**Step 1 - Starting point**

Question

No linked steps

In case customers with **BMS bookings call or Email** to ETG:

**Phone:**  
Register Errand with action: Sent to support and add as much information as possible from the customer in notes, together with the customer contact details. Inform the customer that you will redirect their request to the correct department and place on queue to **Support BMS** and choose one of the following queues depending on if the request is a Schedule Change or anything else:

Queue Place

| 5. SC handling WNS vs FN SC booking           | Step 4 |
| 6. Sites and Phone numbers                    | Step 5 |
| 7. Offline Sales                              | Step 2 |

**Step 2**

Solution

Parent step: 1

**Offline sales**

Offline Sales will only be available on:

| US | United States of America | FN | us-en.flightnetwork.com |  |
|----|--------------------------|----|-------------------------|--|
| US | United States of America | FF | us-en.flyfar.ca         |  |
| CA | Canada                   | FN | ca-en.flightnetwork.com |  |
| CA | Canada                   | FF | ca-en.flyfar.ca         |  |

These are the only brands/markets that will have the option to make a reservation over the phone in the IVR.

**Step 3**

Solution

Parent step: 1

**Galileo booking - QA**

If you as an agent who is not trained in Galileo receives a call from a customer with a Galileo pnr you should queue place this Edvin order to the Support BMS who will handle the pnr.

Insert clear notes in the order when queue placing on customer details and the request.

Numbers marked in green are today handled by WNS but will be changed to FN Avaya numbers as soon as we have enough trained staff. (Numbers are ready - just need to update on site) With the exemption of South Africa, here WNS has a local number that we will continue to use.

IVR set-up for all FN numbers in yellow above  
Recordings and IVR messages are decided and arranged from IT in UPA. All templates/verbiage is going to follow the current set-up used at ETG brand. For specific questions around IVR please contact [samuel.kling@etravelgroup.com](mailto:samuel.kling@etravelgroup.com)

**Step 6**

Solution

No linked steps

**OLD INFO: SC handling WNS vs FN SC booking**

**IF customer has a SC and calls WNS with FN SC booking**

WNS should gather as much information as possible from the customer, as well as contact person. Add Edvin notes and place on queue: ETG BOM Support - BMS SC (BMS SC files)

Any order placed on queue should be handled within 24h Mon-Fri.

**IF customer has a SC and calls FN with ETG SC booking**

- 1. Connect the call to: +44 2033650131 - Never to be given to a customer
- 2. Agent to place the booking on SC support queue AMADEUS: QE/STOSG38AA/57C2 || SABRE: QP/DZ53260/11

**Step 7**

Solution

Parent step: 1

**Instructions for not yet trained FN agents**

Agent will perform one of the following options:

- 1. Connect the call to a colleague that is trained in Edvin using personal extension
- 2. Connect the call to WNS:  
Number - +44 2079447526 - Never to be given to a customer
- 3. Place on support queue in GDS Amadeus 57C0 (STOSG38AA), Sabre 257 (DZ53) and LCC: use smartkey RFDm in Amadeus.

**Step 8**

Solution

Parent step: 1

**FN - Flow**

For all numbers stated in the list "Numbers go to" FN - the number will be in FN Avaya. This number will insert the following:

- 1. If the customer chose (in US+CA) "I want to make a reservation" - it is an agent at our BOM/PNQ office that will pick up the call at all times.
- 2. If the customer chose Change/Cancellations or other queries they will at all times be routed to an BOM/PNQ office agent.
- 3. If there is no agents available with Edvin skills - the call will automatically be routed to WNS.
- 4. All SC calls will be routed to WNS in the new IVR flow.

For all numbers stated in the list "Number goes to" WNS - we will use current WNS numbers until further notice.

**Step 9**

Solution

Parent step: 1

**Languages**

Spanish, German and French will be handled from WNS for all new bookings made through ETG platform.
