Question

Parent step: 3

If we cannot locate the booking in Edwin:

- Add all possible details in the META sheet (customer's email used in the raised META query).
- Choose 'Not able to locate booking' as status.
- No reply to the META is needed from Etrack, close the Etrack with no reply.

Please note:

The below documents are shared with our META partners. We will need to keep the information in the sheets clean, and with no confidential information provided.

Gotogate: query: contact: solveiga.pakstaite@gmail.co Received: 23-03-2020 19:05:40

From: alba.badia@skyscanner.com
: cr.support@support.etraveli.com
CC: custservice@skyscanner.net
Subject: Gotogate: query: contact: solveiga.pakstaite@gmail.com

@ content.html

Hello,

I hope this email finds you well.

I've received a query from a customer who has had some difficulty getting in touch with you regarding a booking that was cancelled.

I've made sure to advise the customer that delays can be expected given the unprecedented volume of cases, but if you can look into this and get in touch with them to advise further, I'd really appreciate it.

Thank you again for all your efforts and support with these cases, it is very much appreciated.

Hope to hear from you soon.

Solveiga Pakstaite Today 04:46 solveiga.pakstaite@gmail.com

GoToGate booking ref: JYWMOQ
GoToGate case number: 42544027
Hi there,
Sorry that you're going through this horrible time and thanks for offering to help.
Due to government restrictions, I can no longer take this trip to Korea and Japan, leaving LHR 2 April. I have contacted GoToGate a two weeks ago by phone who told me that I need to get a refund authorisation from the airline, LOT. I called LOT and they said that GTG need to make this request internally, not me, the passenger. I have written to GTG on 11 March explaining this as the phone line wasn't working and haven't received a response.
I got an automated response with the case number 42544027.
Can you help?

We should always check **ONLY** the outbound date and insert it in the file:

Customer trip								
1: London – Seoul 2: Tokyo – London								
1 LHR – ICN								
	Flight	Dep	Date	Time	Arr	Date	Time	Reference
	LOT LO282	LHR	2020-04-02	10:15	WAW	2020-04-02	13:50	JYVWMOQ
	LOT LO97	WAW	2020-04-02	16:30	ICN	2020-04-03	09:10	JYVWMOQ
2 NRT – LHR								
	Flight	Dep	Date	Time	Arr	Date	Time	Reference
	LOT LO80	NRT	2020-04-19	10:15	WAW	2020-04-19	14:30	JYVWMOQ
	LOT LO279	WAW	2020-04-19	15:30	LHR	2020-04-19	17:20	JYVWMOQ

8. Go to [this spreadsheet](#).

IMPORTANT! Make sure you register the information in the correct meta tab:

Skyscanner
Aviasales
Wego

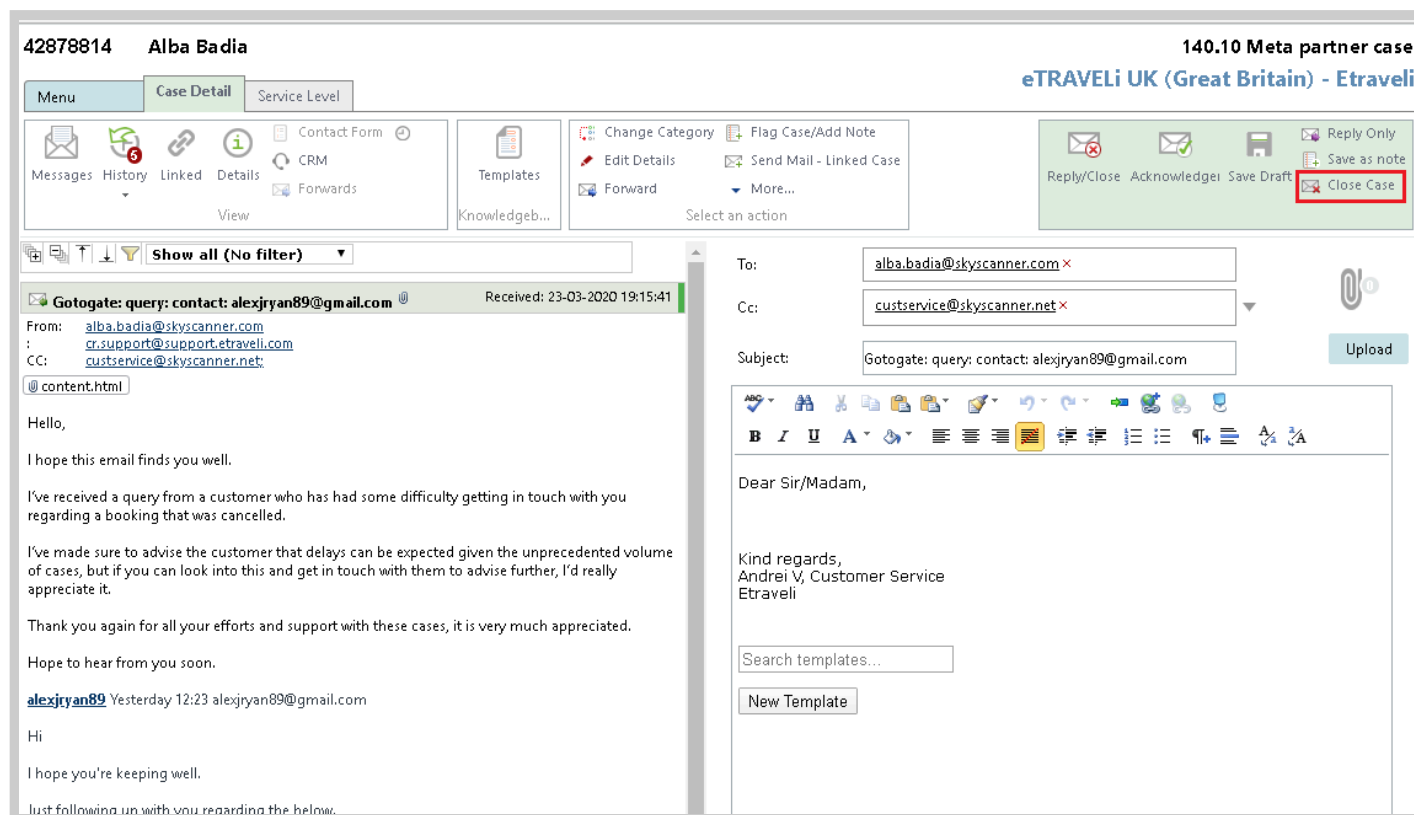

Fill in **ONLY** the yellow columns:

A	B	C	D	E	F	G	H	I	J	K	L
Track nmb	Skyscanner agent	Date	Order	Customer e-mail	Departure date	Request type	Office	Status	Last action	Agent	Summary

Etrack number and name of the meta agent are next to each other.

Date - the date of registration (e.g. 07-Apr).

9. When you've finished registering all the yellow columns, close the Etrack case:

Step 6

Solution

Parent step: 1

The file in which we work

First things first.

For this task, you will need [this file](#).

- **Why do we work in a Google spreadsheet?**

There are a few reasons for that:

1. We need to register all the handled Etrack requests from metas.
2. It's easy to keep an eye on the handling from a reporting perspective.
3. It's easy to follow up with pending cases.

- **Do meta partners have access to this file?**

Not exactly.

Metas can view all the registrations we are adding to the file, but they do not have access to this specific file. The way it works is, that we fill in the information in our file and we "live stream" it to a file of their own.

- **Can metas see the other metas' registrations?**

No, we "live stream" the tab of each partner to a different Google spreadsheet. This means that Skyscanner only sees the registrations of the tab "Skyscanner".

- **Can Metas see my name from the file?**

No, this tab is hidden in their files and they do not have access to make it visible.

Step 7

Solution

[Parent step: 4](#)

Skyscanner

- Review the query and take immediate action, contact the customer. If not possible to reach them via the phone, send an email via Etrack.
- Provide all the relevant information in the assigned Google sheet (different sheets per Meta). All META's will review the sheet to follow the case (apart from Skyscanner). Please do not use any abbreviations and do not provide Etrack numbers of the conversation with a passenger, or the sent requests to the airlines.
- When registering the information, select the correct status. For example, "Closed" when we helped the passenger and no further follow-up is required from our side, or "Waiting for escalation/passenger/airline reply" when the follow-up is required.
- When the case is handled and is "closed", insert "-" in the "Follow-up date" column.
- You must reply to Skyscanner via email.
- Update the Google sheet for every action made. All META's will review the sheet to follow any updates about an ongoing case (apart from Skyscanner).
- When you follow up on a case, insert your name in the "Agent" column, update the "Follow-up date" and when writing your comments in the summary section, please type "Follow-up" in front of your comment.
- Register the case in Edwin as: CR escalation. Add Etrack number of Meta request.
- Close all open cases in Etrack related to the customer/query - to prevent dupe emails.

Step 8

Solution

Parent step: 4

All other META

- Review the query and take immediate action, contact the customer. If not possible to reach them over the phone, send an email via Etrack.
- Provide all the relevant information in the assigned Google sheet (different sheets per Meta). All META's will review the sheet to follow the case (apart from Skyscanner). Please do not use any abbreviations and do not provide Etrack numbers of the conversation with a passenger or the sent requests to the airlines.
- When registering the information, select the correct status. For example, "Closed" when we helped the passenger and no further follow-up is required from our side, or "Waiting for escalation/passenger/airline reply" when the follow-up is required.
- When the case is handled and is "Closed", insert "-" in the "Follow-up date" column.
- No reply to the META is needed from Etrack, close the Etrack with no reply.
- Update the Google sheet for every action made. All META's will review the sheet to follow any updates about an ongoing case (apart from Skyscanner).
- When you follow up on a case, insert your name in the "Agent" column, update the "Follow-up date" and when writing your comments in the summary section, please type "Follow-up" in front of your comment.
- Register the case in Edwin as: CR escalation. Add Etrack number of Meta request.
- Close all open cases in e-track related to the customer/query - to prevent dupe emails.

Step 9

Solution

Parent step: 3

Skyscanner template

Dear 'Skyscanner agent name',

Kindly find a small summary of the case below:

xxxxxxx

We've contacted the customer with the following information:

xxxxxxxxx

We'll get back to you when the case has been resolved with the customer.

Additional information about Skyscanner:

- They always want us to contact the customer directly in regards to their query - and we cannot ask Skyscanner to pass on the information to the customer on their end.
- always provide a time frame. E.g., if a refund application has been sent, it may take up to 16 weeks for the airline to review it.
- Always want a small summary - not in detail, just a quick summary.
- Always want to know when the case is resolved with the customer, as Skyscanner will double-check this with the customer before closing the case on their end too.

Step 10

Solution

Parent step: 2

FAQ

We should register **ALL** the requests regardless of departure date.

 Image failed to load(https://wiki.etraveli.net/download/attachments/101745784/image2020-4-7_21-53-10.png?version=1&modificationDate=1586285590000&api=v2)

On which row should I start adding registrations?

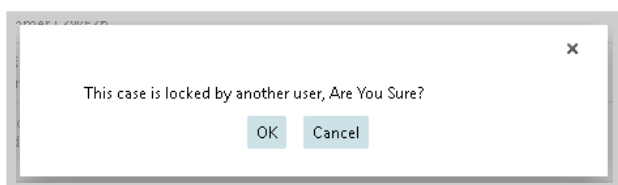

Start making your registrations at least 100 rows away from the existing ones to avoid congestion in the file.

I'll find it wherever it is and sort it accordingly.

Is it possible to work on the same email as someone else?

No.

When someone has already opened an email, any other person who tries to open it gets a pop-up notification:

What if I cannot find an order in Edvin with the information the meta sent us?

We register in the file just the information we have

In the "Request type" column select **Not possible to locate booking**.

What if I find multiple orders in the same email?

Sometimes the metas will send one email which includes many order numbers.

We should register each order number in separate rows with their own information.

What if I find an order that is not Skyscanner, Aviasales or Wego?

You should add it in the "Other" tab. Please also mention the name of Meta in the respective column.

What if I find a Panoramix order?

Panoramix is the old CRM of E-travel. If you search in Edvin with a PNR or an email address, you might get the below result:

Reference number
Customer First name (starts with)
Customer Last name (starts with)
AKO-mutations
Email (starts with) **schnorchelmon@yahoo.de**
Only Orders
Phone/cellphone (ends with)
Panoramix PIN
Ticket Number (starts with)

Register errand
Advanced search
Expedia reservation search
Pylon reservation view
Travelfusion reservation view

List of orders

No List of orders found

Matching customers not found in orders

No Customers not already found in orders.

Panoramix orders

PNR	PIN	Name	Order date	First departure date	Email	Phone	Country	Brand
BIPUZA	0916524416	Klaus Muskat	2019-05-15 09:58	2020-03-27	SCHNORCHELMONE@YAHOO.DE	+491602568883	DE	mytrip.com

1 order found for email **schnorchelmon@yahoo.de**

Panoramix search

Edvin is connected to Panoramix and will show us if an order belongs to the old CRM.

For such cases, register the email with the information you have and add in the Request type select **Panoramix**.

When you're done, as usual, **Close Case**.

Step 11

Solution

Parent step: 1

Step by Step Guide

1. Open file **CR Meta internal ATH/UPA**.

You will see that each case has all the necessary information, such as Etrack of Meta agent, date of departure, passenger email, order number, and the request type:

	A	B	C	D	E	F	G	H	I	J	K	L
1	Etrack	Meta agent	Date	Order	Market	Customer e-mail	Departure date	Request Type	Office	Status	First action date	Agent

2. Check all tabs for assigned cases. To use filters for a specific search, please create a new filter view so that your actions will not disturb the work of other agents who are simultaneously working on the same file:

	A	B	C	D	E	F	G	H	I	J	K	L
1	Etrack	Meta agent	Date	Order	Market	Customer e-mail	Departure date	Request Type	Office		Last action date	Agent

3. Start by opening assigned cases and reading Meta Etrack requests. Pay attention that Etrack number, order, and meta partner are referring to the same case.

Sometimes we receive emails from SKS regarding the orders booked through other Meta partners. If we come across such a case, we reply to Meta with the following text:

Dear partners,

Please note that this reservation has not been booked through your website.

Nevertheless, the customer's request has been forwarded to our team and will be handled accordingly.

Keep in mind that this request will not be reflected in the respective file.

Then add this case to the correct tab, handle it, and insert the comments in the summary section.

4. If you come across the case in the file where under the "Request type" column you will see "Not possible to locate the booking" please check the case anyway. Sometimes it is possible, you just need to read carefully. If you cannot locate the booking, then close the case and ask by writing in summary to provide information for the booking.

5. Handle the case accordingly. Contact the passenger with a solution to his request even if we have no written requests from him directly. If the case is on Support WNS or ATH or UPA, you handle it.

6. Add your comments in the "summary column". It should include a summary of the request and our provided solution.

Example: Customer asked for rebooking to the specific dates, using the service of a flexible ticket. Unfortunately, this service is not available after the departure date. Furthermore, there are no flights available for the dates that passengers selected nor any other closest dates. As the airline offers vouchers for future use, we provided the customer with information on how to apply for a voucher on the airline's website.

Please do not use any abbreviations when writing comments in the summary section such as pax, YY, non-ref, NFAT, etc. Do not provide Etrack numbers of our conversations with a passenger or our requests to the airlines.

All METAs will review the sheet to follow any updates about an ongoing case (apart from Skyscanner).

7. **Very important to highlight that when dealing with SKS cases you need to reply to the Etrack request directly to the Skyscanner agent.** In this case, the "Summary" column will be used only for internal use.

8. When done with a case, select an appropriate status reason.

Example: Select “Closed” when we helped the passenger and no further follow-up is required from our side, or “Waiting for escalation/passenger/airline reply” when the follow-up is required.

When we are waiting for the airline's reply, do not put it on support. We have agents who once or twice per week are checking follow-up cases. If the case is already on support, you should take over and handle it.

When you are handling follow-ups, there is a follow-up column to add data and a follow-up column for notes.

9. Register the case in Edwin as CR escalation. Add Etrack number of the Meta request and your errand notes.

When the case has been already handled and no action was taken by you, register an errand selecting the correct category and the type as so:

Register new errand

☐

Channel

8: CR escalations

☐

Category

39: Already Handled

☐

Type

1: Already Handled

☐

1: N/A

Order Note

123456 CR Meta case / |
Informed Meta that booking was already cancelled and
cancellation confirmation was sent to the passenger.

Templates

☒ Frontline ☐ Back Office

Register Errand

10. Check if there is any double previous communication for the same request in the file and close all duplicates. Add a comment in the summary column that this case was closed as a duplicate. Please note that if you try to use the command “CTRL+F” to search for a dupe case, it will not work if you are using a filter view with only your name selected.

11. Please add Slack room "**cr-meta-ops**". In this group, you may be asked to handle a case with priority or you can always ask for assistance if needed.

Step 12

Solution

Parent step: 1

Description of task

- What is FL Meta?**
FL Meta is a new task for Frontline where we handle requests sent from our meta partners Skyscanner, Aviasales, and Wego.

- **Which offices undertake this task?**

Currently only ATH and UPA.

- **Where do we receive these emails?**

We receive such emails in our Etrack mailbox 140.10 "CR Meta Partner case":

CR Meta Partner case	--?--
-------------------------	-------

- **Do I have access to this mailbox?**

Agents will be provided access to this mailbox only if they are to undertake this task.

- **Which emails should FL handle?**

The First line should handle all the emails with a PRIO (blue) flag:

☐	Status 	etrack1#	NextActionDue ▼
☐	 	42875249	08-10 13:54

- **Is there a Slackroom for this task?**

Yes, the Slackroom name is **#cr-meta-ops**. Also in this slack room, the Customer Relations Team could ask for the handling of cases with priority. CR agents need to check this Slack and handle these cases.
