1. Trustpilot
2. Register Errand
3. Handling of the reviews
4. Trustpilot Tagging- Categories to use
5. Standard replies - Templates
6. Login and locate the reviews

Step 1 - Starting point

Question No linked steps

Trustpilot

Trustpilot is a digital platform that brings Businesses and Consumers together for better cooperation from both parties. In Trustpilot, the Customers publish their reviews for our products and services, some of which can be highly complementary and others highly critical. The more our customers use the platform and share their opinions, the better scope we get, in order to enhance our business growth.

Although we do receive criticism on Trustpilot we should answer criticism point-by-point and write in a positive and constructive tone, as in the example below. You should never forget that these are our customers, and we want them to use our services and products again. **Trustpilot is NOT handled as a support channel**, this is only our review site. We must reply to only 1-3 star reviews. In case you come upon a review that needs further communication with the customer (ex. rebooking case), please advise the customer to contact us through the usual channels (phone, website form). We have to Tag all reviews with the correct Category.

Trustpilot

1. Login and locate the reviews Step 6
2. Register Errand Step 2
3. Handling of the reviews Step 3
4. Trustpilot Tagging - Categories to use Step 4
5. Standard replies - Templates Step 5

Step 2

Solution Parent step: 1

Register Errand

Errand Path:

Channel: 6: Social Media

Category: 27: Trust Pilot

Type:

1: Customer Claim

2: Positive Review

3: Neutral Review

Action:

1: Review Answered

2: Review Sent to Support

Errand information required:
- Reviewer's name.
- How many stars does the review have?
- Tagging used.
- A small summary of the content of the review and our actions (if any).

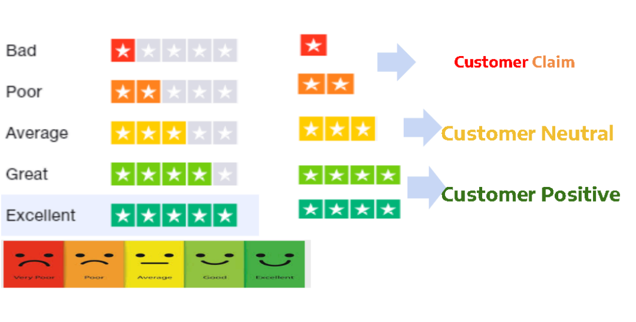
ALL reviews must be registered and replied regardless of their type.

Step 3

Solution Parent step: 1

Handling of the reviews

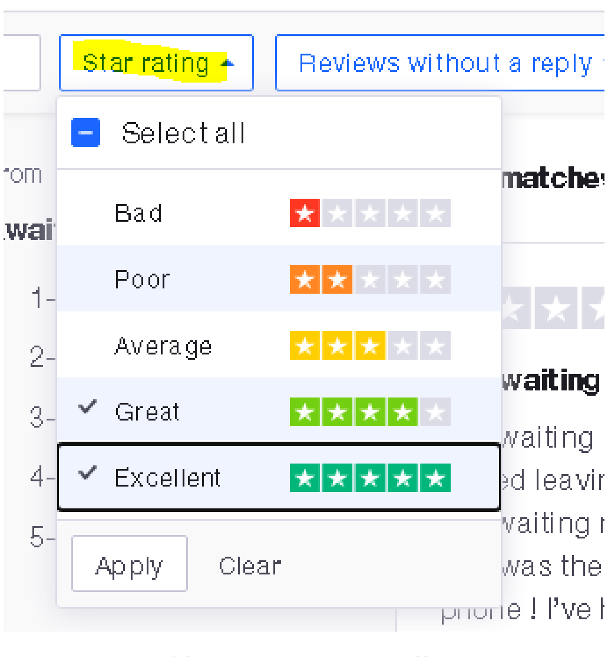
The reviews are separated as per below:



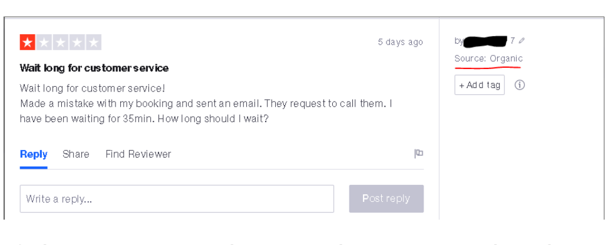
If the volume that needs to be handled is not excessive, you can skip the filtering per review category and reply accordingly as per the instructions.

Select 'Star rating' to filter the category you will be working on.

Only 1-3 star reviews should be handled and we must respond to them.



- Do not filter 'Great'/ 'Excellent' reviews(4-5 stars) no response is needed
- Continue with the 'Bad/ Poor' reviews:
  - If there is no order number, we request booking details and leave an errand in 'Register New Errand' inserting only the name and the type of request.



Wait long for customer service

Wait long for customer service!
Made a mistake with my booking and sent an email. They request to call them. I have been waiting for 35min. How long should I wait?

  - If there is an order number or any booking details or Trustpilot reference, make the investigation normally and reply to the customer. Use the reference on the right to open order in Edvin. (Usually reviews come after the event the customer refers to.)

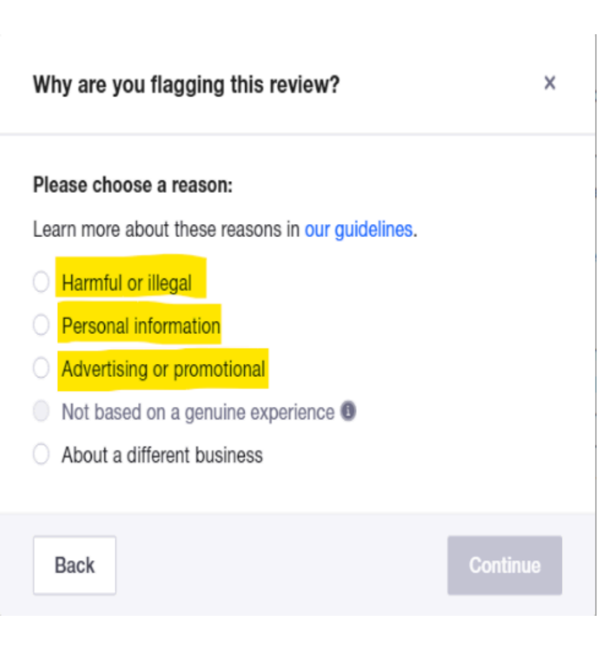
Reference number: 1[redacted]

  - For requests on refund delays through Trustpilot, we have no special priority other than in the normal requests. If a case needs to be escalated to SL, use the same errand path as in the other requests.
  - We never send a direct apology to the reviews as any reply of such can be used legally against us. All the replies have generic phrasing and wording. You could use the phrase though 'We are sorry you are dissatisfied with the service provided.'.
- 'Average reviews'- Usually it is not possible to reply through a template. If there is a request we reply the same way we do on the bad reviews or if it has a positive tone you can thank them.

Once you reply to the review, you must select a tag based on the request you handled. Only one tag can be seen, if more than one tag is inserted, then only the first is taken into consideration.

If the customer's review needs additional handling such as contacting the customer due to our mishandling or any other objection that can be turned around make sure to add it to the queue by using the correct errand path as stated here and then place it on the correct Support queue in Edvin. Please note this is possible only if the customer mentions the order or PNR nr in their review.

Until further notice, please avoid using the 'Report' button, unless the comment sent is very aggressive and racist. Critical thinking should always be used in such cases.



Why are you flagging this review?

Please choose a reason:

Learn more about these reasons in our guidelines.

○ Harmful or illegal
○ Personal information
○ Advertising or promotional
○ Not based on a genuine experience
○ About a different business

When we report a review, the Trustpilot team investigates the reporting and informs us via an email in case they approve the report or not. If the report is approved the review gets deleted and so is the rating.

ATTENTION: You should be reporting reviews as 'Harmful or illegal' if they are threatful towards a company's individual. Once the incident has been reported to Trustpilot, it is also very important that you report it to your Manager as well.

Guidelines for the Support agents

When an order is sent to Support for further investigation and handling, the Support agents are supposed to check the errands and handle the case based on the standard routines of Support. All the guidelines can be found under FL Support.

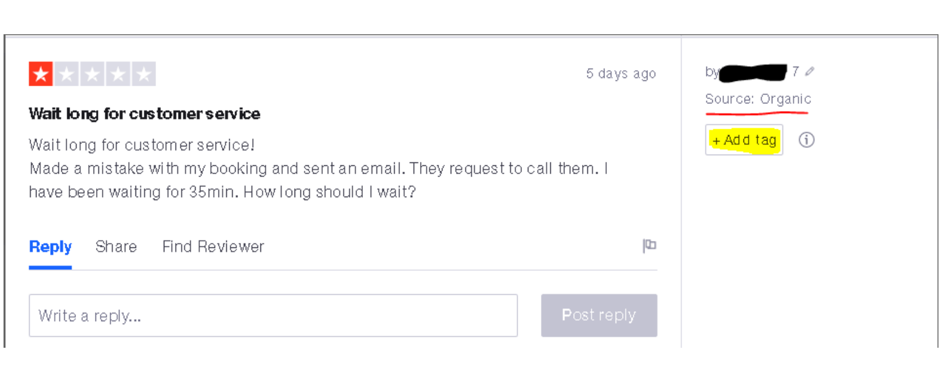
Once the Support agent calls the customer and solves the case with them, the Support agent should also propose to the customer to adjust their review and rating on Trustpilot.

Step 4

Solution Parent step: 1

Trustpilot Tagging- Categories to use

All the reviews on Trustpilot must be tagged with a category. Look at the list below and use the one that is relevant for the review. Remember to Copy-paste from this form, as the Tag must be identical for the statistics to be accurate.



Wait long for customer service

Wait long for customer service!
Made a mistake with my booking and sent an email. They request to call them. I have been waiting for 35min. How long should I wait?

by[redacted] 7
Source: Organic

In case this tagging is not needed for the brands you work on, please ignore this step. For now the only brands that require tagging are Mytrip, Gotogate and Flightnetwork.

DO NOT use capital letters or wrong spelling other than the categories below as it will be considered a different tag word.

Tag to use	Explanation - When to use
addons	Complaints about the amount or conditions of addons on the website. Before or after purchase.
overcharged	Price change during/after the booking, fare increase /Fare Hike
baggage	Question/complaint regarding bag info, bag not included during flight, baggage addition price.
creditcardfee	Additional payment type fee. complaint/question /discount not provided for some payment types.
service	Complaints regarding the service provided by our agents (rudeness, wrong information, long hold etc).
language	Language barrier issues, preferred language not available.
handlingdelay	Delay in providing a reply or when handling errands (customer already reached us but a reply is not provided - for example stuck in support queue or email not answered).
unreachablesupport	Cannot reach support through the **phone lines**.
refunds	Refund delays/refunded less.
schedulechange	Complaint related to inconvenient flights/schedule change fee/handling delay**.**
resproblem	Tickets not issued due to technical reasons - email sent that ticket was not issued/customer saw error during booking process.
payment	Payment did not go through/payment questions
wrongname	Complaint about wrong name or name correction procedure.
wrongflights	Customer claims Different flights selected / or bug have selected different flights.
website	Website inconvenience/no clear information /popups
chargednobooking	Payment went through, no tickets received.
farerules	Customer do not agree with them
caserequest	Customer is contacting us regarding a request they have (not a complaint).
positive	The review is positive.
other	When any other category is not applicable.
invite	Temporary - only used for specific test purposes.

Step 5

Solution Parent step: 1

Standard replies - Templates

If you need to use a standard reply of a fixed template, please use this link.

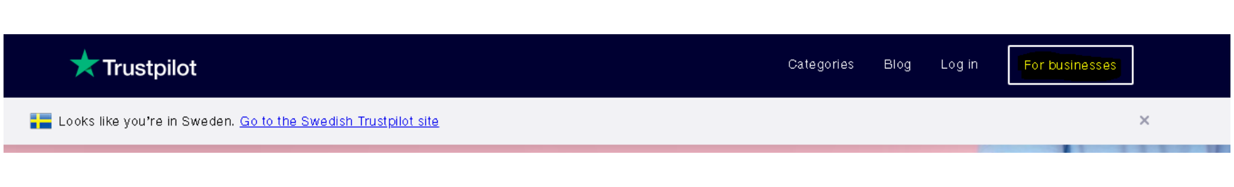
Step 6

Solution Parent step: 1

Login and locate the reviews

1. For the Trustpilot page, please use the link: https://www.trustpilot.com/.

2. Click on 'For Businesses' button on the top right corner.



Looks like you're in Sweden. Go to the Swedish Trustpilot site

3. Login to the account using the credentials you will be provided.

4. Select the brand/ domain you are assigned to work on.

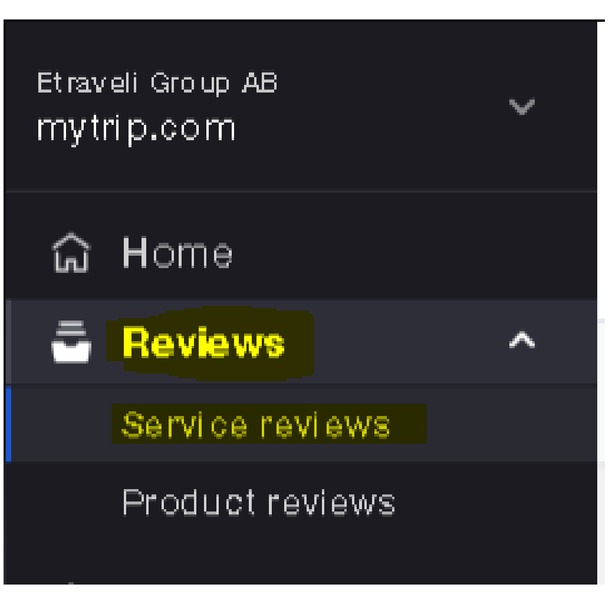
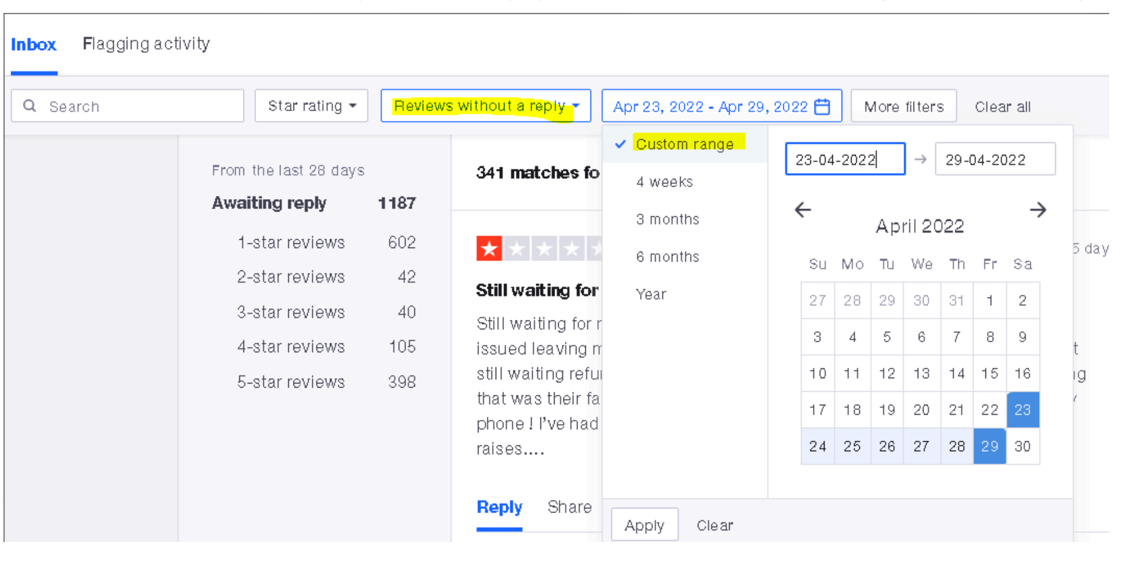
How to locate the reviews

- Select 'Reviews' and 'Service reviews' in order to find the review filters.



- Select 'Reviews without a reply' and 'Custom range'. In the calendar you have to select based on the current date the reviews starting from the closest Saturday (ex. If you are assigned on the Trustpilot reviews on Wednesday 5th of May, you need to start checking from Saturday 1st of May.).



Reviews without a reply
Apr 23, 2022 - Apr 29, 2022
Custom range
23-04-2022 → 29-04-2022

From the last 28 days

Awaiting reply	1187
1-star reviews	602
2-star reviews	42
3-star reviews	40
4-star reviews	105
5-star reviews	398

- Once you have selected the range of dates, you may start working on the reviews.

ATTENTION: Please have two tabs of Trustpilot in order to not lose your progress as it takes some time for the reviews you replied to be updated. Refreshing the page or closing it immediately after the review will not save the replies already written.
