

ATTENTION!!!! New ticket creation in the GDS is permitted **only** if originally issued in GDS, for bookings made in other systems please follow the correct processes mentioned in each shelf section/decision tree. The process for NDC can be found under the "Portals" section.

For GDS bookings always create the new PNR respectively to the GDS used for original booking creation.

PNR creation with fake name details (ie. AB/CD MR) for test purposes is prohibited due to ADM risk.

Scenarios when you can offer New Ticket Sell:

- Customer requested name changes/corrections and ticket is under VOID window.
- The existing ticket does NOT permit changes
- Any other fare rule of the existing ticket does NOT allow reissue
i.g. destination change not allowed, stopover not allowed, max stay regulations, etc.
- The existing ticket does NOT allow name changes/corrections and the passenger wishes to change/correct name field
- The customer wishes to add a passenger (child or adult) older than 2 years old to the existing trip

Passengers below 2 years old are considered INFANT type of passengers and you must follow the the respective routine [here](#).

- The original ticket is changeable but the customer thinks the change cost is too expensive

In this scenario you can offer a new ticket, either on the same flight or a different flight/airline

Step by step instructions:

1. Inform the customer about our minimum fee for the New ticket Sell, so that he/she is aware before we start proposing alternatives.
2. Check if the originally issued ticket is still within the voidable period.
3. Make sure you are in the correct area.

- For primary OIDs: Price in the same areas as in the originally existing ticket
- If the above is not possible (i.e. lost ticketing authority) or for consolidator bookings, clone/create a new PNR and price in HEL.

4. In case of any name amendments/new passenger addition alert the customer that he/she takes responsibility for providing the full name details as stated in the passport.

- For detailed step-by-step instructions on actions to be performed in GDS please [here](#)
- For general GDS commands on mandatory fields for new PNR creation check [here](#)

5. Present offer to the customer Inform about total price and new baggage allowance

- The offer is applicable right here, right now.
- **We do not save reservations if the customer wishes to come back and pay later.**
- If customer doesn't accept the offer, ignore created PNR

6. If customer accepts the offer prepare the *Add on cart* in Edvin

Our handling fee is charged per number of passengers added in the new PNR. In case where the original order had one passenger, but the new PNR is created for more than one additional [ere](#).

Always use correct products in *Add on cart* and always insert mandatory explanation to **Text to customer** field, as presented below:

Scenario	Product to use in Edvin	Amount	Text to customer field
Original ticket is voidable	Airline Cost - Rebooking / New Ticket (LCC) NOT Flexible Ticket or Airline Cost - Rebooking / New Ticket (GDS) NOT Flexible Ticket	The difference between total price of the new ticket as per GDS and existing ticket price in GDS. The amount needs to be converted to local currency.	Depending on the reason for the new ticket sell: - The new flights I.e: 29JAN London - Madrid 12:00 14:00 - The corrected name/ the additional passenger's name I.e: name correction: SIMTH ANNA MS SMITH/ANNA MS - I.e: additional passenger SMITH/ANNA MS
	Our Service Fee - New Ticket	Pre-filled amount of our service fee in local currency	If no provider's cost, see the row above for necessary note.
Original ticket is outside the voidable period	Airline Cost - Rebooking / New Ticket (LCC) NOT Flexible Ticket or Airline Cost - Rebooking / New Ticket (GDS) NOT Flexible Ticket	The total price of the new ticket as per GDS. The amount needs to be converted to local currency.	Depending on the reason for the new ticket sell: - The new flights I.e: 29JAN London - Madrid 12:00 14:00 - The corrected name/ the additional passenger's name I.e: name correction: SIMTH ANNA MS SMITH/ANNA MS - I.e: additional passenger SMITH/ANNA MS
	Our Service Fee - New Ticket	Pre-filled amount of our service fee in local currency	If no provider's cost, see the row above for necessary note.

- The payment must be processed on the spot - do NOT offer payment link with prolonged last payment date for two reasons:
since we don't save the created PNR, availability may change we need to ensure that the amendment was processed accordingly to the customer's request (spelling for new passenger/nach)
 - ATTENTION: If the payment is NOT fulfilled during the phone conversation, ensure that there are no saved segments in the new PNR!**
 - When sending a payment link to add a new passenger, use the Edvin templates: *Add passenger request + PL* for ETG orders or *Booking.com - Add passenger request + PL* for Booking.com orders
- Once the customer fulfills the payment, save the created new PNR in the GDS. Follow standard routines for all mandatory PNR details [here](#).
 - Go to Edvin and link the new created PNR.
 - Use the rebooking wizard (New ticket scenario) to send to the ticketing queue.
 - Change status of the order to **"New Ticket"**.

ATTENTION: If the New tkt sell routine is offered due to customer **rebooking or name change/correction request**, when the payment for the new ticket is fulfilled, **below actions need to be taken on the old PNR:**

- Firstly always check if the ticket is voidable - if yes, proceed with segment cancellation and void as per standard routines. For more details on voiding check [here](#).
- If the ticket is not voidable anymore, then the segments in the old PNR in GDS should be canceled and the ticket shall be left for "refund due to unused" for Second Line agents to refund it to us as per fare rules.

LCC BOOKINGS:

For respective LCC routines check [here](#).

OWC/MULTI PNR and VI ORDERS:

If the original booking is OWC, Multi PNR or VI order, please make a new booking following the same structure as for the original order. For VI order, be careful to keep the sufficient minimum connecting time.

VOID or 24hr rule after New ticket sell

After creating a New ticket, if the customer wishes to cancel the new ticket within the voidable period, you shall treat it as a normal VOID / 24 hr process.

Our standard cancellation service fees for the particular scenario shall apply, and previously charged handling fees remain non-refundable.
