4. Agents: [Jira Dashboard](#)
5. Inhouse FL/QA: [Jira Dashboard](#)
6. Outsource FL/QA: [Jira Dashboard](#)
7. RL Recovery: [Jira dashboard](#)

Issue types:

"Technical Error"

This issue type should be used when authorization is needed for a reason code from the manager or supervisor due to a tech error.

"SV Callback"

This issue type should be used when a customer insists on speaking with a Supervisor regarding a mishandling/complaint.

"Human Error"

This issue type should be used when mishandling has occurred and authorization is needed for a reason code from the manager or supervisor.

"Goodwill"

This issue type should be used when authorization is needed for a "Goodwill" reason code from the manager

or supervisor.

"Goodwill - Fee Waiver"

This issue type should be used when authorization is needed for a fee waiver from the manager or supervisor.

Jira Dashboards View based on Role - Retail Loss

Here you will find what the dashboard looks like based on your role, please choose from the below options:

1. Managers (UPA) Step 6
2. Managers (ATH) Step 2
3. Managers (IN inhouse) Step 5
4. Agents Step 4
5. Inhouse FL/QA Step 7
6. Outsource FL/QA Step 8
7. BO/QA Step 3

Step 2

 Solution

Parent step: 1

Managers (ATH) - Dashboard Overview

RL: for managers ATH

Filter Results: RL: ATH unresolved with PAX at the airport

Filter Results: RL: Pending review - My Backlog

Filter Results: RL: Pending approval after recovery

Two Dimensional Filter Statistics: RL: Approved but not Done (ATH & CNX)

Filter Results: RL: My in progress

Filter Results: RL: Recovery - My in progress / waiting reply

You can find the Backlog on the left:

RL: ATH unresolved with PAX at the airport: all the issues that are still unresolved and they need to be handled with the highest priority, since the passengers are already at the airport

RL: Pending review - My Backlog: all the issues pending to be reviewed in status **"Backlog"** that have been assigned to you

RL: Pending approval after recovery: all the issues that have been in status **"Recovery Finalized"** and are not fully recovered or have been in status **"Incorrectly sent to recovery"** and are assigned to you for approval

Two Dimensional Filter Statistics: RL: Approved but not Done (ATH & CNX): all the issues that are in statuses **"Approved"** or **"Abandoned"** but their status has not been changed to **"Done"** yet distributed per person that has approved them

RL: for managers ATH

Filter Results: RL: ATH unresolved with PAX at the airport

Filter Results: RL: Pending review - My Backlog

No matching issues found.
