

Start by cancelling PNR in GDS and inserting the ghost line.

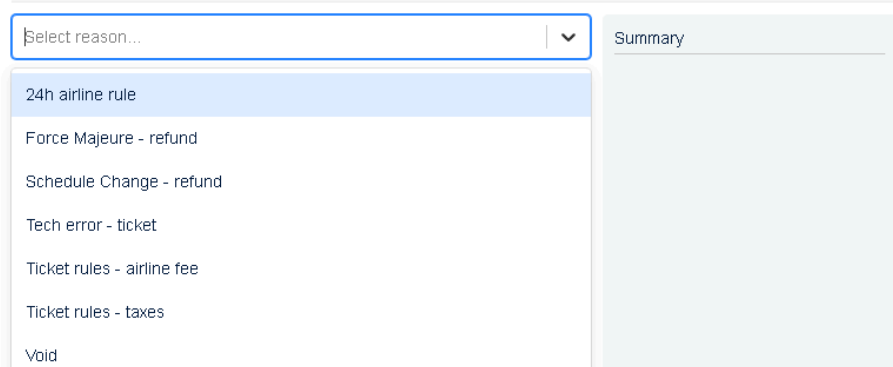

****IMPORTANT**** Please refer [HERE](#) when it is an Amadeus PNR for instructions on Automatic segment removal and ghost line addition.

1. Click on button 'Modify order' in Edvin.

2. Select the cancellation reason from the drop down:

Modify order - Select reason

The image shows a modal window titled 'Modify order - Select reason'. On the left, there is a dropdown menu with the placeholder text 'Select reason...'. Below the dropdown is a list of seven options: '24h airline rule', 'Force Majeure - refund', 'Schedule Change - refund', 'Tech error - ticket', 'Ticket rules - airline fee', 'Ticket rules - taxes', and 'Void'. The '24h airline rule' option is currently selected and highlighted in light blue. On the right side of the modal, there is a tab labeled 'Summary'.

3. Fill out all mandatory fields and leave notes and other info to BO:

Note:

24h airline rule:

Check in Edvin documents for each airline. We know one airline, TP, that charges a penalty for 24h rule,

please note this airline fee/penalty in the notes to BO, as there is no field for airline fee in the wizard for this. Also check information if you need to put booking on Refund queue- urgent in Edwin.

Ticket rules - Taxes:

Our refund service fee for FR market for taxes is 20% of refundable amount, please note this in the notes to BO as there is no field for handling fee in % in the wizard.

Penalty in percent:

Choose 'Enter fee in percent' instead of a specific currency.

LCC tickets *where we don't know the airline penalty*:

Choose 'LCC Fee unknown' instead of a specific currency.

For more information on the cancellation reasons, please check here: [Cancellation wizard & cancellation reasons](#)

7. Enter our Handling Fee:

Remember for CC2C orders need to collect our cancellation service fee before we cancel the order, as we will not be able to deduct the fee at the time of refund. More information can be found [here](#).

8. In cases where the Airline has an authorization/waiver code it is crucial to include this and correctly during Modify order. Failure to do so will affect BO processing the refund and QA evaluation.

Modify order - Fill out information

If applicable, please insert auth from the airline.

Confirm

For CC2C orders and cancellation reasons where service fee must be paid by the customer before we cancel the order, there is an additional checkbox that must be confirmed before we create the refund case.

Modify order - Confirm

Please confirm that the following tasks have been completed before proceeding with the refund:

- ☐ Added ghost line in GDS
- ☐ Closed all open cases in Etrack
- ☐ Cancelled segments in GDS
- ☐ CC2C order, refund fee charged and paid by the customer

Done! Order now has status Cancelled, Register Errands is done and refund case has been created and is on Edvin queue to BO refunds team.

Order is changed

****Remember to send a cancellation confirmation email to the customer using the 'Send Email' button and choose correct email template****

If a passenger contacts us from a different e-mail address than the one registered in Edvin and confirms a cancellation, please note that the confirmation of cancellation needs to be sent from Edvin to both the original e-mail address and the one we have received the request from. This rule applies for every case scenario where the e-mail address is different than the one stated in Edvin and the reply needs to be sent from Edvin.

Send Email

- It is possible to send an email in Edvin to multiple recipients. Just add the email addresses in the '**Address:**' field.

- The process is to always send to the cancellation confirmation email to the address registered in the booking by the customer at the point of booking.

If another person/traveler wants the confirmation you should send to both addresses (i.e. not only the 'new' email address of the person requesting the confirmation email).

Note for multi-PNR orders:

1. If **all** handled PNRs are cancelled with the same cancellation reason, run the Modify order only once and select all applicable segments. This way, **only one** refund case will be created and **only one** errand will be added in Edvin.

Example:

PNRs X and Y of the same order are both cancelled due to SC.

We only run the Modify order once with cancellation reason Schedule change.

2. If we have PNRs that are cancelled with different cancellation reasons, then run the Modify order **once for each cancellation reason**. This way, each refund case will contain the correct segments and cancellation reason. **ATTENTION:** for any errands registered after the first one, the errand path for Already handled must be used (even via the Modify order)

Example:

PNR X is cancelled due to FM and PNRs Y and Z of the same order are cancelled due to TKT rules.

We run the Modify order once with cancellation reason FM, select the segments for PNR X and register the regular errand. Then, we run the Modify order again with cancellation reason TKT rules, select the segments for PNRs Y and Z and register the Already handled errand.
