3. Amadeus- Upgrade, destination changes and stop over	Step 6

Step 2

 Question

Parent step: 1

Manual calculation

Rebooking Manual Calculation

1. Amadeus Manual Calculation- Totally unused ticket	Step 4
2. Amadeus Manual Calculation- Partially used ticket	Step 5

Amadeus ATC

How to get total change fee, step by step

Do not forget:

1. Always check if ATC is possible, even if the passenger is a no-show or there is SC (in case the new dates are out of the re-protection window the airline allows).
 - If ATC is not working, check fare rules of the ticket and use the commands for manual pricing.
2. Reissue of ticket must be done before original flight departure, otherwise passenger will become no-show.
Please check Edvin Documents if any other restrictions applies.

ATC Amadeus Ticket Changer

1. Check where the ticket is issued (OID) at the TKOK-line or RTF or using RTTN (the IATA number is mentioned either on the FA- line or in the top the the display of the ticket mask).
2. Jump to the OID where the ticket is issued, if needed.
3. Check if the booking has any SSRs.
4. If we have infant in the PNR, please check DOB to see if the infant will still be an infant after the rebooking (in case the passenger type changes you will receive an error).
5. Add the new requested segment(s) without saving.
(For example, if flights with QR do not come up in an availability search or all booking classes result as status UC it is necessary to remove/cancel the segments booked in the PNR (without saving) and do the availability search again.)
Search availability the whole way to destination. It is not allowed to search segment per segment due to risk of ADM, but it is possible to search separately if there are different airlines.
(For example, if we have EK ticket and one segment is of EK but last segment is with KM, in that case we can search both flight on EK and then separately flight with KM.)

You can also use availability with overnight:

AN11JULARNIST*+1ISTANK/ATK

AN11JULARNIST/ATK1794*+1ISTANK/ATK7244

6. Use TTE/ALL to remove the old pricing, if you are pricing a round trip ticket, if you are pricing a OWC or separate tickets use TTE/Txx (xx = TST line for the ticket you will rebook).
7. Use FXQ/R,UP to check the price in the class you have booked. If you receive the message 'No fare options' for this flight try the FXO/R, UP to check the best available combinable fares to price for rebooking.

Note: With FXO you may have a downgrade. So always make sure the new booking classes are in the same or higher class than the original.

If ATC does not work and you need to calculate manually always entering IR before you start pricing again (otherwise you will be unable to use TTU later).

ATTENTION: You have to charge the "Total Add Coll" for all the voluntary rebooking scenarios (plus our fee).

FXO/R,UP/S7,9

- Use FXQ/R,UP/S5/T65 (65= ticket row), if separate tickets (OWC) FXQ/R,UP/S3-5/T60-61. If FXQ don't work also try FXO as per the instructions above.
- If a customer wants to rebook, charge the fee in Edvin via Moto. If the customer cannot pay at that moment - IR to ignore the ATC you did and inform them that the prices can change as the fares are subjected to the airline's availability.
- After the payment is completed successfully and you have the possibility to make the rebooking, assign the payment link on your name, remove the unwanted segment(s) and save (ER). If the payment is made

later and you cannot proceed with sending the rebooking case to ticketing the payment link agent from support will take care of it (ALWAYS have in mind that you should be trying for FCR).

11. Run the Rebooking Wizard based on the scenario you have, selecting for the case to be sent to ticketing queue. Make sure you have added all the mandatory elements.
12. Remove the payment link from the queue.

These are the general categories that you need to mark as 'Urgent' for handling as provided by CT:

1. New or Original departure is today or on the next day, early in the day.
2. New issuance warning from the airline with a deadline within the same time frame as point 1.
3. Airlines CA, SV, MU & TK (these are airlines that HX quickly).
4. SK and A3 name changes.
5. Authority from the airline with a deadline today.

NB:

Observe last reissue time in ATC to see if the reissue has to be marked as 'Urgent' reissue. If the time is stating 2359 is considered as a "normal" ATC.

Flexible ticket

Charge customer the fare and tax difference, Total Add Coll minus Penalty.

Pricing entries

Entry	Explanation	Is TST created?
FXO	rebook to lowest available booking class and create TST	Yes
FXF	see the price for the chosen booking class (If no answer the classes are incorrectly used)	No
FXQ	will price and create TST on the classes you picked	Yes
FXE	shows price lowest price/class for the rebooking, but does not create TST	No

All commands can be combined with original issuing date.

They can also be combined with /K to "stay true to already booked cabin"

Why is ATC not working

- An earlier SC on the booking/involuntary reissue
- Airline is not connected to ATC (check with FQNATC/CXR for Amadeus). Error message 'CARRIER RESTRICTED ACCESS TO CAT 31/VOLUNTARY CHANGES' will show as filled from the airline.
- Category VC not loaded in the rules.
- Price found in a ghost area where ATC not possible.
- Not always possible on unpublished price.
- We do not follow rules such as penalty (PE), routing (RG/RTG) or flight application (FL/FA).
- Price is broken at another point than the destination.

- Different pricing, for example for upsell.

Use FQNATC/CXR to get a list of which airline accept ATC.

To find explanation on ATC error messages check [here](#).

ATC Revalidation

If the ATC answers with 'REVALIDATION', check if revalidation is possible for this airline.

- Insert command HEETT airline (ex. HEETTAC for Air Canada)
- Check the market for ticket area:
STO = SE
OSL = NO
CPH = DK
HEL = FI
AMS = NL
FRA = DE
- In the category Revalidation, it should be Y for Yes (not guaranteed for DY (Norwegian Air) - see the "Important" section below)

In the example below, it is shown N (N= NO), which means we cannot revalidate, and it needs to be calculated and reissued manually.

HISTORY	:Y	REVALIDATION	:N
PRINT (US ONLY)	:N	REFUND	:N
VOID	:Y	VOID EXCHANGE/REISSUE	:N
CANCEL REFUND	:N		
NOTE: FOR INFORMATION ABOUT GENERAL CONDITIONS AND FORMATS			

Important for Norwegian Air (DY)!

Kindly always check **fare rules** even if the commands - FXQ/FXO - result in revalidation as revalidation.

It is **not** guaranteed according to Amadeus GDS policy.

On that occasion, voluntary reissue should be done according to fare rules and it needs to be calculated and reissued manually.

The routine that has to be followed when we get Revalidation:

- Delete old segments.
- Save new one.
- Run the Rebooking Wizard, inserting all the mandatory information (This particular step is different from usual ATC).

Baggage upsell - If two separate fare basis are priced for each ticket and baggage has been added to one of them

Information regarding tickets where the passengers add baggage during the booking process (different fare families).

When trying to rebook the tickets there might be different price due to only one of the pax has added baggage, the price will differ. If you try the ATC you will receive this message: TKTS WITH SAME PTC BUT DIFFERENT PRICINGS - TRY SEPARATELY

Check RTF and open the tickets:

78 FA PAX 125-1111111111/ETBA/EUR116.41/14OCT15/AMSSG34AA/57211
534/S3-4/P1 (0 PC BAG)

79 FA PAX 125-1111111111/ETBA/EUR143.41/14OCT15/AMSSG34AA/57211
534/S3-4/P2 (1 PC BAG)

In this PNR, ticket for P2 has upsell to include baggage and the other 5 have no fare with baggage.

T	P/S	NAME	TOTAL	FOP	SEGME
3	.1	██████████/██████ MS	EUR	202.00	CCCAXXXXXXXXXXXXXX5344/0+7
3	.3	██████████/██████ MR	EUR	202.00	CCCAXXXXXXXXXXXXXX5344/0+7
3	.5	██████████/██████ MR	EUR	202.00	CCCAXXXXXXXXXXXXXX5344/0+7
4	.4	██████████/██████ MISS	EUR	164.00	CCCAXXXXXXXXXXXXXX5344/0+7
1	.6	██████████/██████ MISS	EUR	164.00	CCCAXXXXXXXXXXXXXX5344/0+7
6	.2	██████████/██████ MR	EUR	219.00	CCCAXXXXXXXXXXXXXX5344/0+7

It is actually possible to make ATC for those bookings. Use FXQ and one ticket type (price) at a time.

FXQ/R,UP/S7/T62-63

Remember; FXQ calculates only on the class you have taken.

It might be that there are no for example Light- fare in that specific class you have chosen.

In that case, you can compare an FQD with the availability to see what the lowest possible class might be for the fare base/ fare family you need.

If you add /FF in the FQD entry it will sort the farebases into groups of fare families to quicker get an overview.

Ex: FQDARNCDG/R,UP/D17JUN17/AAF/FF

Options to rebook when there is upsell for one of the passengers:

Split the booking and execute ATC for each passenger. Do not save if we haven't received payment!

Send payment link or charge in MOTO.

Step 4

Solution

Parent step: 2

Totally unused ticket

Remember

If we have infant in pnr please check DOB to see if infant will still be an infant after the rebooking.

INVOL reissue done	Use the original date of issue if historical pricing needed
VOL reissue done	Use the recent reissue date if historical pricing needed
No-Show not used outbound	Use today's date
No-Show on inbound, used outbound	Use the original date of issue

Always think like this:

Rebooking before the regular departure = Current price (if not airline rule says otherwise)

Rebooking after departure = Last VOL reissue date before departure.

FXX – Possible to insert original issuing date. Also possible to read current PNR rules from FXX when inserting issuing date in the command.

FQP – Use when FXX / WP not possible. When you use FQP, check the rules, especially flight application (FL/FA).

FEEDER FLIGHTS - When in a long international connection, there is a short flight within the same region operated by another airline than the operating carrier - this regional connection is called a feeder flight. If you can not receive pricing by using any of the suggested manual pricing commands it may mean that the chosen booking class on the feeder flight is not compatible with the fare basis of the original ticket. If you need to check which booking class shall be used for feeder flights for a specific fare basis, type in FQS01/ABA (01 for fare line number one from the list after FQD command, /ABA for airline code - British Airways operating the feeder flight). **UPGRADE** – Ticket is normally possible to upgrade if it doesn't state in rule that it is not permitted. A basic rule is to only take published to published and unpublished to unpublished fare.

PUBLISHED/UNPUBLISHED – Almost never possible to upgrade from unpublished to published. Exceptions exist. Never permitted to downgrade from published to unpublished.

AP – No need to check if outbound flown on a roundtrip ticket.

TTH - If the ticket has been previously rebooked as an INVOL 0 reissue (due to SC/FM) , you need to calculate on original TST, which you can find by using **TTH** and then **TTH/T1** (1 refers to the number of mask you want to display). As per the screenshot below the agents need to **compare the new fare and taxes with the old fare and taxes shown in the AF line**, which is underlined in the example, (in this line always the fare will be displayed first along with the currency and then the taxes' initials with the amounts and currency). You should consider this as a normal manual calculation once the TTH is displayed.

```

INFANTS FREE OF CHARGE.

FARES MAY BE UPGRADED TO ANY HIGHER SK GO/SK PLUS FARE UP TO AND INCLUDING C-CLASS

CHARGE DKK 500 PER DIRECTION AND CHARGE THE DIFFERENCE BETWEEN THE FARE PAID AND THE FARE FOR THE HIGHER UPGRADE SECTOR.

REBOOKING/REISSUE/PAYMENT MUST BE MADE IN ONE TRANSACTION NOT LATER THAN 1 HOUR BEFORE DEPARTURE OF EITHER THE FLIGHT BEING CHANGED OR THE NEW FLIGHT WHICHEVER IS EARLIER.

THE REISSUED TICKET MUST BE ANNOTATED -
THE ORIGINAL FARE PAID REMAINS NON-REFUNDABLE.

WHEN COMBINING ON A HALF ROUNDTRIP BASIS THE PENALTY CONDITIONS FOR EACH FARE COMPONENT APPLY.

Which airline penalty to charge?

In some fare rules the airline penalty is stated in several currencies. For example this ET fare rule states the change penalty in USD, EUR and GBP.

We should calculate on the currency:

1. Where the ticket is issued
2. If not issued in any of the mentioned currencies, the currency geographically closest to the ticketing currency. Ticket issued in STO penalty in EUR.

Is historical pricing needed according to rule?

If the rule says as below, or similar, historical pricing is needed:

2.WHEN THERE ARE NO CHANGES TO THE FIRST FLIGHT

COUPON BUT OTHER FARE COMPONENTS ARE CHANGED THE

ITINERARY MUST BE RE-PRICED USING HISTORICAL

FARES IN EFFECT ON THE PREVIOUS TICKETING DATE.

- Display the ticket.
TWD/Lxx (xx=ticket row) TWD/TAX (TQT to see fare if unpublished fare)
- Copy to a notepad
- Check the booking if there is any special request
- Search an availability. If flights with for example QR do not come up in an availability search or all booking classes result as status C it is necessary to remove/cancel the segments booked in the pnr (without saving) and do the availability search again.
- Insert the requested flight segment(s) without saving in the pnr and use FXX/WP, FQP or other pricing options, see below.
- Compare the two tickets, fare and tax difference.

Old ticket

In this ticket there are 11 different taxes.

XT – Stands for extra taxes, these are displayed to the right in the fare calculation.

Compare new with old (and not the reverse way) to avoid missing possible new and extra taxes that might have appeared.

In this ticket all taxes and fees are lower on the new ticket. Charge tax and fee difference if any are

higher on the new ticket.

As all the other taxes and fees are higher on the old ticket no refund will apply.

Lets pretend airline fee is 70eur the calculation to receive total fee is

Airline fee 70EUR – 644 SEK

Fare difference – 2813 SEK

Tax difference – 0

Total to airline – 3457 SEK (376.26 EUR)

Our fee is 85 EUR

Service package 20 EUR

Total for customer to pay per person is:

$380+85+20 = 485$ EUR

Amadeus

Pricing entries

Ent ry	Explanation	Is TST created?	Command to be used for TST
FXX	see price on selected flights/classes	No	TTU/S(segments to be rebooked)
FXP	price and create TST on selected flights/classes	Yes	- (* Check info for FXT command below)
FXA	see list of available prices on selected flights	-	- (Check for FXU command)
FXB	price and create TST on the cheapest option on selected flights (might change the classes)	Yes	-
FXR	see price on cheapest option on selected flights (might change the booking classes)	No	TTU/S(segments to be rebooked)
FXD	search cheapest option on selected dates (all routings and airlines)	-	-
FXU	select price from list from FXA/FXD, rebook and create TST	Yes	-
FXZ	select price from list from the FXA/FXD, rebook but do not create TST	No	TTU/S(segments to be rebooked)

All commands can be combined with original issuing date.

*

(If ATC does not work and you need to calculate manually always send IR before you start calculate, otherwise you will be unable to use TTU later)

- If we have infant in PNR please check DOB to see if infant will still be an infant after the rebooking.
- Insert new flight (without saving). If flights with for example QR do not come up in an availability search or all booking classes result as status C it is necessary to remove/cancel the segments booked in the pnr (without saving) and do the availability search again.

- Do FXX command, state ticketing area, validating carrier and segment (s)

FQP- script

Mostly to be used only when outbound is flown or when FXX not working.

You find FQP script in Selling Platform under 'Scripts' and 'FQP':

a FQP - Informative Pricing [X]

Destinations: **HEL** **KEF** **JFK** **KEF** **HEL**

Indicator: **1B**

Date: **15JAN** **15JAN** **25MAY** **25MAY**

Airline: **FI** **FI** **FI** **FI**

Class: **Q** **Q** **H** **H**

Global Routing ☐

Point of Sale: **HEL** Discount: **.UP,VC-FI,06JAN16**

Point of Ticketing: ☐ Keep Image

☐ Mirror Return

Enter a three letter destination code. Ex OSL (use airport codes when possible)

1. Enter routing.
2. Enter 1B at fare break point. If only one way enter 1.
3. Enter dates, airlines and booking classes.
4. Point of sale = ticketing area. In discount-box write ",UP,VC-validating airline,ticketing-date". Only include date if travel commenced. If travel not commenced exclude date.
5. Write CH or IN before ",UP" to check FQP for child or infant.

Change of airport:

UPDATE - OK

```

Important! While using the command **FXP**, a **TST** is created only if there is just **1 option/result** after the **FXP**.

* If more than one option appears, then after the **FXP** command we have to continue with the **FXT** command.

For example, we need the pricing option 2 for pax 1 and 2: **FXT2/P1-2**

Step 5

 Solution

Parent step: 2

Partially used ticket

Even if it is a Sabre booking the below instructions can only be done in Amadeus.

1. In case we have partially used ticket, changes permitted but ATC is not applicable, we have to proceed with Manual Calculation.
2. Open the pnr and ticket in the respective office id. Make availability and try ATC command. If does not work so use below command for flown reissue.
3. You have to include the used segments first then after the dash all new ones that he requests
4. Command: fqp(dep.city)/ayy/c(class)/d(date of flown seg)(dest.city)-/ayy/c(class)/d(date of new seg+dest.city)/r,office id,date of issue.
5. In case of child we insert in the end RCHD,office id and for infant RINF.
6. Select the lowest available price from the results shown. Open the respective option with FQQ1(1 is the number of the option).
7. Compare the price from the new mask with the old ticket. Fare with fare and one by one the taxes.
8. Create payment link as usual and if passenger wants to proceed, continue with same procedure of normal manual calculation of unused ticket as above.
9. Update new segments with TTU/S3-4.
10. Use the rebooking wizard to send the PNR to ticketing.
11. More information can be found under Rebooking wizard folder
12. If order needs urgent ticketing, select the "Mark as urgent" checkbox. For more info check [HERE](#).
13. Select change status and reason in the rebooking wizard.

Step 6

Solution

Parent step: 1

Upgrade, destination changes and stop over

Upgrade

Start with ATC. FXO/R,UP/KC,+ = gives you directly business class on seats where they are available.

If that does not work, continue with manual calculation below:

- Check fare rules on original ticket. (Note: Ticket might be possible to upgrade even if changes not permitted - Read the rules carefully.)
- Check which booking classes/fares that is available for the requested cabin.
- Y/M = Economy
W = Premium Economy
C = Business
F = First
Eg. FQDSTOLHE/AQR/R,UP,01DEC15/D15JAN16/KC
- Check which booking class to use for feeder flights for specific fare basis, if needed.
FQS01/ABA (01 for fare on line number one from FQD, /ABA for airline flying feeder flight)
- Also check CO section of original fare rules to see if upgrade to higher fare is allowed.
- Insert seats in pnr.
- Calculate price from FXX or FQP and continue as a manual calculation

Destination Change

- If Amadeus; try with ATC first, with the new flights and destination. If ok, go for it.
- - If ATC/WFRF does not work, continue below.

- Check fare rules if changes are permitted, PE section.
- You need to check both PE and RU section in cases of destination change.

NOTE 2 -GENERAL INFO FOR REROUTING/REBOOKING
TO TKTD FLT FOR THIS FARE ARE AS BELOW
1- REISSUE EQUALS TO REROUTING
2- REVALIDATION EQUALS TO REBOOKING
3- CHANGE OF AIRPORT WITHIN ONE CITY
DOES NOT CONSTITUTE AS REROUTING

CHANGES

ANY TIME
CHARGE SEK 600 FOR REISSUE.

NOTE -
ORIGIN/DESTINATION OF THE FARE COMPONENT MAY
NOT BE CHANGED.

RU.RULE APPLICATION

FARE BY RULE

SCAN ETRAVELI PAB 01JAN16-31DEC17

APPLICATION

AREA

THESE FARES APPLY

RU.RULE APPLICATION

SPECIAL TRANSATLANTIC ECONOMY FARES BETWEEN AREA 1 AND AREA
2

APPLICATION

AREA

THESE FARES APPLY

BETWEEN AREA 1/AREA 2.

Stop Over

- If Amadeus; try with ATC first, with the new flights and destination. If ok, go for it.
If ATC/WFRF does not work, continue below.
- Check PE- section, is it possible to change? See if it might say anything about Stop over.
- Check SO- section, is stop over allowed? In that case, where and is it against any extra fee?

- If allowed, manual calculation with all fees and differences.
