deals. If you haven't done it yet, you can download the Gotogate App from Google Play or the App Store by following the link you find on our homepage. You can add your existing trips to the Gotogate App with your order number or book your next flight directly from there.

You can find more information on the rebranding on the About Us Page of Flybillet.

[DK script](#)

Vi har for nylig omdøbt Flybillet, der nu er drevet af Gotogate. Hvis du har set vores nye logo på vores hjemmeside eller i vores kommunikation, behøver du ikke bekymre dig: denne ændring vil ikke påvirke din booking på nogen måde.

Tværtimod kan nu alle Flybillet kunder drage fordel af Gotogate-appen, der tilbyder gratis automatisk check-in og eksklusive tilbud. Hvis du endnu ikke har gjort det, kan du downloade Gotogate-appen fra Google Play eller App Store ved at følge linket, du finder på vores hjemmeside. Du kan tilføje dine eksisterende rejser til Gotogate-appen med dit ordrenummer eller booke din næste flyrejse direkte derfra.

Du kan finde mere information om omdøbningen på Flybillet's Om Os side.

Step 10

Solution

[Parent step: 2](#)

Part 5 of Site kill

MyTrip_in will need to be shut down due to naming/copyright infringement with another brand currently existing in India. Therefore, it was decided to redirect the MyTrip_in to [FlightNetwork in](#) on **August 22, 2023**.

In order to minimize any harmful impact to CS, we followed the same plan/actions as the previous site kills. These are the following:

1. We have prioritized customers on MyTrip_in who have open requests in the Support queues in Edwin.
2. Bulk emails have been sent to customers with the below criteria:
 - Active refund request
 - Orders with a future travel date
 - Open tickets/orders with vouchers (CXL guarantee not included)

Orders with the CXL Guarantee vouchers * (a different template has been created and sent to customers who have not used the voucher yet):

	2023-08-18 08:37 Theodora Kanellopoulou Athens	Process Team	13: Mail Out / 11: No booking - site support	1: Site/booking support / 1: Info provided Bulk email sent due to brand reduction
	2023-08-18 08:38 System Internal		Refund MyTrip.in	Email sent to  Reply type: No-reply

3. Cancellation guarantee vouchers are being transferred to the new site, so the customers will be able to use them. At least for those where the tool can transfer them.

Restrictions:

- As per previous site kills, customers cannot manage their booking through Myportal. However, we have guided the customers with the future travel date to download the app as only this category of customers can find the details of the trip.
- Downloading the receipt for the past flight won't be possible. Customers with a future date of travel should download the receipts before the MyTrip_in closes.

Step 11

Solution

Parent step: 2

Part 6 of Site kill

Continuing the endeavor to permanently close sites due to the Brand Reduction Project, **on October 31st, Pamediakopes_cy_gr** which is the last site of Pamediakopes Brand will be shut down and transferred to [Mytrip](#).

As per previous site kills, we have categorized customers per requests such as refunds, open tickets, and sent bulk emails (no orders found with future travel date):

2023-10-25 09:08	Process Team	13: Mail Out / 11: No booking - site support	1: Site/booking support / 1: Info provided Bulk email sent due to Brand Reduction project
2023-10-25 09:08 System Internal		Refund CY	Email sent to  Reply type: No-reply 46 more lines 

We also checked the Edvin and WNS queues to prioritize requests from these customers, however no active request was found.

Cancellation guarantee vouchers that have been issued but not yet used have been moved to the new site, so the customers will be able to book an order by using the CXL Guarantee voucher.

Restrictions:

- Customers will not be able to manage/find their booking through MyPortal after the site kill. However, please reassure them that the orders have not been affected by this transition.
- If a customer wants to download the receipt for a past flight, it won't be possible on the new site.
