Step 3

Step 2

Solution Parent step: 1

Fees applicability per scenario and request type

ATTENTION: Below are the standard handling scenarios. For exceptions due to local legislation, check the following chapters of this decision tree.

For the current fee structure and applicable fees check [here](#).

Differing booking scenarios and respective service fees depending on the customer's request:

- 1. Booking with at least one canceled segment in GDS itinerary (segment status UN), for which the airline has not proposed any alternative option
 - **Cancellation request:** inform about the respective involuntary service fee per passenger if applicable. This applies regardless of the refund policy (full refund or refund by the fare rules). The fee will be automatically deducted during the payout. Exception CC2C orders, check routines [here](#).
 - **Rebooking request and flight affected by FM situation:** for requests before 3 April 2023 apply the respective involuntary service fee per passenger during standard FM rebooking routines. For requests **on/after 03 April 2023 NO FEE** applies for FM rebooking.
 - **Rebooking request and flight affected by SC (no related TA under FM designated docs):** for specific guidelines of fees applicability for Schedule change cases, check [here](#).
- 2. Booking with at least one canceled segment in GDS itinerary (segment status UN) for which the airline has offered EMD Voucher or Open ticket option
 - **EMD voucher OR open ticket request:** don't apply any fees for EMD issuance/conversion to open ticket, BUT when the customer will come back to redeem the EMD/rebook the open ticket, apply the respective involuntary service fee per passenger. For requests **on/after 03 April 2023 NO FEE** applies for FM rebooking with voucher.
 - **Cancellation request:** inform about the respective involuntary service fee per passenger. This applies regardless of the refund policy (full refund or refund by the fare rules). The fee will be automatically deducted during the payout. Exception CC2C order, check routines [here](#). For requests **on/after 03 April 2023, NO FEE** applies for Force Majeure cancellations.
- 3. Booking with confirmed flights, where there is no change to the itinerary (segments status HK), but the airline offers FM policies visible in *COVID-19* or *FM travel alert* docs according to which customer is eligible for rebooking without change fee and cancellation with full refund. For requests **on/after 03 April 2023, NO FEE** applies for Force Majeure cancellations and rebooking.
 - **Cancellation request:** inform about the respective involuntary service fee per passenger. The fee will be automatically deducted during the payout. Exception CC2C order, check routines [here](#).

- **Rebooking request:** apply the respective involuntary service fee per passenger during standard FM rebooking routines.

ATTENTION: If the airline offers a flexibility in the fare rules, according to which the penalty is waived BUT no policy is visible in COVID-19 /FM travel alert related docs, you have to charge the standard voluntary rebooking fees per person!

4. Booking with at least one canceled segment in GDS itinerary (segment status UN) for which the airline has proposed a valid alternative (segment status TK) or the booking has a direct alternative segment (segment status TK) without cancellation status

- For specific guidelines of fees applicability for Schedule change cases, check [here](#).

Step 3

Solution

Parent step: 1

Involuntary fees SC/FM FAQ

1. The customer is unwilling to accept our involuntary service fee. What should I do?

This is a service fee we charge to assist and process the customer's request. If needed, the agents can redirect the customer to our [FAQ](#) on-site where this is explained as well. For helpful phone scripts check [here](#).

It is not allowed to redirect the customer to our Customer Relations Department and encourage them to raise a claim there. If needed to escalate a case, this should be done to the respective Team Lead/ Supervisor.

2. Which fee should we charge in case of cancellation due to FM where the airline provides rebooking flexibility/open or voucher, but the cancellation has to be done by the fare rules?

If the order is FM affected, NO fee applies, regardless of the YY policy for refund (full refund or refund by the fare rules).

ATTENTION: By FM affected we mean a booking that falls under FM policy announced either via FM TA or COVID-19 docs in Edvin. Below scenarios are considered FM affected:

- There is at least one UN segment in the PNR and there is an FM policy allowing a full refund.
- There is an HK segment in the PNR and there is an FM policy allowing a full refund.
- There is a UN segment in the PNR, BUT the airline is NOT offering a full refund. Nevertheless, this information is stated in the policy under FM-related docs.

3. Do we update the templates manually in regards to the involuntary cancellation service fee?

Answer: No, you do not need to update the wording of the template manually. You only need to insert the amount of the respective involuntary cancellation fee in the local currency of the customer. For the pricelist check [here](#).

ATTENTION: for exceptional handling markets/airlines, if the template includes the service fee field, you shall insert 0.

4. Are the involuntary service fees charged per order or per person?

All involuntary service fees are charged per person. The only exceptional waiving routine may be applied for customers who have raised their requests prior to the fee restructuring and have complained about different fee value. For the related routine check [here](#).

5. Are the involuntary service fees applicable for LCC bookings?

Yes, involuntary service fees are applicable for orders including LCC bookings.

6. Are the involuntary service fees applicable for B2B partners?

Yes, involuntary service fees are applicable for B2B partners **with the exception** of B.com orders.

7. What should I do if the customer has a flexible ticket?

Order falls under Force Majeure scenario: The customer can choose either to use the flexible ticket or to keep it for further changes. For detailed guidelines check [here](#).

Order falls under Schedule change scenario: Passenger is not able to use flexible ticket in case of

schedule change. Follow the general guidelines [here](#).

8. What should I do in case of Multi PNR if only the outbound PNR is FM affected and eligible for a full refund but for the inbound PNR which has HK segments, no FM policy was announced and the cancellation has to be processed against fare rules. Which fee shall I charge for cancellation?

If one of the PNRs is not FM affected then the standard voluntary cancellation fees will apply.

ATTENTION: By not FM affected we mean a booking that has all flights confirmed (HK status) in the PNR and does NOT fall under any FM policy announced either via FM TA or COVID-19 docs in Edvin.

9. What should I do if one PNR is eligible for a full refund due to SC/FM and the other PNR is cxi /refund against fare rules only? Which fee shall I charge for cancellation?

If the whole order is canceled due to FM and the 2nd PNR is FM affected, however, the airline does not offer a full refund then we need to cancel and apply only our involuntary cancellation service fee if applicable.

ATTENTION: By FM affected we mean a booking that falls under FM policy announced either via FM TA or COVID-19 docs in Edvin. Below scenarios are considered FM affected:

- There is at least one UN segment in the PNR and there is an FM policy allowing a full refund.
- There is an HK segment in the PNR and there is an FM policy allowing a full refund.
- There is a UN segment in the PNR, BUT the airline is NOT offering a full refund. Nevertheless, this information is stated in the policy under FM-related docs.

10. Do we charge the involuntary service fee for orders where the refundable amount is less than the value of the involuntary cancellation service fee?

No, we don't charge the involuntary service cancellation fee, but the customer's order becomes fully non-refundable.

Reminder: check the *CXL service fee waived due to local legislation* [here](#).

11. The airline allows along with the FM rebooking, a free of charge NACO/NACH. What do we charge from our side in such cases?

We charge our involuntary service fee if applicable and standard NACO/NACH handling fee.

12. What should I charge if the pax is calling us the same day as when they booked, flights are confirmed and both the FM policy for HK flights and the void + rebook process can be applied?

You proceed with the void + rebook process along with the relevant voluntary rebooking service fees.

Passengers should be aware of the travel restrictions for their nationality or any ongoing extraordinary circumstances before they book, which means that they intended to travel regardless. Therefore the rebookings cannot be considered FM affected if performed on the same day.

Step 4

 Solution

No linked steps

INVOL fee waiver - cxi with YY (no ETG claim) - (Not in use)

For cancellation requests in regard to orders affected by **Force Majeure**, **Schedule change** and **CXL Protection** scenarios, **if the customer has initiated the refund directly with the airline**, we are **not allowed** to charge our service cancellation fee. This policy applies for all markets and all sites.

Please note for all markets and SC/FM refund requests, we don't charge any fee BUT if the customer initiated the refund with the airline directly, we use a different cancellation reason to skip the part of ETG involvement of claiming the tickets.

Most common applicable scenarios:

- LCC bookings, where ETG can not handle the cancellation and therefore we always refer the customer to the airline directly
- LCC/GDS bookings, where the customer contacted the airline on their own initiative and the carrier has refunded the booking/ticket already without any ETG action

- GDS booking, on case to case basis if for any reason ETG can not assist with the refund of the ticket (i.e.: the airline informs ETG that the customer has to reach out to them directly to initiate the refund)

ATTENTION:

The service fee waiver is applicable only if the ticket refund was initiated by the customer directly with the airline. If a customer has only canceled the segments with the carrier, but the ticket is not refunded, the case is not eligible for this waiver!

For multi PNRs order, the service fee waiver applies ONLY if refunds for all PNRs have been initiated by the customer directly with the airline!

How to identify if the ticket/booking is eligible for waiver?

For LCC:

- Check OTRS/Edvin docs to identify if booking is affected by **FM/SC**
For more details on FM/SC handling check standard routines [here](#).
- ETG can not assist in canceling the booking or customer claims that the booking has already been canceled with the carrier

For GDS:

ATTENTION: Do NOT refer the customer to the airline for refund, unless otherwise stated in Edvin docs!

- Check PNR history/Edvin docs and standard routines to identify if the booking is affected by **FM/SC**
- Check the ticket record. Ticket should show status R/RFND or the ticket record will not be retrievable.
if the ticket can not be opened, check in Edvin if we have received the funds in VAN or with Coordinator
if we have funds in BSP
if no funds visible to us, place on Support queue as per usual routines to verify the ticket status with the carrier

Step by step - how to handle eligible order?

1. Run the order through the *Modify order* button. Choose relevant cancellation reason and run the wizard as per standard routines:
 - b. *Force Majeure refund - no ETG claim* - if booking was canceled due to FM
 - c. *Schedule change refund - no ETG claim* - if booking was canceled due to SC
2. Send a cancellation confirmation email from Edvin.

For FM affected cases: use the template **CXL Conf - FM (LCC or GDS) / No ETG claim** located in folder *Cancellation CXL confirmation Force Majeure*

For SC affected cases: use the template **SC / FM CXL Conf (LCC or GDS) / No ETG claim** located in folder *Schedule change Email after customer's response*.
