

Northstar Services Data Retention and Deletion Standard

Northstar Services - fictional stakeholder demonstration corpus

Production application logs are retained for 90 days and then permanently deleted from active systems.

Encrypted daily backups are retained for 35 days using a rolling expiration schedule.

Customer account records are retained while the account is active and for 12 months after account closure.

A verified deletion request is completed within 30 days unless a legal hold requires continued retention.

Legal-hold records are isolated from routine deletion and released only with written approval from legal counsel.
