

We have now moved the supervisor call process from RL Jira to an Edvin queue.

ALWAYS REMEMBER TO:

1. Check with TL/Coordinators when unsure/need help
2. Try to de-escalate the situation with the customer

Steps for the first escalation:

1. Pax calls
2. Check Shelf and inform pax
3. If pax insists to speak with a Supervisor (or Manager), check with TL/Coordinator through your slack room if indeed needs to be handled by a supervisor, or if there is another solution you can offer in order to prevent the SV callback.

*****For UPA and ATH use the label "Supervisor callback" when escalating to FL Coordinator through slack.**

****Slack Channels****

UPA - *#fi-upa-coordinator-support*

ATH - *#fl-ath-coordinator-support*

NOTE : BOM FL agents - *As there is no Slack channel available, escalate the Supervisor callbacks through Edvin queue .*

4. If the request for SV callback is confirmed by TL/Coordinator or you are not getting a reply in time, proceed as per the instructions below.

a. If TL/Coordinator is available

- i. Register errand in Edvin using template "[Coordinator/TL escalation - Supervisor call](#)"

- **Channel:** Depends on how the customer contacted us
- **Category:** Depends on the customer's request
- **Type:** Call transfer/Callback (SOD/TL/Manager)
- **Action:** Pax requested call transfer/callback

- ii. Place the order on the queue "**UPA FL Coordinator**" or "**ATH FL Coordinator**" or "**BOM FLTeam leader**" depending on your location.

b. If TL/Coordinator is NOT available

- i. Inform pax that Supervisor will contact them within 24 hours
- ii. Register errand in Edvin using template "[Coordinator/TL escalation - Supervisor call](#)"

- **Channel:** Depends on how the customer contacted us
- **Category:** Depends on the customer's request
- **Type:** Call transfer/Callback (SOD/TL/Manager)
- **Action:** Pax requested call transfer/callback

- iii. Place the order on the queue "**UPA FL Coordinator**" or "**ATH FL Coordinator**" or "**BOM FLTeam leader**" depending on your location.

Agent actions if a case is already escalated:

1. If TL/Coordinator is available

- Register Errand with type Call transfer
 - **Channel:** Depends on how the customer contacted us
 - **Category:** Depends on the customer's request
 - **Type:** Call transfer/Callback (SOD/TL/Manager)
 - **Action:** Pax requested call transfer/callback
- Transfer the line to the TL/Coordinator

2. If TL/Coordinator is NOT available

- Register Errand with type Already Escalated and inform pax that the request is prioritized
- Change the status on the Coordinator/TL queue to: 'Needs to be handled'

"Coordinator/TL escalation - Supervisor call" Template:

Register Errand

Please refer to the table below: This table helps supervisors quickly identify the best possible solutions for customer queries during callbacks.

Request is related to	Outcome	Alternative solution
Cancellation	No refund permitted	1. Propose voluntary rebooking
Rebooking	No reissue permitted	1. Propose cancellation 2. New ticket sell
NACO	No NACO permitted	1. Propose cancellation 2. New ticket sell
Special equipment/pet	Not permitted on the specific flight	1. Propose voluntary rebooking to a different flight using the FXK command, and verify if special equipment is permitted. 2. Cancellation 3. New ticket sell
VI order, connection is less than 2 hours	Baggage cannot be added	1. Propose voluntary rebooking to increase MCT and ensure the checked bag is added accordingly.
The customer claims that we provided the wrong itinerary	After investigation, we see that it was the passenger's fault	1. Propose voluntary rebooking 2. Cancellation according to void/24h/rules, whatever is applicable 3. NACH if possible 4. New ticket sell

Exception

Scandi agents located in Athens should place the order on the "UPA FL Coordinator" queue, due to the language.
