General process

UPDATE: Seating fulfillment (seating light/ map & besides) has started since on February 2023 for LCC carriers through Travelfusion and Tripstack.

Gordian is a new partner that will try to fulfill the bag and seats that could not be automatically issued by the system and they have fallen to our Manual queues.

In version 1, we will start with the luggage and only a few sites until we make sure everything goes as expected.

Target group : Gordian will undertake the fulfillment for the LCC carriers and VI bookings (GDS + LCC). **NDC carriers (portals) are excluded.**

Due to some restrictions, Gordian will fulfill the luggage for specific carriers either for GDS or for LCC.

With 21APR22 as an expected starting date, Gordian will fulfill the luggage for VI orders before ending up in the Manual queue in Edvin. If they fail, the order will be automatically placed in the Manual queue.

For pure LCC orders, fulfillment will be executed by Gordian if the system fails and can not issue the bag. If Gordian also fails, the order will be automatically placed in the Manual queue, at which point agents will take over.

Associated queues : "LCC Ancillary" and manual queues of VI. Those queues are handled by the SL.

- The SLA will be 3 hours. When the luggage is successfully completed, an indication appears in Edvin indicating for which PNR the luggage was added and for which segments.

IAH - SCL Sonza Dagoberto **1PC 15Kg: Gordian;AM27KE;UNGTKE**

- We do not send orders to Gordian where the departure is within 12 hours.

- Gordian does not send a confirmation email to customer.

- If the baggage is not added successfully, the order will be placed automatically on the Manual queue in Edvin, so the SL will either try to manually add the bag or will place it to the Refund Dashboard, so that the Payout team will process the refund to the customer. (only the baggage value)

Do not inform the customer that the baggage is added by an external Partner. This is something between us and Gordian and the customer is not aware of.

Step 7

Solution

Parent step: 2

Instructions

When a customer requests a cancellation and the luggage has been added by Gordian, you should keep in mind that Gordian is responsible for the baggage refund claim from carriers.

As soon as you run the Modify order, Gordian will be automatically notified for the cancellation and they will make the claim. This is **not** applicable for partially used tickets or for multi pnrs when the OB is flown because the status in Edvin is “**changed**” .

State	Changed , Cancel part of order
-------	--------------------------------

For these cases (with status changed) the claim is done by the SL agents (Claims team) directly on Gordian’s portal.

In version 1, we will not be able to see if we have received the refund for the baggage in the Refund Dashboard. This can be checked by the SL agents on Gordian’s portal.

When a cancellation is requested, **we as ETG will receive the refund for the air ticket and Gordian will receive the refund for the bag.**

Gordian will send us invoices two times per month with the cost and refunds specified per order.

Step 8

Solution

Parent step: 3

Involuntary cancellation

For SC cases and for any other refund where Connection Guarantee applies---> Run Modify order with cxi reason: **Connection Guarantee**. Follow the routine of Connection Guarantee that it is mentioned [here](#)

* SC agent is not responsible to check if the baggage is refundable or not.

For any other reason that the Connection Guarantee is not applicable, choose one of the corresponding cancellation reasons.

Step 9

Solution

Parent step: 3

Voluntary cancellation

If the customer wants to cancel one of the PNRs of the VI order, follow the below process:

For the GDS orders:

- Choose the corresponding cancellation reason in Modify order.
- When the whole order is canceled, Gordian will make the claim for the baggage even if it is a voluntary cancellation. Most likely, the airline will reject the claim as the ticket was cancelled voluntarily.
- The baggage is refundable depending on the cancellation reason. More info you can find [here](#)

For the LCC orders:

- Try to cancel the order on the airline's website. Always advise Edvin docs and Shelf if any exception applies. Otherwise, refer the customer to the airline.
- Nothing changes in the process, follow the regular routine.
- For voluntary cases, sometimes LCC carriers may also refund the value of the baggage. In this case, payout agents will refund whatever we receive from Gordian.

Step 10

Solution

Parent step: 4

Voluntary change - GDS

As the baggage has been added by Gordian, they will not be able to re-associate the baggage with the new ticket that will be reissued by us.

It has been noticed that the emd issued by Gordian is visible in the GDS. Please note that it may not be visible for all carriers.

```

> rttt

RP/ATHSG38SR/ATHSG38SR          SJ/GS  16MAR22/1603Z   OMS3X5
BTSSG38SR/9999WS/9FEB22
 53 FA PAX 996-9418590171/ETUX/USD47.40/09FEB22/TLVSG34AA/372003
    21/S3/P1
 54 FA PAX 996-9418590173/ETUX/USD47.40/09FEB22/TLVSG34AA/372003
    21/S3/P2
 55 FA PAX 996-4555718294/DTUX/USD30.00/16MAR22/PMIUX0100/784949
    05/P1/E17
> ewd/155
_UX EMD: NOT AUTHORISED

```

For the carriers that the emd is visible in GDS, follow the below steps:

- Check if the order includes the flexible ticket.
- If not, run the Rebooking wizard and leave a comment to the ticketing team in order to try to contact the airline and associate the emd. Don't guarantee to the customer that the bag emd will be transferred to the new ticket.
- If yes, we should always take the cost on us if the emd cannot be associated.

In case the customer wants to make the rebooking using the flexible ticket, the below scenarios arise:

1. Upsell

- Follow the regular process by running the Rebooking Wizard.
- Ticketing team will reissue the new ticket. No further actions are needed regarding the luggage since the new ticket will include a piece of bag.

2. New emd should be issued.

- Follow the process is mentioned [here](#) "What if pax has EMD issued on original booking?"
- Run the Rebooking wizard and leave a comment to the ticketing team "Pls issue a new bag emd for this customer"

Information to Ticketing *

Ex. undercollection, reason code to be added by team lead

Step 11

Solution

Parent step: 4

Voluntary change - LCC

- Follow the regular routine for the rebooking process. You can check it [here](#).
- Check if the baggage is automatically transferred to the new booking. If not, inform the customer of the cost.
- **Only** for the orders with the flexible ticket we will take the cost on us.

Do not forget that for carriers where communication is prohibited, the customer will have to contact them on their own if we can not assist him.

Step 12

Solution

Parent step: 5

GDS

You may encounter the following scenarios depending on the schedule change:

- Minor SC GDS VI

For the minor SC, as the ticket coupons are updated and no further actions are needed by our side, we do not need to make any further action for the luggage.

- Major SC GDS VI

a) Airline needs to revalidate or reissue the emd number.

Check if the emd issued by Gordian is visible in GDS. If so, leave a comment to the ticketing team with the emd number. They will either try to reach out to the airline, so the emd will be re-associated, otherwise they will issue a new emd with a charge on us.

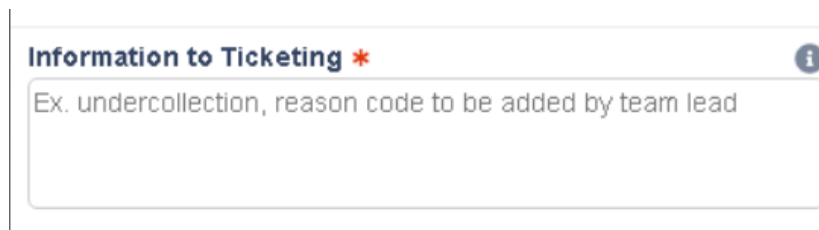

If the emd is not visible, leave a comment to the ticketing team *"Pls issue a new bag emd for this customer"*

b) Refund old emd and issue new according to the airline's rules.

- In phase 1 we cannot claim any refund from Gordian for the emd for the rebooking process. This is applicable only for the cancellation process.

- Leave a note to the Ticketing team *"Pls issue a new bag emd for this customer"*

* *The charge will be on us.*

Step 13

Solution

Parent step: 5

LCC

When a SC occurs, it is a customer responsibility to contact the airline and make the change. You can find the exceptions [here](#).

For the carriers where the contact should be done by us, FL agents (SC) need to check if the baggage is automatically transferred. If not, check on Manage my booking manually re-associate the baggage ancillary.

FAQ

1. When a customer is contacting because of baggage not being added by Gordian, what should the FL agent do?

This cooperation is something between us and Gordian. Gordian has an SLA 3 hours of baggage fulfillment. If they are not able to add the bag, the order will be automatically placed to our Manual queues where SL is handling. That means that if the customer calls because the bag has not been added yet, the FL agents will see that the order is on our Manual queues and they will inform the customer to wait. Nothing changes to our routines.

2. Since Gordian does not send any confirmations to the customer, will we(Second Line) send a confirmation once the baggage is added?

We have maintained the same flow. When a customer makes a booking on our website and purchases a bag, the confirmation email states 1 piece of bag. If the system cannot issue the bag and the order falls to our manual queue, the SL agents issue a bag without sending any further confirmation because the customer did not know that the bag was not issued automatically. SL agents are sending email to customers when they are not able to issue the bag.

3. Which team in Second Line will be responsible for communication with Gordian if any clarifications will be needed?

Payouts and Claims have access to Gordian's portal, so if they want to check for example the status of the bag or if the refund has been received, they will log-in to Gordian's portal.

4. If Gordian will issue an EMD for a GDS reservation but it will not be visible in GDS and the customer will ask for a confirmation or EMD number, what FL agent should do?

The confirmation email states that the bag has been added, so as soon as the FL agents will see the respective indication in Edvin that the bag has been added by Gordian it is guaranteed. This case is very rare because the customers do not know that we are issuing emds.

5. In the General process it is mentioned that Gordian will fulfill the luggage for specific carriers either for GDS or for LCC. For which carriers exactly the baggage may be added?

This is not something that affects the FL agents because this project is being tested a lot. To point out again that SLA is only 3 hours, if Gordian fails the order will be automatically placed on our queues, so FL agents will see that the bag is in progress.
