Reclame Aqui

Reclame Aqui is a website that enables its users to post complaints about products and services offered by various companies. It is considered the official channel of the Brazilian consumer on the internet to which Brazilians contact directly, instead of our official channels. If a consumer wants to reach out to a company that does not have an account registered with Reclame AQUI, they can do so. In this case, they will have to register the company on the website with some basic information they have about the business. Reclame AQUI will then create a company profile for said business and whenever a new complaint or inquiry is posted, the business will be notified. Sometimes, however, consumers might not add the correct e-mail address and businesses might be missing all the notifications sent to them.

Brazilian market is quite demanding and they want to see immediate action, otherwise they chase us legally. They follow the local legislation to use against us.

ATTENTION: Our customers somehow find and use an address and telephone number to contact us, but there is no correspondence as we have no office there and they call us a fraud.

How to locate the reviews

- Select the option 'Tickets' and choose on what you will be working from the drop-down menu. Please select one of the below options:
 - **Nao respondidos:** Reviews that have not been checked yet.
 - **Respondidos:** Reviews that we have responded from us, but the customer has not finalized the evaluation.
 - **Avaliados:** Reviews that are finalized and the customer has evaluated our assistance.

- Once all the reviews will appear, you need to start working on them based on what you have been assigned on.

ID	RA ID	Criado em	Modificado em	Consumidor	Título	Status	Origem	Atribuição
61		21/02/23 08:23	21/02/23		Não cancelaram a compra dentro das 24 horas	Não respondido	RA	...

In order to open the review, please click on the subject under Título line, depending on the request you want to check.

Always assign the review you are working on to your name, by clicking on the drop-down menu under Atribuição and select your name.

Atribuição

All cases are collected in a file with Order number, reason, ID, progress. Friday checking the in progress.

Step 4

Solution

[Parent step: 1](#)

Register Errand

Errand Path:

Channel: 6: Social Media

Category: The category is selected based on what is the request received.

Type: The type is selected based on the category.

Action: The action is selected based on the type of request.

Errand information required:

- Website: Reclame Aqui ID:
- Progress:
- Date:
- Post:
- Reason of request:

ALL reviews must be registered and replied regardless of their type.

ALL reviews must be responded in the same language as the customer refers to.

Register errand when you check a new review, when the review is in progress and when it needs scoring.

Errand note for scoring:

sent for evaluation: yes/no

date of sending:

website ID:

Tips of handling the complaints

Tips of handling the complaints

According to the statistics Mytrip is receiving most of the complaints, whereas Gotogate has a small amount of complaints per day.

24h Cancellation: We are not always able to claim the tickets on time, in such cases we advise that we have to follow the fare rules of the airline and the Terms and Conditions the passenger accepted. If the customer insists we can advise to contact CR.

Complaint for SC support being only in English: You can advise we are doing the best we can to assist and due to the big workload such requests currently are handled in English language.

Issues with airline locators: Once the confirmation email is received the majority of passengers do not know how to use it or they have difficulties with the airlines website to retrieve their bookings. Most of the cases with this issue appear to be with GOL (G3). Please remember to share PNRs in private message.

Try to handle the case end-to-end. If call back is required, you need to contact the customer. If no reply by the first call you can send email from edvin. You can reply to the review as well.

Contact airline for some requests.

If the **request is placed on support** and it is something that can be handled from the agent assigned on this task, you may proceed with the handling and remove it from the support queue, otherwise you may inform the passenger that this request is more demanding and our support team is checking it and they will be informed eventually.

Refund delays: The escalation to SL through RD has the same priority as all the other requests. In case you are facing a more demanding case, you can escalate it to your Manager/ Team Leader/ Supervisor/ FL Coordinator.

For **rebooking** requests we do not reply through the platform nor we send email to the customer, unless we have contacted them through outbound call and they are aware that we will be sending them a payment link.

On each complaint we provide only one reply to the customer even if they reply back, we do not continue the thread.

Templates

Add the templates for the score.

If you need to use a standard reply of a fixed template, please use this [link](#).

Step 7

Solution

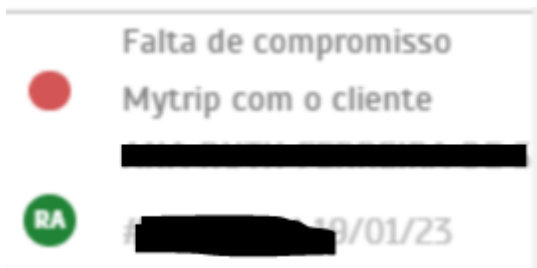

Parent step: 2

Handling of the reviews

Once you have opened the review you are assigned on, follow the below handling:

New review:

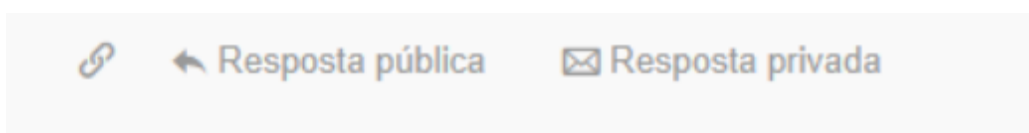

All reviews that are new and not answered are in red colour.

1. Read the review carefully and check if any attachments are sent as well.
2. Try to identify the order in Edvin.
3. Read the history of the previous errands (if any) and assist the customer based on the relevant processes/policies.
ALWAYS call the customer for urgent requests and whenever we are within a time of the day that is appropriate to call.

4. Once you are ready to reply you can select either:

- **Resposta pública:** Reply publicly to the customer. We use it whenever the case has been finalized and no further action is required after we provide the response to the customer.
- **Resposta privada:** Reply to the customer through private message. We usually use it when we need to inform the customer that we are in progress or some kind of limited information without the case being finalized.

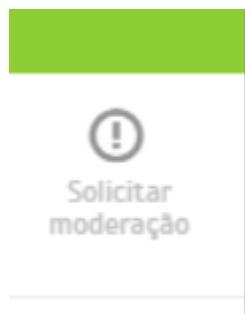

5. Add the tag that describe the reason of contact the best. For more information about the tags, click [here](#).

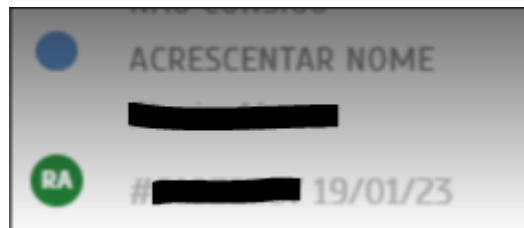

If the review is favorable you can send an evaluation to the customer through the star icon 'Marcar avaliação favorável' on top of the page.

If the review you are handling is duplicate, comment for another company and review for actions that we are not eligible to make (schedule change), you can click on 'Solicitar moderacao'

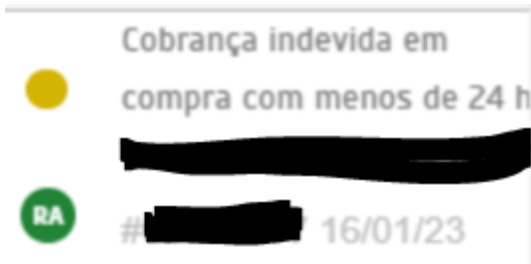

All reviews that have a response from us are in blue.

Review with customer response:

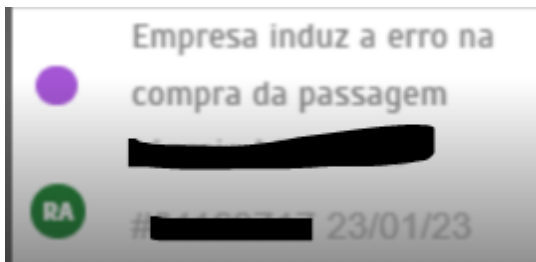

All the reviews that have more than one response either from us or the customer are in yellow.

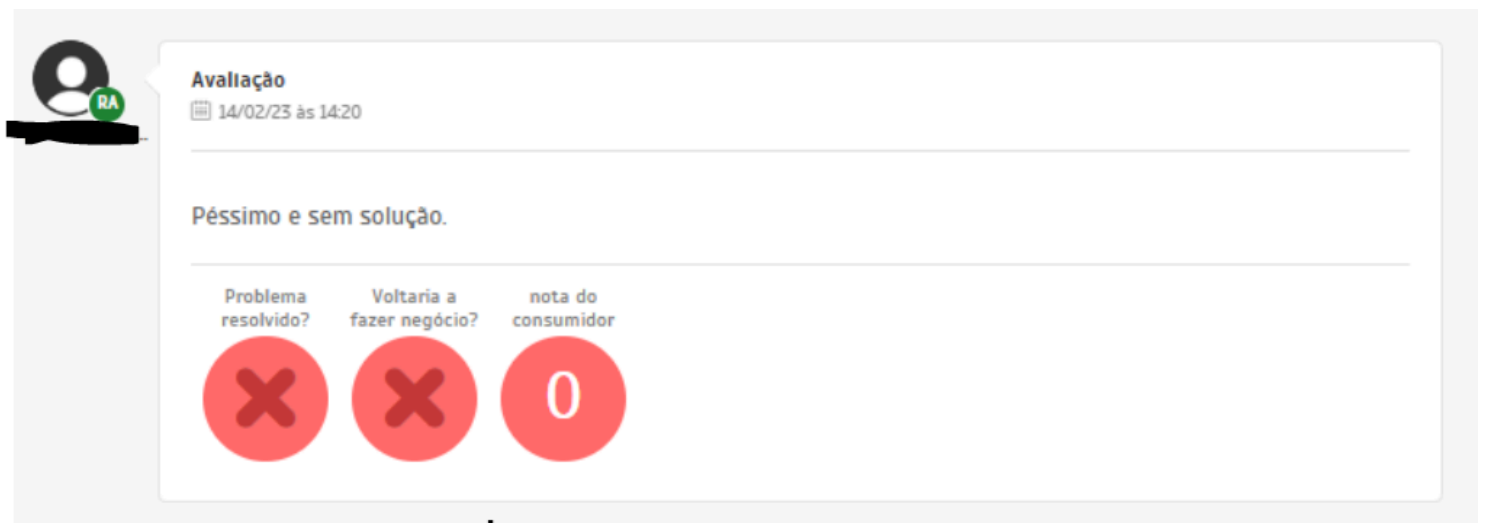

1. Read the review carefully and check if any attachments are sent as well.
2. Try to identify the order in Edvin.
3. Read the history of the previous errands (if any) and assist the customer based on the relevant processes/policies.
4. We do reply back in all the cases that can be solved and can be considered as finalized. We do not need to reply back to any customer response that is offensive or we have already answered on what needs to be done and the customer insists.

Evaluated review:

All the reviews that have been evaluated from the customer negatively are in purple colour.

Negative review will be shown as per below:

All the reviews that have been evaluated from the customer positively are in green colour.
