

- The Outbound phone Scripts are to be used by the agents whenever they make an Outbound call to inform the customer or the supplier that the call is being recorded.
- It is important to **always ask for the customer's confirmation** in such cases since it is considered GDPR.

For outbound calls with sudden disconnection, use the opening script again when calling back, even if immediately.

- If the airline/customer does not agree to record the call, you always need to stop the recording and select the wrap-up **"Non approved rec"**
- **No booking details:** Do not exchange booking information before completing the opening script; respond to casual greetings only (**e.g.**, "How are you? Is this Gotogate?").
- **Handle off-script questions:** If a customer asks an off-topic or detailed question (**e.g.**, "Is this about my refund/rebooking? etc"), kindly inform them that you will address it right after you complete the required opening script.
