| 2. Use cases | Step 3 |
| 3. How is it shown in Genesys if the customer has interacted with Oriana? | Step 4 |

Step 2

Solution

Parent step: 1

Live on 18 August 2022

- Market: EN,US, UK,SE, NO,IT , DE, FR,NZ, ZA,PH, IN,CA, IL,AU,ES,PT,MX,AR,CL,CO,PE,UY,VE (gradually released)
- Name of the Bot: Oriana

When the customers log in to MYP/My Bookings and select the chat option they will first interact with the Chat Bot-Oriana who will try to understand the customers’ intent and attempt to provide an answer if that is available in MYP.

Use cases

Live: 08 Nov 2022

Oriana will show the options below for the customer to select:

1. Booking Details
2. Manage Trip
3. Business Receipt
4. Refund status
5. Extra Services
6. Query not listed above

7. Chat with an agent (this is available only if the customer has gone through the flow and keeps selecting that he/she needs assistance)

Booking Details:

The customer will be able to select one of the options below:

1. Itinerary - The customer is being redirected to MYP (itinerary section)
2. E-ticket info - The customer from this step can print or save the e-ticket through MYP
3. Booking confirmation - The customer from this step can print or save the booking confirmation

Manage Trip:

The customer will be able to select one of the options below:

1. Cancellation - Oriana is requesting more information regarding the cause of the CXL. If a SC/FM has occurred will transfer the chat to an agent, if the cancellation is voluntary then we inform the customer for our minimum fees and then ask if they want to proceed with the cancellation. If the customer wants to proceed then we transfer the chat to the agent.
2. Rebooking - Oriana is requesting more information regarding the cause of the change. If a SC/FM has occurred will transfer the chat to an agent, if the change is voluntary then we redirect the customer to the "Manage Trip" option in MYP and if they want to proceed then we transfer the chat to the agent.

Business receipt:

The customer will be able to create the business receipt on his own

Refund Status:

If the refund is pending then we redirect the customer to the refund tab

If the refund has been already processed then we inform the customer that the process has been completed

If the booking is still active then we trigger the cancellation flow as explained above.

Extra services:

The customer will be able to select one of the options below:

1. Baggage- The customer will be able to see the baggage allowance and/or add a baggage to the booking (redirected to the add-on page in MYP)
2. Add extra services- The customer will be able to add extra services from this section

Query is not listed above:

Here the customer will be able to type whatever they need and if the intent is identified then the respective flow will be triggered, otherwise the chat will be transferred to an agent.

Step 4

 Solution

Parent step: 1

How is it shown in Genesys if the customer has interacted with Oriana?

When the agent receives the chat interaction they will be able to check the communication that took place with Oriana before the transfer as per below:

Avinash sharma: i want to send email

Oriana: Click here to send the booking details/confirmation to your email.

Oriana: Did that help answer your question?

Avinash sharma: no

Oriana: Alright, to see what else I can help you with, or to chat with an agent, please select an option below:

Avinash sharma: Chat with an agent

Oriana: Alright.

Oriana: Please wait while I connect you to an agent for further assistance.
