

Now, it is possible to check in Edvin if a price change occurred during the booking flow.

Steps:

1. Click on “Events and logs” and then “Cart price changes”:

2. The price difference will be in detail, as the amount before and after the change will be shown:

#	Created	MakeOrderProcessId	RequestId	Revision	Location	Before price	After price	Price diff	Currency	Before price in EUR	After price in EUR	Price diff in EUR	Action	Reason
1	2023-06-04 20:36:11	[REDACTED]	24 [REDACTED]	15	Before Auth	4565.34	4974.24	408.9	New Taiwan Dollar	139.05	151.51	12.46	Present price change	Not profitable

In this example, the Price before the change was 4565.34 TWD, while the Price after the change was 4974.24 TWD. Additionally, there is the same info in EUR.

3. A clear message will appear if the customers **accept** the change and process the payment:

Customer action: **Accept**.

Additionally, the exact message that customers saw when we presented the price change notification to them, is visible in "Events and logs" and, specifically in "Order/Cart Events":

And by pressing "Continue after Price Change", the exact text can be seen:

Old price: 14675.30 INR

New price: 16145.30 INR

Displayed to customer in price change dialog: Unfortunately, your ticket is no longer available at the selected price. The price has changed to ₹ 16,145
