| 1. Sabre ATC (WFRF) | Step 3 |
| 2. Sabre Manual Calculation | Step 2 |
| 3. Sabre- Upgrade, destination changes and stop over | Step 6 |

Step 2

Question

Parent step: 1

Sabre Manual Calculation

Manual Calculation

- | | |
|--|--------|
| 1. Sabre Manual Calculation- Totally unused ticket | Step 4 |
| 2. Sabre Manual Calculation- Partially used ticket | Step 5 |

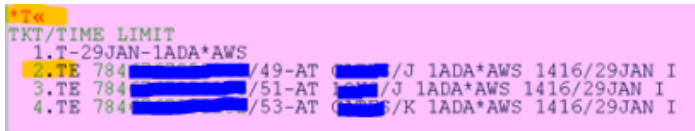

Step 3

Solution

Parent step: 1

Sabre ATC (WFRF)

- Make sure you are in the right area. It should be the main area/ PCC as the ticket is issued in, (*S - To display area you are in);
SE 1ADA - Z9EC
NO 08LA - 4NZ7
DK C73B - P65B
FI A99B - X45B
NL 2BPB - W1ZC
- If we have an infant in PNR please check DOB to see, if the infant will still be an infant after the rebooking.
- Add the new requested segment(s) without saving. For example, if the flights with QR do not come up in an availability search or all booking classes result as status UC it is necessary to remove/cancel the segments booked in the PNR (without saving) and do the availability search again.
Make sure you are taking best available class for cheapest alternative. Please note that if passenger has a Cabin selection - you need to rebook in the same booking class or higher within the same cabin to make sure that there is no downgrade.
- In some cases, you need to remove the old segment (without saving) before you can perform a WFRF.
- Do *T to check ticket line.

```
*T<
TKT/TIME LIMIT
1.T-29JAN-1ADA*AWS
2.TE 784 [REDACTED]/49-AT [REDACTED]/J 1ADA*AWS 1416/29JAN I
3.TE 784 [REDACTED]/51-AT [REDACTED]/J 1ADA*AWS 1416/29JAN I
4.TE 784 [REDACTED]/53-AT [REDACTED]/K 1ADA*AWS 1416/29JAN I
```

In this case, we want to change ticket line 2:

WFRFTR2¥ASN¥S3-4¥N1.1

Explanation:

WFRF = Command

TR2 = Ticket Row/line 2

ASN = Airline SN

S3-4 = Segment 3-4 (If segment 1,2,5,6 should be used, type 1-2/5-6)

N1.1 = The person attached to that ticket row.

Usually there is no need for segments or person if only one person and only new segments.

If child, infant or youth ticket; add ¥PCNN, ¥PINF or ¥PBNN in the end to indicate the passenger type:

WFRFTR2¥ASN¥S3-4¥N1.1¥PCNN

WFRFTR2¥ASN¥S3-4¥N1.1¥PINF

WFRFTR2¥ASN¥S3-4¥N1.1¥PBNN(Pricing entry for 12-17 yrs depend upon airline to airline and always refer to the original PQ - To use this entry it is important to check the name field in PNR as well)

Original pricing command is :WPSx¥PBNN¥Nx.1

Steps to identify the original pricing/issue entry in Sabre.

1. *PQS
2. *PQx, where x is the PQ number for the certain passenger
3. Look for this format on the top of PQ display: WFRFTRx¥AYY¥PBNN¥Nx.1¥Sx¥KP0
4. If identified the respective youth indicator(PBNN) use it for the repricing of the itinerary

Please check if passengers have correct PTC by using *PQS

*PQS«

PRICE QUOTE RECORD - SUMMARY BY NAME NUMBER									
RETAINED FARE									
NAME	PQ	TYPE	TKT	DES	M/S/A	CREATED	TKT	TTL	
1.1	1	ADT			S	12JUL SEK	7677		
2.1	2	INF IN			S	12JUL SEK	589

1.1	1	ADT			S	15JUL SEK	4895		
2.1	2	CNN CH			S	15JUL SEK	3986		

You can add ¥NCB to the WFRF - command on one of ADT tickets and it will automatically rebook to lowest possible fare from the beginning or in case you cannot find combinable fares, you can use this command in order to find the best combinable fare on the current date.

ATTENTION: If you use ¥NCB, make sure that the fares combined and priced are not a downgrade.

WFRFTR2¥ASN¥S3-4¥N1.1¥NCB

The pricing mask after the WFRF should look like the below:

```

WF  WERR      COMPARISON SUMMARY      SCREEN 30

```

- Make sure that your mask displays the penalty in the 'CHG FEE AMOUNT' field.
If shown N/A in CHG FEE AMOUNT, it means there is no change fee, and we can just proceed with the change and charge difference, if any.

Flexible ticket : Charge customer the fare and tax difference, deduct from the "TOTAL" the "CHG FEE AMOUNT" and charge the rest (in this case is 0). Remember that the penalty amount should be included in the Rebooking Wizard information as regardless of the service use for the passenger we will still pay for the penalty to the airline.

- Always remember to convert the amounts to the customer's currency.
- When the rebooking cost is paid, retain WFRF as below. Add a 'X' on the space marked with blue below, before retaining. You should get an answer saying Transaction Retained.

```

```

- Save flights, inserting 6 signature (ex. 6KD) and ER.
- Use IR a couple of times, until Record Locator appeared.
- Run the Rebooking Wizard making sure you have inserted all the mandatory elements and select to send the rebooking to ticketing for reissue.
- Remove the payment link from the queue after sending the order to ticketing.

These are the general categories that you need to mark as 'Urgent' for handling as provided by CT:

1. New or Original departure is today or tomorrow before noon.
2. New issuance warning from airline with deadline within same time frame as point 1.
3. Airlines CA, SV, MU & TK (these are airlines that HX quickly)
4. SK and A3 name changes
5. Authority from airline with deadline today.

Why is WFRF not working?

- An earlier SC on the booking/involuntary reissue
- Airline is not connected to WFRF (WFRF ENTRY NOT AVAILABLE)
- Category VC / 31 not loaded in the rules
- Price found in a ghost area where WFRF not possible

- Not always possible on unpublished price
- We do not follow rules such as penalty (PE), routing (RG/RTG) or flight application (FL/FA)
- Price is broken at another point than the destination

To see the most common errors/ warnings for Sabre check [here](#).

When making WFRF, make sure that you have a fee or N/A in CHG FEE AMOUNT box. If not, we need to check rules and proceed with a manual calculation.

GUARANTEE REISSUE PRICE NOT APPLIED - VERIFY FARE/TAXES/FEES
  
```

BASE/EQV CURRENCY MUST BE THE SAME ON THE EXCH AND NEW TICKET means that you are in incorrect area.

It can also mean that you are trying to change origin or destination. In those cases where the airline allows destination change you need to make a manual calculation.

Other warnings that you need to be observant to those answers. Some are ok, some or not:

- REISSUE PRICE NOT GUARANTEED UNTIL RE-TICKETED - OK
- LAST DATE TO PURCHASE <DATE> - OK
- LOWER FARE FOUND - QUIT TO REBOOK 1X2X3X4X - Lower fares exist. Quit mask and rebook as suggested to get a lower price.
- GUARANTEE REISSUE PRICE NOT APPLIED - VERIFY FARE/TAXES/FEES - Not ok. Check rules, and preferably manually calculate.

Sometimes you get a message BEFORE the mask shows:

LOWER FARE FOUND - REBOOK TO 1X2X3X4X

This means you need to rebook to the suggested fares to get the WFRF through. It does not mean it is a lower fare so rebook and try again.

To easiest change class, just use WC4K/5K

WC = Will Change

4-5 = Segment 4-5

K = K- class

To see baggage and fare base on new flights before saving

Sabre

WP - Sabre

Pricing entries

Entry	Explanation	Is PQ created?
WP	see price on selected flights/classes (WPAXx to specify airline, xx use the IATA code for the airline for ex EK for Emirates)	No
WPRQ	see price and creates PQ on selected flights/classes	Yes
WPNC	see cheapest price on selected flights	No
WPNCB¥RQ	creates PQ on the cheapest option for the flights selected (might change the classes)	Yes
WPNCB	see price on cheapest options for selected flights (No PQ is created, you change might change the classes)	No
WPNI	search the cheapest option for selected dates (All routings and airlines)	-
WC¥1X + WPRQ	select price from list from the WPNI command, rebooks and create PQ	Yes
WC¥1X	select price from list from the WPNI, rebooks but ni PQ is created	No

*

Only to be used if trip not started.

- If we have infant in PNR please check DOB to see if infant will still be an infant after the rebooking.
- Always check **fare rules and max/min. stay** before quoting rebooking charges for manual rebooking.
 - **The most important fare rules are:**
 - 16.PENALTIES
 - 11.BLACKOUTS
 - 03.SEASONS
 - 04.FLIGHT APPL
 - 05.ADV RES/TKTG
 - 06.MIN STAY
 - 07.MAX STAY
- Insert new flight (without saving). If flights with for example QR do not come up in an availability search or all booking classes result as status C it is necessary to remove/cancel the segments booked in the pnr (without saving) and do the availability search again.
- Do WP command, state segment (s)

SEG	CTYPAIR	FQ	RULE	CXR	PU	FARE	FAREBASIS
01	ARNBKK	STOBKK	1699	TG	01	231.95	WRY7399
02	BKKARN	STOBKK	1699	TG	01	253.52	VRY7399

2) Once we have selected the new flight segments we need to proceed with the pricing.

As we all know WP is the command for prices that are still valid.

If it instead is a question of a price which is valid for travel, but no longer for sale where we have the right to use historical pricing, the procedure is the following.

- a)

```
1 TG 961W 10AUG 5 ARNBKK HK1 1430 0550
2 TG 960V 20AUG 1 BKKARN HK1 0110 0700
3 TG 960V 22AUG 3 BKKARN SS1 0110 0700
```

WPS1/3#B04JUL18

- b) We can also choose to price it with a specific farebasis WPS1/3#QRLWSE#B11JUL18

Historical Pricing

To be used when outbound is flown

Use FQP in Amadeus to calculate.

*

*

Edvin notes

Always write in Edvin after a manual calculation, even if change not confirmed:

- how you calculated (FXX/FQP/WP)
- booking classes
- airline penalty (in the currency as stated in fare rules)
- fare difference and tax difference in ticketing currency calculated on
- our fees and total price per person in customer currency.

Ex: WP CALC ON 25MAY IN K CLS, A/L FEE EUR 65 PERSFEE GBP 55

DIFF SEK 147, TAX 47YQ, 38UB, TTL GBP 120 PP.

If FQP used, the FQP entry should always be inserted in order notes in Edvin.

When sending to ticketing, please always write A/L fee, no matter if passenger has flexible ticket or not!

Step 5

Solution

Parent step: 2

Partially used ticket

How to rebook with manual calculation - Partially used ticket:

For more information, kindly check [here](#).

Step 6

Solution

Parent step: 1

Sabre- Upgrade, destination changes and stop over

Upgrade

Check which classes that are business by using //BB where the first B is for Business and the second B is for Cabin.

Change with WC to any business class.

Use WFRF- command with NCB in the end. It will calculate to lowest chosen cabin class, in this case business.

If WFRF does not work, continue with a manual calculation below.

- Check fare rules on original ticket. (Note: Ticket might be possible to upgrade even if changes not permitted - Read the rules carefully.)
- Check which booking classes/fares that is available for the requested cabin by using f.e. //SB where S is for Premium economy.
- Y = Economy
S = Premium Economy
B = Business
F = First
- Check which booking class to use for feeder flights for specific fare basis.
RB1BA (1 for fare on line number one from FQ, BA for airline flying feeder flight)
- Also check CO section of original fare rules to see if upgrade to higher fare is allowed.
- Insert seats in pnr.
- Calculate price from WP and continue as a manual calculation.

Destination Change

- If Sabre; try WFRF, but might still be ok even if WFRF shows something else.

If ATC/WFRF does not work, continue below.

- Check fare rules if changes are permitted, PE section.
- You need to check both PE and RU section in cases of destination change.

**NOTE 2 -GENERAL INFO FOR REROUTING/REBOOKING
TO TKTD FLT FOR THIS FARE ARE AS BELOW**

- 1- REISSUE EQUALS TO REROUTING**
- 2- REVALIDATION EQUALS TO REBOOKING**
- 3- CHANGE OF AIRPORT WITHIN ONE CITY
DOES NOT CONSTITUTE AS REROUTING**

CHANGES

ANY TIME

CHARGE SEK 600 FOR REISSUE.

NOTE -

ORIGIN/DESTINATION OF THE FARE COMPONENT MAY NOT BE CHANGED.

RU.RULE APPLICATION

FARE BY RULE

BETWEEN AREA 1/AREA 2.

Stop Over

- If Sabre; try WFRF. If ok, go for it.
If ATC/WFRF does not work, continue below.
- Check PE- section, is it possible to change? See if it might say anything about Stop over.
- Check SO- section, is stop over allowed? In that case, where and is it against any extra fee?
- If allowed, manual calculation with all fees and differences.
