

After checking the Shelf page: [How to handle naco/nach - General Rules](#), the FL agent should continue with the below steps for the scenario of **refunding the old ticket and then issuing a new ticket**.

1. FL agents should check the name correction guidelines found in Edvin docs and will then run the Modify Order button with the cancellation reason "**NACO**". A payment link for the NACO will have been paid in the meantime by the passenger, including our fees and the cost incurred by the airline.
2. FL team should proceed with **MODIFY order** by selecting the reason "**NACO**" in order to send the case to Refund Dashboard. No payout will be processed to the customer.

**Important!** When using the "**Modify Order**" with reason "**NACO**", we need to write the important/necessary info in "**Other info to BO**":

- TKT Number
- How to collect the penalty
- GDS/BSP

***Note: If the agents missed to use the correct cancellation reason "NACO", they should contact immediately their Team Leader/ Coordinator/Supervisor/Manager for assistance.***

For Portals orders, (eg. Farelogix, etc) where we're required to proceed with a refund and new ticket issue (and vice versa), proceed with claiming the ticket as per the FL routine, and after that Modify with reason "**NACO**". In case the claim should be processed in BSP (usually, but not necessarily, an EMD), the case should have the label "**NDC-RA in BSP**".

1. When the claims team (SL) completes the refund, they will escalate the case back to FL using the queue "**SL escalations to FL**" ---> **NACO**.

**Example:**

Support ATH

☐ ATH FL coordinator

**\*\* ONLY used by ATH FL \*\* For categories call listening /Supervisor calls**

☐ BO escalations to FL ATH

For refunds use: Refund

- PNR: XXXX
- Reason for escalation: XXXX

For ticketing use: Ticketing

- PNR: XXXX
- Reason for escalation: XXXX

For refunds use: NACO

- PNR: XXXX
- Reason for escalation: XXXX

For ticketing use: NACO

- PNR: XXXX
- Reason for escalation: XXXX

**Important! PNR and reason for escalation are mandatory in every escalation.**

2. FL agents should place the order in the Edvin queue "**BOM TKT**" --> "**Name Change and Add Infant only**" to send the order to the Fulfillment Team. as per the normal routine, using also the Errand template: **Register Errand - TKT info name change**. If this is urgent, the status should be changed to "**Needs to be handled**" (there is an SLA of 2 hours).  
An errand has to be added along with the template: "**Register Errand - TKT info name change (Amadeus/Sabre/Galileo)**", specifying what is needed by the Fulfillment team on "**Other info to ticketing**".

3. The Fulfillment Team issues the new ticket.

4. If the airline has requested the new ticket number, the FL team should recategorize the etrack to the inbox **7.10 SL Ticketing**, in advance and leave clear errands.

Additionally, FL agents should clarify all details/info needed for the NACO process to the errand when sending the order to the Fulfillment Team.

If there is a need for further assistance regarding name correction that requires a phone call, then FL agents should take additional steps.

5. The Fulfillment Team will send the new ticket number as per the guidelines (if this is required by the airline company) here: [Guidelines for Providing Ticket Numbers to Airline Support to Avoid ADMs \(Exceptional scenarios\)](#).

If an error occurs, then the Fulfillment Team should open a new email thread for sending the new ticket numbers to the airline.

For more information on register errands and Personalise snooze guidelines please refer to the following shelf pages.
