

Queue View

Monitor queues

To see the queues and how many customers there are on queue, go to Performance -> Queues Activity.

Now you can see all the queues.

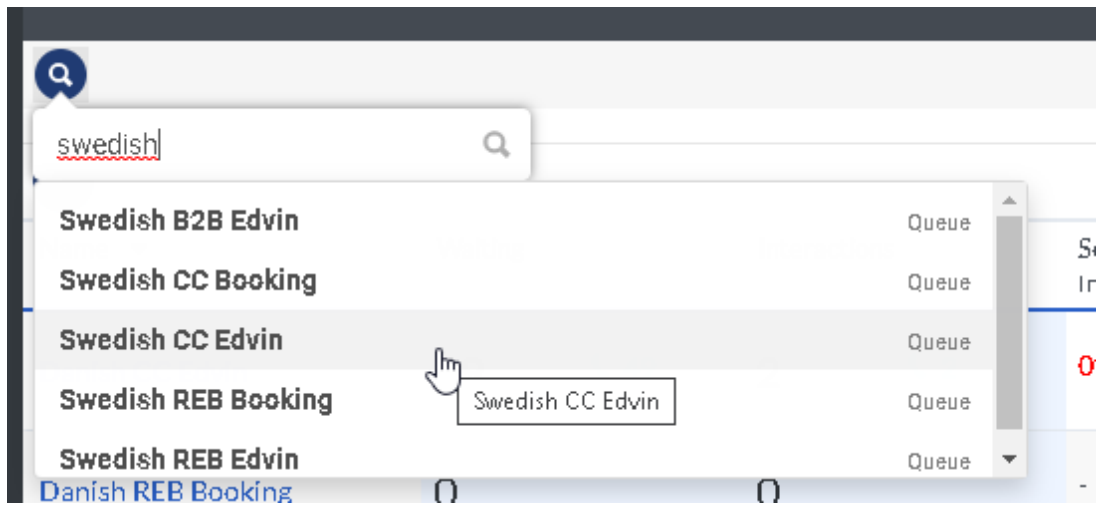

Name	Waiting	Interactions	Service Level % Interval/Day	On Queue	Off Queue	Interacting	Communicating	Idle	Not Responding
Danish CC Edvin	49	1	0% 1%	8	14	9	0	0	0

- Waiting:** Customers waiting in the queue
- Interactions:** Ongoing interactions (calls)
- Service level%:** 30 min interval and for the whole day
- On/Off Queue:** Agents on/off queue
- Interacting:** Agents talking
- Communicating:** Not used ATM
- Idle:** Idle agents
- Not responding:** Agents that are alerted a call but are not answering

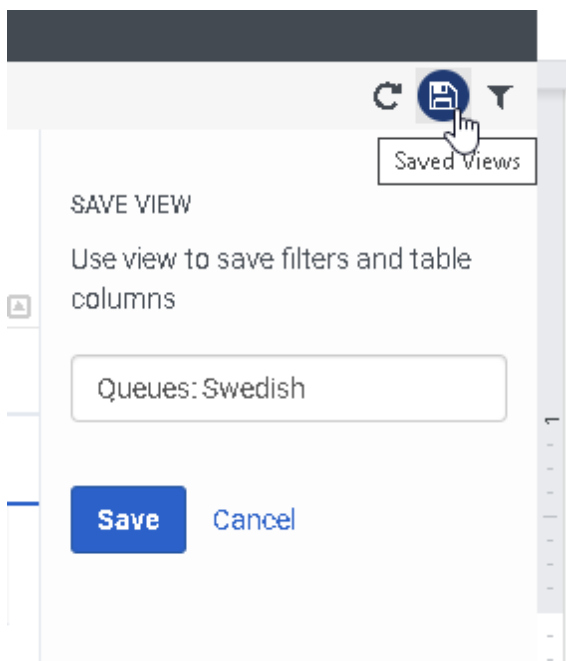

Search for queues and save filters (queue level)

In Performance -> Queues Activity,

Search for queues to add:

Once you have selected your queues, you can save the view to have easy access. Click the disc icon to the right. Name your view and save. You can find your saved views by clicking the disc icon.

View details on a specific queue

In Performance -> Queues Activity,

By clicking a queue name in the Queue Activity view, you can see live data from the queue to the left:

While viewing details for a queue, navigate to the Performance tab to see performance on queue level, in 30 min intervals.

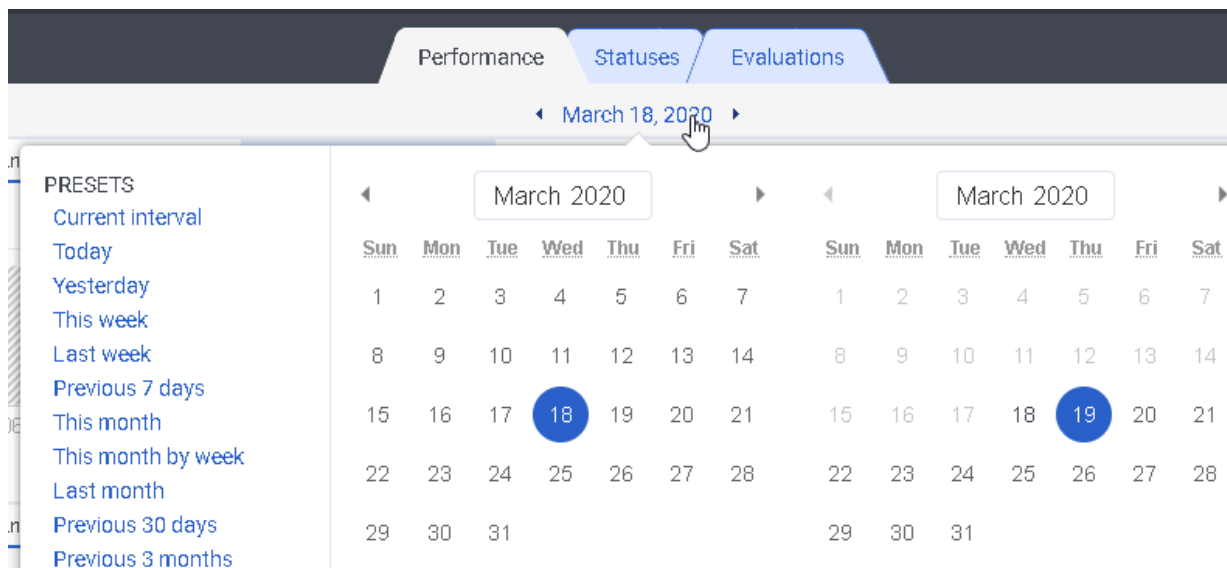

Agent View

Monitor agent performance

Go to Performance -> Agents to view performance and status of agents:

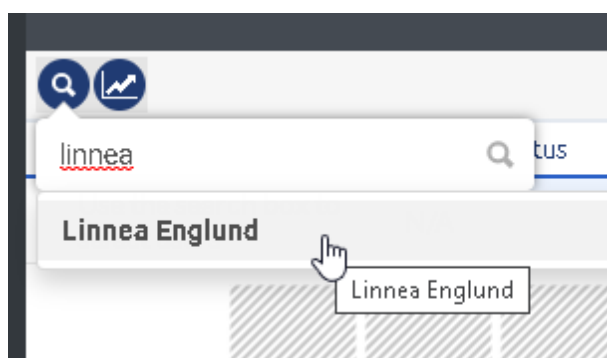

In this view you will see Agent Performance. Change time period by clicking the date at the top:

You will see all agents as default.

Agent	Time in Status	Status	Answer	Handle	Avg Handle	Avg Talk	Avg Hold	Avg ACW
Aggeliki Kontzinou	2 days	Offline	-	-	-	-	-	-
Ahmad Alabichi	3h 19m 58s	On Queue	23	22	8m 19s	5m 8s	-	3m 11s

Alessandro Petrini	2 days	Offline	-	-	-	-	-	-

Search for agents you want to show:

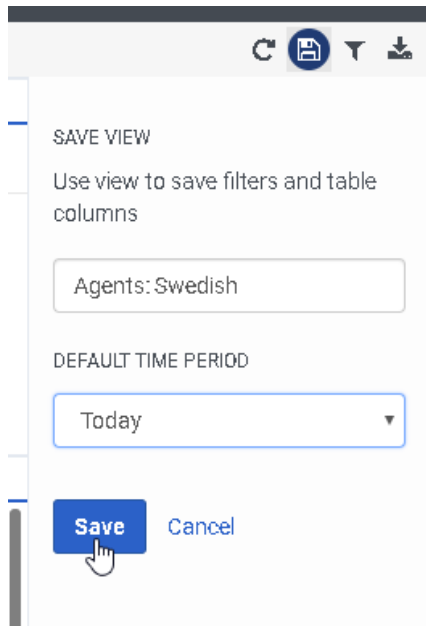

Save a filter view (Agent level)

In Performance -> Agents,

Search for the agents you want to have in your filter.

Save your filter for later by clicking the disc icon on the right. You will access all your saved filters by clicking the disc.

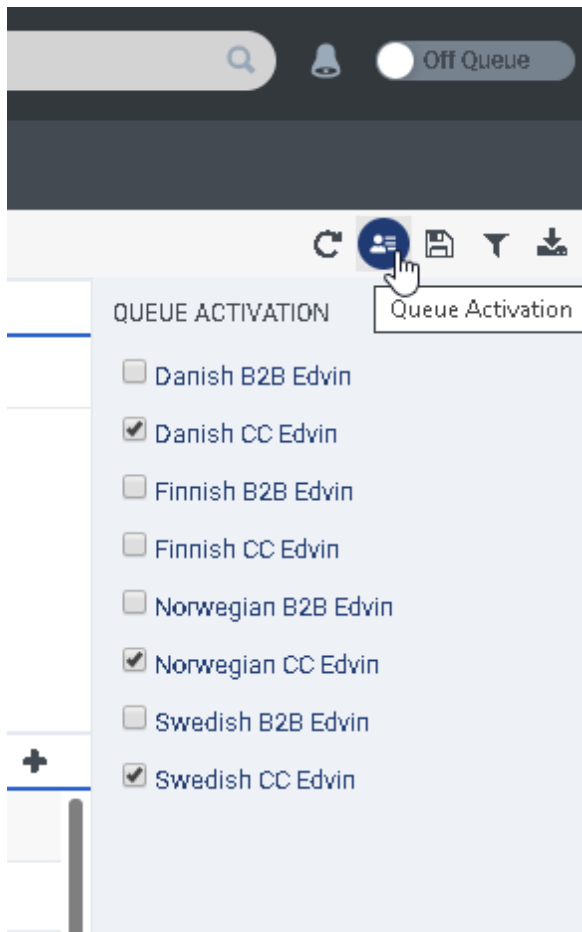

The screenshot shows a 'SAVE VIEW' dialog box. At the top, there is a toolbar with icons for refresh, save, filter, and download. The dialog contains the following elements:

- SAVE VIEW**: The title of the dialog.
- Use view to save filters and table columns**: A descriptive text.
- Agents: Swedish**: A text input field.
- DEFAULT TIME PERIOD**: A label for the time period dropdown.
- Today**: The selected value in the time period dropdown.
- Save**: A blue button with a mouse cursor icon over it.
- Cancel**: A text link next to the Save button.

View Agent details and change agent's queues

From the Performance -> Agent view, click the agent you want to see more details on.

From here, you can easily see and edit the active queues of that agent by clicking the Queue Activation button on the top right:

[View interactions and listen to recordings](#)

June 2020: This feature is inactive

In Performance -> Agent,

Once you have clicked an agent name, navigate to the Interactions tab to see the calls the agent has handled during the chosen time period. By clicking an interaction, you can see more details and listen to the recorded call.

Ways to edit agent queues (skills)

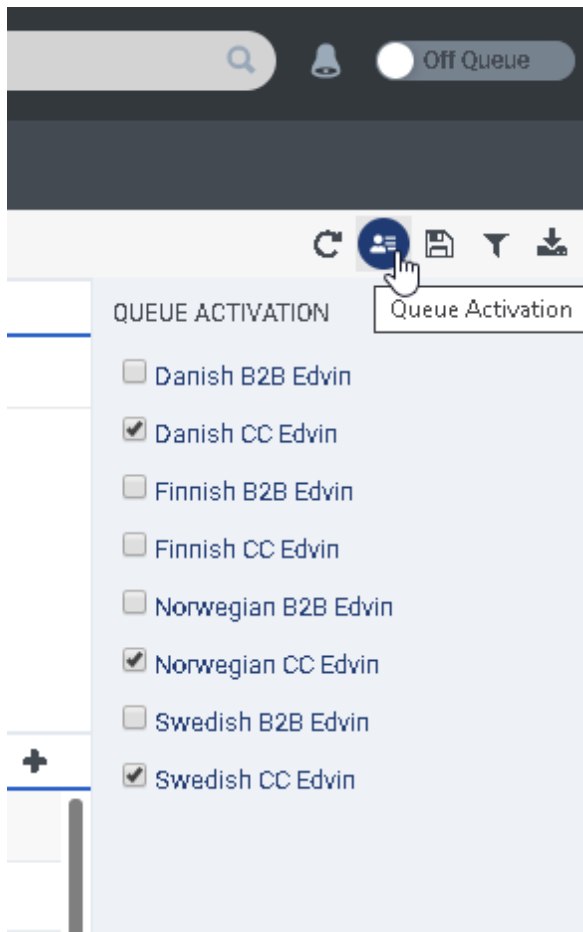

In PureCloud, we work with assigning queues to agents instead of assigning skills to agents.
For agents

Agents can select and deselect their queues if needed by clicking their profile picture followed by the Activate Queues button:

[For supervisors/managers:](#)

1. Through Performance -> Agents
 1. Click the agents name
 2. Click the Queue Activation button on the top right

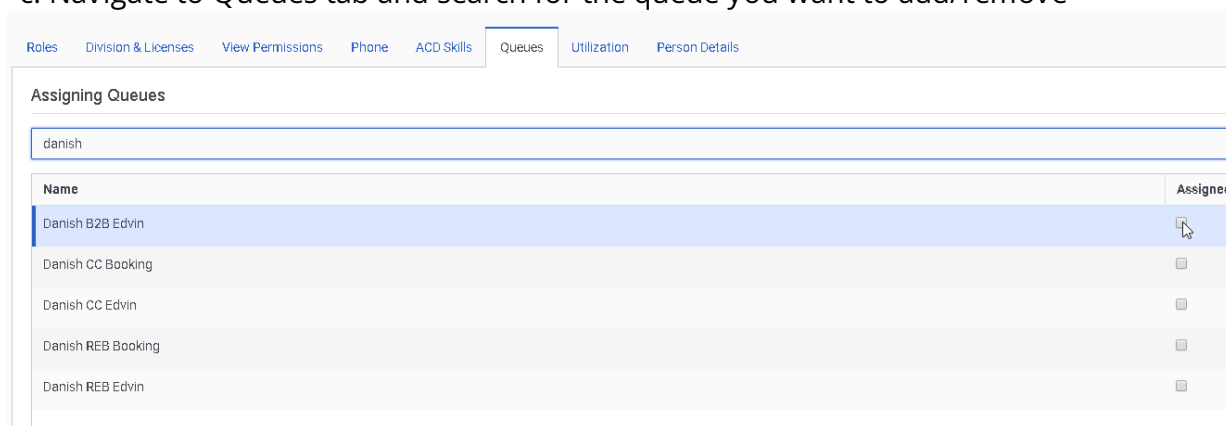

c. Select/deselect queues

2. If you need to make more queues visible to an agent:

a. Go to Admin -> People

b. Search for the agent you want to edit

c. Navigate to Queues tab and search for the queue you want to add/remove

d. The agent can now see the queue in their view and activate/deactivate themselves
