Solution

Parent step: 2

Escalate to SL via Edvin

A new way of escalating orders to Backoffice has been created.
This process will also replace the current A list where CR and Communications have been escalating cases to SL.

The Edvin tab **Refund** will display a new button **Escalate to BO**, through which **specific cases** will be able to be sent to SL without the use of the Ettrack contact form (see the below screenshots):

Important: Do not manually register an errand when escalating this way. In the pop-up window that will appear you will need to:

- Select the Escalation reason
- Write the errand text and select the errand Channel/Category/Type/Action
- After you click the **Escalate** button it will send the case to SL and will register your errand automatically (so, make sure to write everything that should be mentioned) - see the below screenshot.

ATTENTION ⚠️ If you need to escalate more than one PNR in the same order, please make sure to select the respective label for each PNR.

For example, if you have two PNRs that need to be escalated with the same label, you will escalate the first PNR and then you will escalate the second PNR as well:

Escalate to BO

Escalation reason: **Refund**

Channel: **Refund**

Enter escalation reason: **FL ESC - FL fare**

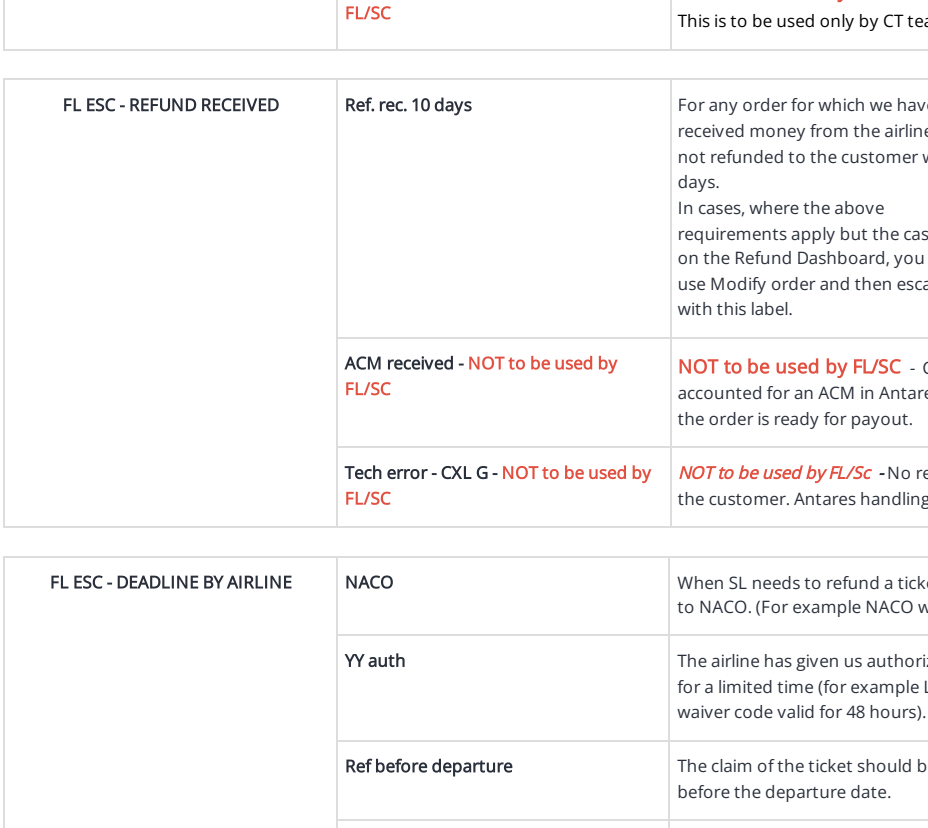

Order note: **FL ESC - FL fare**

Category: **Refund**

Type: **Refund**

Action: **Escalate**

You can confirm the escalation has been done successfully by checking that the errand has been registered and the label has been applied (see below screenshots):

The label categories (each category has labels that we can choose from) that we are allowed to escalate this way can be found below:

Group Title	Label Title	When to use
FL ESC - UNCLAIMED	FLX EMD	ONLY for Farelego bookings. A refund application needs to be sent by SL via the BSP link for the EMD.
	NDC - RAI in BSP	To be used when the airline has informed that the refund application needs to be sent through the BSP link for all NDC portals: FLX, LUG, AA, ASOA, BA, IB, AF, etc.
	Handled by FLJSC	Only for cases that were escalated back to FLJSC by SL. FLJSC agents will mark the order with this label once they complete the action, and new FLJSC notes to escalate back to SL for further actions.
	FLJSC - Awaiting pay	Note: When the case is handled by FL and no refund should be processed to the customer in the end, the FL Support agent should not remove the case from the "Manual Handle Refund Case queue", but escalate the case back to BO via the label "Handled by FLJSC" stating that the case should be removed from the refund dashboard.
	FLJSC - Awaiting Spil	This is to be used by support agents. When SL will escalate back a case to FLJSC and FLJSC will inform pay with alternative options should ALWAYS insert this label. If the customer will not revert SL will use this label to remove the case from the Refund Dashboard.
FL ESC - REFUND RECEIVED	Ref. rec. 10 days	This is to be used by support agents. When SL will escalate back a case to FLJSC and FLJSC will contact the supplier for authorization, exceptional requests (deadlines, etc.) should ALWAYS insert this label. This is in order for SL to be aware that the case is pending the supplier's response and not remove the case from the Refund Dashboard.
	ACM received - NOT to be used by FLJSC	NOT to be used by FLJSC - CT has accounted for an ACM in Airlines and the order is ready for approval.
	Tech error - CXL G - NOT to be used by FLJSC	NOT to be used by FLJSC - No refund to the customer. Airlines handling only.
FL ESC - DEADLINE BY AIRLINE	NACD	For any order for which we have received money from the airline and not refunded to the customer within 10 days.
	YY auth	In cases where the above requirements apply but the case is not on the Refund Dashboard, you should use Modify order and then escalate with this label.
	Ref before departure	For orders where we have informed the customer about cancellation with the old fee (and did not accept cancellation that time) and once the customer called back to confirm and we informed the new fee he/she made a complaint and we want to apply the old fee.
FL ESC - ETG Escalations	Customer Relations - NOT to be used by FLJSC	To be used only by FLJSC - For cases escalated by the Customer Relations team. 12hr SLA.
	TL Escalations	For priority ONLY if TL has inserted an authorization note in Edvin.
	ETG Escalations	Label added by FLJSC agents handling ETG Escalation task. 48hr SLA.
FL ESC - CR payout done - NOT to be used by FLJSC	CR payout done - NOT to be used by FLJSC	CR pays out in advance. This label will be blocked from automated payouts.
	TL - Pending RA	NOT to be used by FLJSC - CR pays out in advance. This label will be blocked from automated payouts.
	Old cancellation fee	To be used only by TL/Manager/FL Coordinator for Requested Pending RA.
FL ESC - B.com calculator discrepancy	B.com calculator discrepancy	For cases where we have informed the customer about cancellation with the old fee (and did not accept cancellation that time) and once the customer called back to confirm and we informed the new fee he/she made a complaint and we want to apply the old fee.
	ETG calculator discrepancy	For B.com cases where FL agent has identified the discrepancy between the total refundable amount displayed in MyPortal and the actual refundable amount stated by YY fare rules.
	Dupe Tripstack A&I	For ETG orders where FL agent has identified the discrepancy between the total refundable amount displayed in MyPortal and the actual refundable amount stated by YY fare rules.

Please keep in mind that **only cases that are already canceled and still active in the Refund dashboard can be escalated this way**.

For orders that have already been refunded to the passenger (payout done), not yet canceled, or belong to any other category than the above, the old way of escalation will need to be used as per below:

To raise a case using **Modify order** for the following:

24h airline rule

Force Majorure - refund

Schedule Change - refund

Tech error - ticket

Ticket rules - airline fee (to be used also for non-urgent authorization provided by the airline company)

Ticket rules - taxes

Void

FLJSC agents can view eNett transactions under the VAN tab in Edvin. This way, whenever applicable, the agent is able to confirm if a refund has been indeed processed in case of a customer claiming this. Meaning that such cases should not be sent to SL at all.

In addition, we have to be more strict with the volume of orders sent to check the refund status. All of us are aware of the fact that airline companies are also dealing with huge backlogs and authorizations for refunds that are delayed. As a consequence, a lot of customers are coming to us asking for additional information, time frames, deadlines, etc.

Escalating the case to SL will not quicken the process, so you should always be thinking critically and place the order for a **Refund status check only** if:

- The customer knows the airline company has refunded us for your order already
- medical/death cases when at least 7 days have passed **after CR approving the document** applicable when the customer has Cancellation protection, currently approximately 2 weeks time frame for CR to handle and **there are no notes from SL in Edvin**

ATTENTION ⚠️ If there are no errands from CR, FL agents are to first check with their TL or Supervisor whether the docs were received by us **BEFORE** reaching out to the CR team.

Step 4

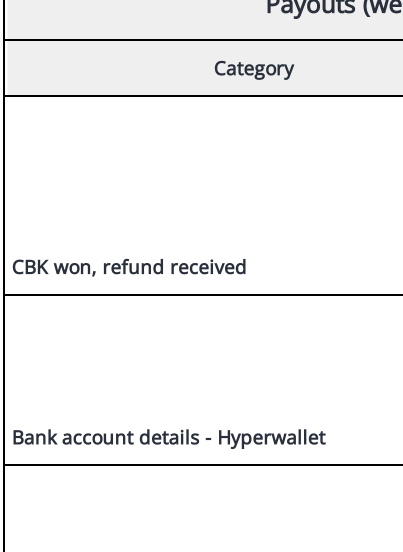

Solution

Parent step: 2

Escalate to SL via Ettrack

There is a new contact form created for escalations to SL via Ettrack. This page aims to clarify scenarios that cannot be escalated using the labels function and thus, must be sent to SL via the Ettrack contact form with the following categories:

To raise a contact form, click on the left side of the menu and choose the option "Create case via form" as shown below:

Once you choose the option a pop-up window will appear with the below categories:

FLJSC agent

Claims - we need to request refund from the airline

Payments - we need to refund the customer

The new contact form in Ettrack has two main categories:

1. Claims (we need to request a refund from the airline).
2. Payments (we need to refund the customer).

Claims (we need to request a refund from the airline)	
Category	When to use
Unclaim d Ticket	For tickets, only that have not been refunded and we need to request a refund from the carrier. The basic requirement is that the order is canceled and removed from the refund dashboard and a Modify order is not available .
Unclaim d EMD	For EMDs only that have not been refunded and we need to request a refund from the carrier. The basic requirement is that the order is canceled and removed from the refund dashboard and a Modify order is not available .
Reclaim	For tickets/EMDs where we have already requested a refund from the carrier but we have requested less amount than we should. The basic requirement is that the order is canceled and removed from the refund dashboard and a Modify order is not available .

Payouts (we need to refund the customer)	
Category	When to use
CBK won, refund received	For orders where the chargeback is won and the customer is seeking his refund. The basic requirement is that the order is canceled and removed from the refund dashboard and the Modify order is not available as well as we have WON the chargeback and received a refund from the airline .
Bank account details - Hyperwallet	For orders, where we have initiated a Hyperwallet or bank account details but the customer came back to us with a delay. The basic requirement is that the order is canceled and removed from the refund dashboard and a Modify order is not available .
Additional payout	To be used in one of the below scenarios: 1. Fare hike 2. Refund the customer, in case a cost is approved by TL, cases that cannot be added in the Modify order through Ancillary Voluntary reason (for example, double payments, refund of the difference of our handling fee due to the new fee structure in case we applied the wrong fee, internal error, etc) 3. Refund the customer an ancillary/service if the order is canceled and not on the refund dashboard 4. An order has been claimed but removed from the refund dashboard without making the payout to the customer. 5. For ancillaries with booking.com where the customer claims that was charged and we cannot see a confirmed payment in Edvin but the transaction has "captured" status and we want to send it to SL for a refund to the customer. 6. For approved CR claims done by FL - related to B.com gender issue. For details on the process check here . 7. For orders where the 24h BR cancellation rule applies and we need to refund the remaining amount, no need for TL's approval. 8. For orders, where customer claims to have received incorrect amount (excess amount) as compared to the one seen under MyPortal while cancelling the reservation and order is not on the refund dashboard.
Fare Breakdown	To be used ONLY when the payout to the customer has been completed, and the customer is requesting clarifications about the refundable amount.
CBK urgent	To be used ONLY by the Chargeback team. FL should NEVER use this escalation category.
B.com order - no simplified refund activated	Applicable only for cases where the payout was processed until 23/09/24. To be used only for Booking.com phare 1 orders, where B.com is M&A and where the refund case has been already closed by SL, but the SimplifiedRefund Activated errand note is missing and then escalate the refund has never been processed to the customer.

ATTENTION ⚠️ It is not allowed to escalate a case via Ettrack, if the case is eligible for label escalation (go to the previous screen and use option 1) Escalate via Edvin.

After identifying which case type you have and placing it through the correct channel/label, you also need to add:

- PNR or Edvin order number
- Customer's name
- Ticket number or the specific segments applicable for the request (if applicable for your case type).

This means that you basically provide the same information you are asked for when proceeding through the Modify order.

Please make sure to write down the above details as it is data required from SL to fulfill successfully the orders FL asks to be prioritized. Cooperation here will be beneficial for both sides.

Note that if the order has the status changed instead of canceled, you will be able to use the Modify order to send the case to SL.

Step 5

Solution

Parent step: 1

Escalation to SC

All the information in order to escalate a case to SC team can be found under [02_Schedule Change Dueses file](#).

Step 6

Solution

Parent step: 7

How to escalate a case to Support.

For escalating cases to Athens, Uppsala, Mumbai/Pune, Cairo, Tbilisi

1. Go to Edvin and click on "Register errand".
2. Once you have added all the relevant information for your errand, click on "Send to support" and fill in the rest of the details the Support team needs to be aware of:

Send to support

Reason for escalation

Actions required

Customer callback number

Select language

Which language was the customer served in?

1600

Location

Enter airport or ticketing office

Use my location

Inhouse urgent escalation

When you are escalating an urgent case to Support please use also the Slack room of your location to notify support agents of the urgent case.

Step 7

Question

Parent step: 1

ATTENTION ⚠️ FL agents should place the case on the support queue of their location unless otherwise stated in Shelf (for example, Cancellation guarantee).

Escalation to FL Support

1. Place an order on Support

Step 6

2. What is considered as Urgent request

Step 8

3. Scenarios to be placed on FL Support

Step 9

Step 8

Solution

Parent step: 7

What is considered as Urgent request

A case shall be escalated to the **Urgent Support queue** when meets the below requirements:

- The original Departure/Return date is within 3 working days.
 - For rebooking, the new Departure/Return date is within 3 working days.
 - For rebooking, same day or before the ticket is issued.
 - For cancellation against the 24-hour rule/void that needs to be escalated.
 - The ticket validity will expire within 3 working days.
 - Other specific deadlines provided by the airline that will expire within 3 working days. (for example, an authorization is valid for a short period, etc).
 - In case the agent needs to send an email to the customer in order to request additional documentation or any information sent directly to the customer by the airline.
- Note: In these scenarios, the case needs to be escalated to the Urgent queue of the location that received the 3rd call. (Remember to remove it from the normal support queue).

ATTENTION ⚠️ Regarding the last bullet, please note that a new action has been created in the register errand "Already on Support - Escal to Urgent queue" and all the agents should use it when handling the specific scenario.

Register new errand

Channel

Phone in

Category

Force Majorure

Type

Raiseok

Action

Already on Support - Escal to Urgent

Order Note

Register Errand

When the customer's request does not meet the above-mentioned requirements the case should **ALWAYS** be escalated to the normal Support queue.

Step 9

Solution

Parent step: 7

Scenarios to be placed on FL Support

- Cases where FL agents were unable to finalize the Customer's request:

Note: It is important to specify the reason as we should always mention the exact error message we receive when using the rebooking command (for GDS bookings) or if there is another reason (for example, waiting for a response from the coordinator, TL).

- Unable to find the rules of the ticket
- Unable to price the itinerary
- VI orders with 3 or more PNRs (not SC)
- LCC orders where the agent has tried more than 2 times and the LCC website is not processing.
- In case the agent needs to send an email to the customer in order to request additional documentation or any information sent directly to the customer by the airline.

- Cases where communication with a Supplier is required:

- Duplicate cases
- LCC cancellation is to be made by us after contacting the airline.
- Escalations by Customer Relations
- Reassociate ancillaries in farelegs after a resue
- Name correction/name change
- Ticket status suspended - Only for rebooking
- Any other cases, where the routine says that we need to contact the supplier (for example, rebooking CRD to ADT, ABN, etc).

- Escalations:

- Escalations by Fraud & CBK Department
- Escalations by Customer Relations
- Escalations by SL and Ticketing
- Escalations pending action

Examples: (A Jira to SL team has been raised and waiting for an answer, or it is clearly a retail loss and escalation/ investigation is needed with the Coordinator/Manager/FL, etc.).
